

# **Exciting Career Change Opportunity**

## **INTRODUCTION**

Has the pandemic caused you to rethink your career choices? Have you always been interested in Vet medicine but just didn't know where to start? Well, we've got a prime opportunity for you. We are adding a new position, Vet Tech Assistant, to our great team. This position does not require any experience in the Veterinary world. What it does require is a willingness to learn, an ability to get along with your teammates (even under pressure), a great sense of humor (because you will get pooped on, it's only a matter of time), and a respect and love for all animals (even the naughty ones). We have a step-by-step training program that will lead you to becoming a Veterinary Technician.

## **Skill and Knowledge**

You will learn how to educate clients about their pet's health and wellbeing, including vaccines, heartworm testing and flea prevention. You will learn about medications for allergies, heart disease and more; you will learn how to read cytology's, perform ear packs, take x-rays and clean and flush wounds. Eventually you will learn how to prep patients for surgery, perform dentals and monitor anesthesia.

## **Benefits**

We also offer some great benefits. We pay for a portion of your health insurance, provide uniforms, have sick leave, vacation and holiday pay. Provide time off during the week, have great pet benefits and many other fun perks. If this sounds like a career you would like to get started in, please submit your resume and reason you are interested in this position.
