

1 2 3 How to control PTZ

1 If the DVR Type is a VMAX480 model, you will be able to control a PTZ camera. To do so, select a PTZ channel in full screen mode.

2 To move PTZ camera, press the eight directional arrow buttons. To zoom in or zoom out, press the 'Zoom In/Zoom Out' icon located in the middle. To move PTZ camera to a preset location, press the 'Preset' button and type in the preset channel number.

7.3 Blackberry Application Software

1
Installation Mobile ACS.
2
3

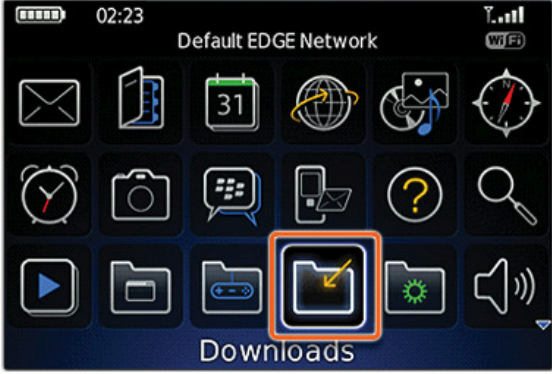

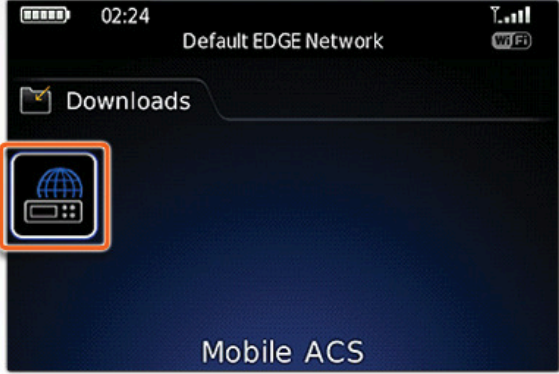

1 After you unzip the zip folder "StandardMobileACS.ZIP", then you will see two files in there. Copy these two files to "Downloads" folder in Blackberry.

- 1) MbileACS.alx
- 2) MobileACS.cod

Note :

- For more information about how to copy a file to Blackberry, please refer to the Blackberry manual about Blackberry Desktop Manager.

2
Please find 'Downloads' folder in your Blackberry and get into it.

1
2 How to manage connections (Before you start)
3

1 Go to 'Manage Connections' in the Blackberry main menu.

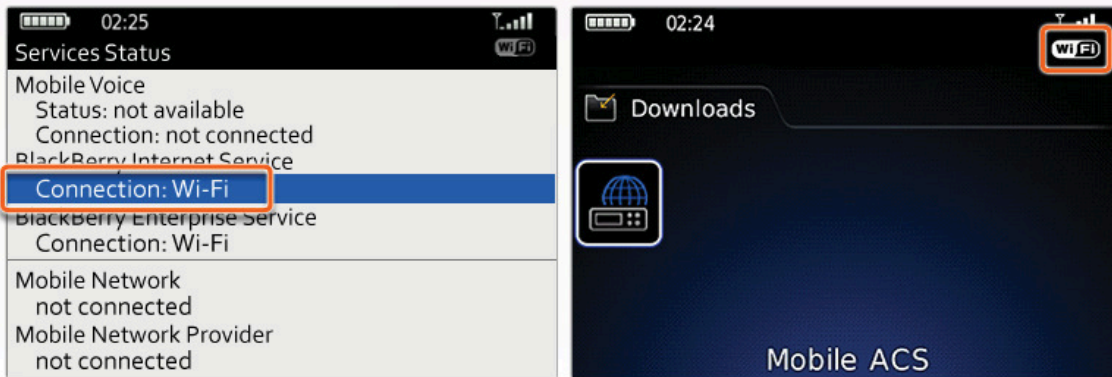

2 How to manage connections (Before you start)

2 Have the 'Wi-Fi' check box is checked first. Then, please go to 'Mobile Network Options'.

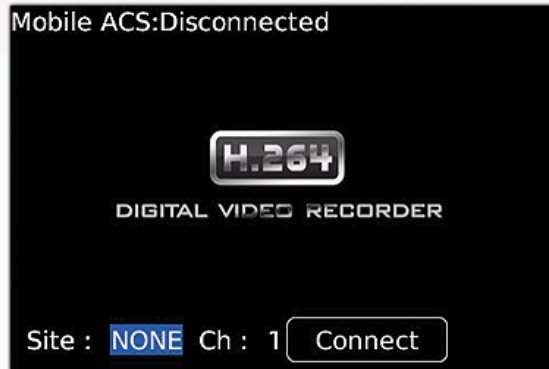

3 You will see the Services Status as shown below.
 Blackberry Internet Service Connection: Wi-Fi and Wi-Fi Network Information.
 Also, you will see 'Wi-Fi' connection icon (Light On) on the upper right corner of the main menu.

1 2 3 How to connect (Get Started)

1 'Site' means the site name that you want to access and 'Ch' means the camera channel that you want to see. For the first time connection, the site name is 'NONE' because there is no added site yet.

2 In order to add a site, push  button and select 'Add Site'.

Note:

- If there is no added site, it only shows you 'Add site' and 'Close' as shown on the left.
- If there is any added site, you will see 'Connect', 'Add Site', 'Modify Site', and 'Remove Site' in the menu as shown on the right.

1 2 3 How to connect (Get Started)

3 Once you click 'Add Site', the network information window will show up. Then, please input your network information in the each section

Note:

- Site Name: The name of the site that you want to see. (You can name it as you want.)
- Address: The IP address of the site that you want to connect with.
- Port: The Mobile Port number of the site.
- User ID: The User ID of the DVR, which has been registered in the DVR already.
- Password: The User Password of the User ID of the DVR

4 Now it's time to connect to your DVR. Move track ball key  to select a site and channel number. Press track ball key  or Enter key  to connect. Plus, you may connect by pressing menu key  and select 'Connect' to connect.
