

Kitten Schedule

- 8 weeks:** **Complete physical examination**
1st Feline Rhinotracheitis, Calicivirus and Panleukopenia (FVRCP) vaccines
Deworming medication will be dispensed as recommended by guidelines.
Discussion will include the importance of proper nutrition, feeding schedule, pet insurance and flea control.
- 12 weeks:** **Physical examination**
2nd FVRCP and 1st Feline Leukemia vaccination
Deworming medication will be dispensed at this visit. We will also record a current weight and determine a Body Condition Score (BCS). Dental care and grooming requirements will be discussed.
- 16 weeks:** **Physical examination**
3rd FVRCP, 2nd Feline Leukemia
Deworming medication will also be dispensed at this visit. In addition, spay or neuter surgery, pre-anesthetic bloodwork, and identification options will be discussed.
- 20 weeks:** **Physical Examination & Rabies vaccination.**
Deworming medication will be dispensed. Review of flea control/prevention and spay/neuter planning and pre-anesthetic bloodwork and identification options.
- 6 months : (Approx.)** **Spay or Neuter Surgery with pre-anesthetic bloodwork done 1 week prior**
Tattoo and/or Microchip can be done at time of surgery. During the procedure we will be doing a complimentary dental exam and nail trim. We will also discuss post operative home care and dietary recommendations. Deworming medication will be recommended as per adult cat protocol.
- Annually:** **One year from the date of the third vaccination, your cat will be due for an Annual Physical Examination and vaccination.**
At each yearly visit our Veterinarians will gather information to determine which vaccines will be recommended based on your cat's lifestyle, health and risk.

Examination and discussion may include:

Strategic deworming program
Parasite/flea control
Proper nutrition/dietary recommendations
Routine dental exam and dental care
Weight management
