

HALLOWEEN

PET SAFETY TIPS

NO CANDY OR TREATS

Candies, baked goods, and human food can be very toxic to pets. Especially chocolate and xylitol! Keep treats in a spot where your pet can't reach

PET COSTUME SAFETY

Not all pets enjoy wearing a costume. Make sure your pet is comfortable and watch for signs of anxiety. They should have no obstructions blocking their site, no dangling objects they can swallow, make sure they can easily move around and not overheat.

DANGEROUS DECORATIONS

Some decorations can be choking hazards and dangerous to your pet. Keep wires, garland, and anything your pet may chew on out of their reach. You don't want Fluffy swallowing garland, chewing on a string of lights, or knocking over a lit candle!

SAFE SPACE

Trick-or-treaters coming up to your door can be stressful for some pets. If your pet is easily stressed, then move them to a quiet room away from the door. Have their favorite toys and treats near them to keep them occupied. Watch out for pets that may try to dart out your door.

KEEP AN EYE ON YOUR PET

Always keep pets on a leash when you're in public and in your view. Make sure your pet is wearing an ID/collar or is microchipped. Bring pets inside to keep them extra safe. This will keep them away from traffic and people who may scare them.
