- 2 Intestinal Parasite Tests
- 2 Deworming for Roundworms and Hookworms

Every dog deserves to live a long and happy life.

‘The Essential Adult Plan is ideal of the young physically healthy dog. Along with supporting the findings of the physical exam, the basic lab work provides a baseline for future comparison. The Essential Puppy Plan is also ideal in that it assures that the pup is going to receive all the basic vaccinations, diagnostic work and ancillary treatments needed to get through the growth phase from puppyhood to adulthood.’

Jan Rossiter, DVM
