

## Do you have an itchy dog?

Our hospital is currently enrolling dogs to participate in a clinical trial to evaluate the safety and effectiveness of a new investigational biologic product for the management of canine atopic dermatitis.

***Your dog might be eligible for participation if he or she:***

- Has inflamed, itchy skin
- Does not have fleas or other skin parasites
- Lives mostly indoors
- Is on a stable diet

Dogs that are enrolled in this study will be evaluated approximately 5 times during an 8-week period of time. If eligible for the study, dogs will receive their assigned treatment and examinations/evaluations at no charge.

***If you believe your dog may qualify, please  
ask the front desk for more information.***
