Dr. Anema and staff of Dunes Animal Hospital would like to congratulate you on the new addition to your home. The first few months are important in your puppy's development, and a series of things should be done to help ensure it's health.

For your convenience, we have prepared the following checklist to assist you in keeping track of these items. Please bring this list with you when you and your puppy come in for visits.

**7-8 Weeks Old**

- #1 Vaccination DA2PP+CvK/LCI  
( Canine Distemper, Adenovirus type 2, Coronavirus, Parainfluenza, Parvovirus and Leptospira Bacterin)
- Intestinal Parasite (worm) Examination  
(Please submit fresh stool sample. 1 teaspoonful is plenty.)
- Dewormer given. (The CDC recommends all puppies be dewormed at least 2 times.)

**10-11 Weeks Old**

- #2 Vaccination DA2PP+CvK/LCI
- Bordetella Vaccine
- Dewormer given

**14-16 Weeks Old**

- #3 Vaccination DA2PP+CvK/LCI
- Initial Rabies Vaccination
- Heartworm preventative started if appropriate.

**6 Months Old**

- Ovariohysterectomy (Spay-Female)/Castration (Neuter-Male)  
(Optional pre-surgical blood screening.)

**1 Year Old**

- DA2PP+CvK/LCI (1 year booster)
- Rabies Vaccination
- Bordetella Vaccination
- Intestinal Parasite Examination
- Heartworm Test

*We schedule vaccinations and surgeries by appointment, so please call in advance for the earliest available time.*
