Pre-Anesthetic Blood Testing:

We test our patient's blood to detect dehydration, anemia, infection, diabetes, liver and kidney disease. This is done to avoid complications with your pet during surgery or while they are anesthetized.

Done on: _____

Do on: _____

IV Catheter/ Intravenous Fluids:

We administer fluids through an IV catheter during anesthetic procedures to help support the circulatory system, maintain blood pressure, prevent dehydration, and help your pet recover more quickly from anesthesia. IV access also allows us to administer medications more quickly in case of an emergency.
