

## PAW PLAN OVERVIEW

As your kitten grows so quickly in the first year, his or her medical and nutritional needs change. Our Kitten Paw Plan helps manage their evolving needs and prepares them for adulthood.

Each Kitten Paw Plan offered by Spanish Trail Animal Hospital includes all necessary examinations, vaccines, laboratory testing and other services essential to protect your pet against illness and disease. An upgraded plan is designed to provide additional services like spaying and neutering, microchipping, more extensive blood work and even declawing. Our goal is to keep your pet healthy and happy during their adolescence and into the prime of their life.

Kitten Paw Plans are designed for puppies 6 weeks to 1 year of age.
