

Our Purpose and Philosophy

Our mission is to provide emergency veterinary and specialty services in a caring environment. Pets and their “parents” are our highest priority, and are both treated with dignity, kindness, and respect by professionals who are passionate about their work.

- » We partner with your primary care veterinarian to determine the best options for you and your pet.
- » Our pet care team works with you to offer the best diagnostic and treatment plan for your pet while respecting your financial needs.
- » We make every effort to keep you informed, and all questions are welcome. A minimum of twice-daily communication regarding your pet’s condition and the ongoing cost of medical and surgical care is encouraged.

24/7 Emergency Pet Care

Melbourne, Florida

Our Services

24/7 Emergency Care

Whether your pet swallowed a fishhook, was attacked by another animal, or developed a life-threatening illness, our Pet Care Team is available 24 hours per day, 7 days per week to provide emergency care.

Advanced Imaging

Combined with our specialized procedures and skilled emergency veterinarians and technicians, ASEC is unmatched for the level of expertise and experience you need when your pet is ill.

Dentistry & Oral Surgery

Dentistry is a crucial aspect of caring for your pet's health. Pets may suffer from undiagnosed dental complications, accidental injuries, and more. At ASEC, our Board-Certified Veterinary Dentist focuses on health issues and injuries related to the mouth, teeth, and gums beyond preventative care.

Canine Rehabilitation

Advanced Recovery Therapies not only help speed the healing process, but they may also assist in relieving pain from conditions like arthritis and joint disease. These therapies are the same high-quality treatments prescribed in human medicine, using equipment and procedures that have been specially designed for pet patients.

Surgery

Surgery may seem intimidating, but we're here to support you and your pet through every stage—from assessment to recovery. Our team offers thorough veterinary emergency and surgical services, delivered with compassionate care.

Appointments

For emergencies, no appointment is needed. Our Pet Care Team is available 24 hours per day, 7 days per week to provide emergency care. **Our specialists are available by referral appointment only Monday-Thursday 8:00 AM - 6:00 PM.**

What to Bring to Your First Visit

If we are seeing your pet for the first time:

- » Please bring any laboratory reports, blood work, biopsy report, radiographs and ultrasounds with you or have your general practice veterinarian send them over. Having these items helps our veterinarians provide a more complete and accurate diagnosis and can prevent the need for repeat testing.
- » Be sure to bring all medications that you are currently giving your pet.

If diagnostic testing or surgery (including endoscopy or ultrasound) is a consideration, food should be withheld after 9:00 p.m. on the evening prior to your scheduled appointment.

Our Pet Care Team

Animal Specialty & Emergency Center of Brevard (ASEC) is Brevard's leading full-service emergency and specialty veterinary hospital. ASEC has assembled an incredible team of outstanding individuals in the veterinary medical field. It is our goal to provide the highest quality of care, utilizing the best-trained veterinary personnel available. A veterinarian and a full complement of staff are always on-premises. There is an off-site Board Certified Radiologist who reviews all cases. A Certified Canine Rehabilitation Therapist is also on staff.

Working closely with each other, as well as with pet owners and primary care veterinarians, we're able to deliver the best possible care by openly exchanging information and ideas for the betterment of our patients. Learn more about our emergency and critical care hospital.
