

Preparing Your Pet for Their Upcoming MRI

THE NIGHT BEFORE:

- Fast your pet prior to their appointment, this means no food after midnight.
 - Water is fine to continue.

THE DAY OF:

- Administer any scheduled morning medications with a small bite of food (**not** a full meal).
- Bring any medications your pet will need that day; this is helpful if they are staying for surgery.
- Arrive at our hospital to drop off your pet between **7:00 AM and 8:00 AM**.
 - Plan for your pet to remain at the hospital for the day.
 - Dr. Scarano will contact you with the results between 12:00 PM and 6:00 PM.
 - We will call you immediately if there are any emergent concerns.
- A 70% deposit for your pet's procedure is due at drop-off. Payment in full is required at the time of discharge.
 - If you need additional information about payment options, please visit our website's *Pet Owner Resources* page by scanning the QR code below.

If you have any questions or concerns, Dr. Scarano can be reached by e-mail at:
