

How to Clean Your Dog's Ears

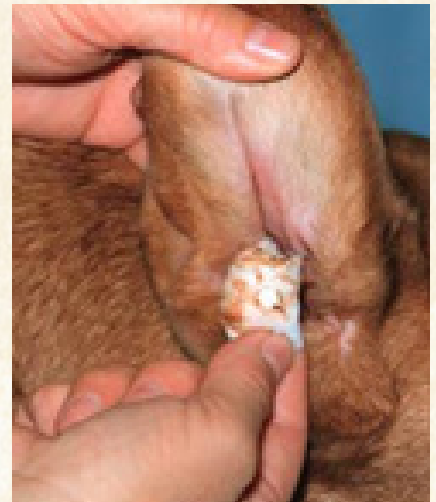

1) Apply cleanser to ear liberally as shown, or by soaking a cotton ball and placing it in the ear.

DO NOT INSERT COTTON SWABS DOWN INTO THE EAR CANAL!! Use cotton swabs only to clean the parts of the ear you can actually see.

2) Massage into ear canal by gently massaging the base of the ear.

3) With a cotton ball over your fingertip, wipe the accessible portion of the ear clean. Let your dog or cat shake out any excess. Clean the same portion of the ear with a dry cotton ball once again. Repeat if necessary.

4) After cleaning, you may apply the medication deeply into the ear canal.

If at any time your pet begins to fight or struggle, please stop and offer them a break, yummy treats, and/or lots of petting to remove as much stress or anxiety as possible.
