

Training Service Steps

How does it work?

- 1** Schedule 60 minute initial consultation
We will discuss your goals and concerns, then give you a personalized training plan.
- 2** Start the training plan
We will begin the training package either by coaching in your home or day training.
*Options will be discussed in initial consultation.
- 3** Have an enjoyable life with a well-mannered dog
Enjoy the learning process with your dog that will be a pleasure to live with!

What training can we help you with?

Puppy training

- Get your puppy started right with our 4 week Puppy Start Right™ course. Early puppyhood is a critical time for socialization and learning. This course meets once weekly for four weeks at Petal Animal Clinic and gives your puppy the opportunity to socialize with other puppies in a healthy, safe environment. You will learn how to introduce your puppy to the world and learn about normal, but frustrating puppy concerns such as house training, mouthing, and jumping up. Bring the family and enjoy learning how to set the stage for the rest of your puppy's life. This class is for puppies between the ages of 7 – 12 weeks.
- We also offer in home coaching packages or day training packages based on your specific goals and concerns.

Basic manners

- Is your dog a teenager or a little older and needs a little help with manners. We can help to personalize your dog's training plan based on your goals. Most of these goals consist of basic cues such as sit, down, leave it and others are taught in these session. We offer in home coaching or day training packages for basic manners.

Behavioral concerns such as fear, anxiety, and reactivity

- At times our dogs need a little extra help to cope from experiences that impacts them emotionally. We can help with your concerns and goals to help improve your dog's daily life by developing a personalized training package.
