

The Comprehensive Senior Plan offer additional services to help your senior pet stays healthy.

“This plan is a better choice for older patients because it has a more comprehensive chemistry allowing us to evaluate the health of the organs, thyroid levels, and a urinalysis to evaluate the kidneys better. It helps us identify problems earlier and extend the life of your pet. It also offers discounts on radiographs and ultrasound which may be needed to evaluate any other health problems that develop.”

Karl Hill, DVM
