NOTES

INTERNAL MEDICINE

RedBankVet.com

What to do to prepare for the appointment:

Our internal medicine department often evaluates the most complex cases, those that are difficult to diagnose and therapeutically manage. In order to do that, we need as many records from other veterinarians as possible.

Please help ensure we have everything we need by reaching out to any veterinarians that have seen your pet in the last 5 years and requesting that they send us ALL medical notes, lab results, x-rays and any other diagnostic tests and results 1-3 days prior to your appointment.

Please let us know if you have any issues in having these records sent and if we can assist in any way.

**Please call us with any questions
and for appointment availability:
(856) 429-4394**

Disease Management:

- ▼ Upper GI endoscopy
- ▼ Colonoscopy
- ▼ Bronchoscopy
- ▼ Rhinoscopy
- ▼ Laryngoscopy
- ▼ Gastrointestinal endoscopy
- ▼ Joint taps
- ▼ Ultrasound-guided biopsies

Meet Our Internist

JOSEPH DIBENEDETTO

DVM, Practice Limited to Internal Medicine

Dr. Joseph DiBenedetto is originally from Queens, New York where he spent most of his childhood playing sports year-round (specifically baseball and basketball). He received his Bachelor of Science in Cell and Molecular Biology at Binghamton University. He pursued his veterinary education at Cornell University's College of Veterinary Medicine. After completing his DVM, he moved to Atlanta, Georgia and completed a rotating internship at BluePearl Veterinary Partners Atlanta. It was during this year that he became focused on pursuing a residency in Internal Medicine. Dr. DiBenedetto then moved to Ames, Iowa, and completed a residency in Small Animal Internal Medicine at Iowa State University's College of Veterinary Medicine in 2022. During his residency program, Dr. DiBenedetto particularly enjoyed teaching veterinary students and very much enjoyed the day-to-day interactions he had with his clients.

Over the past year, he worked as an internist in Des Moines, Iowa. He is particularly interested in hematology, gastroenterology, and nephrology, but finds all aspects of internal medicine interesting! He enjoys performing endoscopies, bronchoscopies, and the problem-solving that makes this job so rewarding.
