

IS YOUR DOG RECEIVING DOXORUBICIN?

Ask us about our fully funded clinical trial for the prevention of nausea and vomiting in dogs receiving doxorubicin.

Owner Participation:

- Eligible dogs receiving doxorubicin will be treated with investigational product or control product for 7 days
- Owners must monitor their dog for the 7 days of treatment and return on day 8-10
- Owners are required to document daily observations throughout the study period

Eligibility:

- Dog weighs > 5.0kg
- Dog is at least 6 months of age
- Chronic conditions other than cancer should be stabilized for at least 3 months
- Dog will be receiving doxorubicin at any point during their chemotherapeutic regimen
