

Feline Vaccinations

FVRCP is a vaccination that covers 3 different types of respiratory diseases in cats.

Feline Rhinotracheitis virus (FVR in FVRCP)

What is Feline Rhinotracheitis virus? A viral infectious respiratory disease caused by feline herpesvirus type 1. This virus is an extremely common cause of respiratory disease and usually life-long, infection with intermittent recurrences causing respiratory and sometimes eye disease.

Why should I vaccinate?

It is spread easily through airborne respiratory secretions and direct contact with a carrier cat or contaminated objects. Unvaccinated cats are most susceptible as well as the very young and the very old.

Calicivirus (C in FVRCP)

What is Calicivirus? A common viral infectious respiratory disease that can also cause mouth sores resulting in severe oral pain. Spread by direct contact with an infected cat or by contact with contaminated objects.

Why Should I vaccinate?

The virus is very resistant to disinfectants and persists in the environment. Unvaccinated and inadequately vaccinated cats of all ages are at risk.

Panleukopenia (P in FVRCP)

What is Panleukopenia? A severe, highly infectious, and sometimes fatal disease of the gastrointestinal tract, the immune system, and the nervous system. The disease is named for the characteristic severe decrease in white blood cells, the body's defense against disease.

Why should I vaccinate?

The virus is very persistent in the environment. This virus spreads by direct contact with infected cats or by contact with viral particles in the environment. Unvaccinated and inadequately vaccinated cats of all ages are at risk.

Feline Leukemia "FeLV"

What is Feline Leukemia? Feline leukemia virus (FeLV) is one of the most common infectious diseases in cats, affecting between 2 and 3% of all cats in the United States. Why should I vaccinate? FeLV can be transmitted from infected cats when the transfer of saliva or nasal secretions is involved.

Eastern Shore Animal Hospital

34424 Lankford Hwy, Painter, VA 23420

We Put Your Pet First

We provide a broad spectrum of diagnostic procedures through in-house testing and the use of external laboratories. We also work closely with local practices when special diagnostic procedures are required. The facility includes a well-stocked pharmacy, in-hospital surgery suite, in-house x-ray capabilities, diagnostic ultrasound exams, a closely supervised hospitalization area, and indoor boarding kennels with outdoor walking areas.

We hope to ensure a positive impact on our patients, clients, and the local community. Our services and facilities are designed to assist in routine preventive care for young, healthy pets, early detection and treatment of disease as your pet ages, and complete medical and surgical care as necessary during his or her lifetime.

Cat Wellness Lifecycle

CAT WELLNESS LIFECYCLE

Your Kitten's Path To Wellness

TIME FRAME	APPOINTMENTS	VACCINES	ADDITIONAL HEALTH
First Visit 6-8 Weeks	Complete Physical Exam	Core Vaccines: FVRCP	Monthly Parasite Prevention: Start Heartworm Prevention Start Flea/Tick Prevention
Second Visit 10-12 Weeks	Complete Physical Exam	Core Vaccines: FVRCP FELV	Monthly Parasite Prevention: Refill Heartworm Prevention Refill Flea/Tick Prevention Test for FELV/FIV
Third Visit 14-16 Weeks	Complete Physical Exam	Core Vaccines: FVRCP FELV Rabies	Monthly Parasite Prevention: Refill Heartworm Prevention Refill Flea/Tick Prevention
Spay/Neuter 6 months	Complete Physical Exam Presurgical Bloodwork	Core Vaccines: FVRCP	IV Fluids Pain Medication Anti-nausea medication Patient Care Post-Op Laser Therapy

TIME FRAME	APPOINTMENTS	VACCINES	ADDITIONAL HEALTH
First Adult Visit 1-2 years	Complete Physical Exam Schedule First Dental Cleaning Pre-Anesthetic, Bloodwork, Complete Oral Exam, Full Mouth Radiographs, Scaling & Polishing	Core Vaccines: Rabies Lifecycle Based Vaccine: FELV	Parasite Screening: Intestinal Parasite Test Monthly Parasite Prevention: Refill Heartworm Prevention Refill Flea/Tick Prevention
Adult Years	Complete Physical Exam Every Year Schedule Dental Cleanings – Every 1-2 years based on doctor's recommendation	Core Vaccines /Every 3 Years: FVRCP Rabies Lifestyle Based Vaccine: FELV	Yearly Parasite Screening: Intestinal Parasite Screening Monthly Parasite Prevention: Refill Heartworm Prevention Refill Flea/Tick Prevention Start Joint Support

TIME FRAME	APPOINTMENTS	VACCINES	ADDITIONAL HEALTH
