

## Estimated Spay & Neuter Costs

(updated 01/01/2025)

This document lists the estimated costs of routine spay and neuter procedures performed at Barclay Hills Animal Clinic. These costs are approximate and may vary for your specific pet.

All costs *include* pre-anesthesia bloodwork, anti-nausea medication, and one pain medication to take home. These things are not optional and are part of the surgical package.

These costs do NOT include additional treatments that may be requested or deemed necessary upon examination. Examples of some additional costs include: office visit to establish care, Elizabethan collar, rabies vaccines, microchip placement, etc.

If you have any questions concerning these estimate ranges, the included treatments, or the optional treatments, please do not hesitate to set up a surgical consult appointment (\$90) where we can give you specific information/pricing for your pet.

Please be assured that the health and well-being of your pet is our highest concern.

Thank you for choosing Barclay Hills Animal Clinic!

Species	<u>Spay</u>	<u>Neuter</u>
