About Me

I take a mindful approach to software development emphasizing sustainable processes and elegant execution. I write code because I can't not.

Experience

Half Helix • *Frontend Developer*

New York, NY • February 2022 - Present

- Lead developer on Shopify theme build for lauramercier.com leveraging web components and Liquid
- Lead technical point of content for retainer efforts on shen-beauty.com where I performed site speed performance/accessibility audits and site maintenance
- Developed a headless storefront for packagefreeshop.com leveraging Gatsby/Styled Components, Contentful, Vercel/Nacelle and the GraphQL Storefront API
- Performed bug fixes, code review and internal documentation creation for various other projects as assigned

Thinx Inc. • *Frontend Engineer*

New York, NY • January 2019 - August 2021

- Worked independently to develop UI components with an emphasis on responsiveness, performance and code maintainability during our headless migration
- Researched, vetted and implemented libraries from the React ecosystem based on internal specification and industry best practices
- Performed site-wide accessibility audits, prioritizing lowest effort/highest impact tasks

Sanctuary Computer • *Intern Developer*

New York, NY • September 2018 - December 2018

- Developed dameproducts.com using Liquid, jQuery & SCSS/BEM
- Assisted with development on Sanctuary's [studio portfolio](#), separate [e-commerce site](#) for advocating Medicare for All and an open source CSS solution developed originally internally called [Basement](#)

Education

New York University

Bachelor of Music in Music Theory and Composition

Minor in Media, Culture and Communication

New York, NY • May 2016
