KAC Focus on the Family!

Here at Kentuckiana, we think of our team as family and we are so excited to be growing our family here at KAC!
We want to introduce the newest member of our KAC team.
When you come to visit us, let her know
you are as glad she is here as we are!

Welcome to the KAC family, Reece!

My name is Reece and I am originally from Lexington, Kentucky. I am so excited to be a part of the Kentuckiana team! Currently I am headed towards a Bachelors degree in zoology and plan to attend Auburn University for vet school. I have a special interest in exotics, equine, and reproductive medicine. My family raises German Shorthaired Pointers and I have two of them (Moses and Jemma.) I also have several pet chickens and Cayuga ducks, a hedgehog, and a lion head rabbit named Piper. I enjoy hiking, horseback riding, archery, and practically anything involving the great outdoors.

Welcome to the KAC family, Corey!

My name is Corey and I am very excited to be apart of the Kentuckiana Team! I have always had the heart to care for animals domestic and wild which has increased my need to further my knowledge on animal health. Also I am a proud owner of a orange female tabby cat named Sherbert and a black male lab/collie mix named Shadow. My hobbies are drawling, spending time with loved ones and going on adventures and trying new things.

Congratulations, to our KAC Leadership Award Winners! Kirstie & Felicia!

**As part of our Award Winning Kentuckiana Team
We want to congratulate two of our team members.
Both Kirstie & Felicia recently earned the KAC
Leadership Award!**

The KAC Leadership Award is a program to recognize & reward fellow team members based on their excellence in leadership. Fellow team members nominated each other for outstanding leadership qualities.

What do you know about the “Dog Flu”?

Recently, we’ve been receiving concerns about the “dog flu” or Canine Influenza Virus. This is a relatively new disease has been found in 46 states and can cause respiratory disease. The virus is highly contagious and dogs do not have natural immunity.

Here is some more information about CIV and the vaccine:

- **What is CIV?**

- Canine influenza is a relatively new viral infection and respiratory disease that affects dogs.
- There are two strains (H3N8 and H3N2), which have both been diagnosed in the US.

- **What are symptoms?**

Coughing	Nasal Discharge
Sneezing	Lethargy
Loss of Appetite	Fever
Complications can lead to more Serious conditions like pneumonia.	

- **How does it spread?**

CIV is highly contagious, spread through respiratory secretions in the air. Dogs can still shed the virus without showing clinical symptoms. Therefore, AAHA and AVMA recommend that all dogs that spend time in places like boarding facilities, daycare, resorts, dog shows, groomers, & dog parks get vaccinated for CIV.

- **How do I protect my dog?**

Vaccination is the best way to protect dogs. The bivalent vaccine comes in 2 doses, given 2-4 weeks apart. An annual booster is also recommended. The vaccine we now offer includes both strains.
