

OVERVIEW

Pacific Northwest Pet ER & Specialty Center believes your pet should receive the very best medical, surgical and supportive veterinary care available. We provide comprehensive veterinary emergency and surgery, all with compassionate care you can trust.

WHAT TO EXPECT

Initial Consultation

Surgery consultations and appointments are available by referral from your primary veterinarian. At your initial consultation, our surgery team will evaluate your pet, confirm a diagnosis, discuss treatment options, and if needed, schedule a procedure. We will also answer any questions you may have about your pet's condition and the proposed diagnostic and treatment plan.

Surgery

The day of surgery, your pet will be prepped for his or her procedure by our experienced veterinary team. We have a variety of anesthetic and pain management options to keep your pet comfortable before, during, and after the procedure.

Recovery

At Pacific Northwest Pet ER & Specialty Center, pets never wake up alone from a procedure; they are continuously monitored and comforted by our highly-skilled, compassionate staff throughout the recovery process.
