Why Choose Us?

At ASEC, we understand that surgery can be a stressful time for both you and your pet. Our board certified surgeon and her team are dedicated to providing compassionate, state-of-the-art surgical care while keeping you informed every step of the way. From the initial consultation to post-operative rehabilitation, we are here to support your pet's journey to recovery.

What To Expect

Initial Consultation

Before surgery, our veterinarians will examine your pet, review medical history, and perform necessary tests. We'll discuss treatment options, answer your questions, and ensure you feel confident about the procedure.

Surgery Day

At check-in, our staff will review pre-op instructions. A pre-surgical assessment, including bloodwork, ensures your pet is fit for anesthesia. During surgery, we closely monitor vital signs for safety and comfort. Afterward, we'll update you on their condition and provide post-op care instructions.

Recovery

Your pet is monitored as they wake from anesthesia to ensure comfort. Before discharge, we'll provide detailed at-home care guidelines, including medications, activity restrictions, and follow-up appointments.
