

ENDPOINT DETECTION AND RESPONSE (EDR)

Coalition + Malwarebytes

Signup link: control.coalitioninc.com/partners/malwarebytes

Why Malwarebytes?

A leading provider of advanced endpoint protection and remediation solutions, Malwarebytes proactively protects people and businesses against dangerous threats such as malware, ransomware, and exploits that escape detection by traditional antivirus solutions. Malwarebytes completely replaces antivirus with artificial intelligence-powered technology that stops cyberattacks before they can compromise home computers and business endpoints. Malwarebytes' comprehensive protection catches increasingly sophisticated threats by monitoring and analyzing behavior, where many traditional solutions fall short by focusing on file-based malware and signature tracking for established threats. Further differentiating from standard security solutions, Malwarebytes allows devices attacked by ransomware to roll back up to three days to restore conditions prior to the attack.

Malwarebytes proactively protects people and businesses from malware, ransomware, and exploits through artificial intelligence-powered technology that stops cyberattacks before they can compromise endpoints. Malwarebytes now detects and/or blocks over **8.8 million threats** daily.

Policyholder benefits

All Coalition Policyholders receive a discount on Malwarebytes solutions. When appropriately deployed, Malwarebytes effectively detects and isolates attacks, investigates threats, and remediates any damage. Five step point and click configuration process takes teams just minutes to enable - Zero coding or code maintenance required.

How to sign up

Policyholders may find information about Malwarebytes and sign up for their services in [Coalition Control](https://control.coalitioninc.com).

Frequently Asked Questions

Is this easy to use/install? Malwarebytes is easy to download and configure, but if your organization employs an IT or Security manager, we recommend the deployment be managed by those people or teams.

What are endpoints and endpoint security? Endpoints are any device you use to access company resources, such as your laptop, phone, or tablet. Endpoint security acts as a barrier to bad actors.

Can I replace my current antivirus software? Yes, but we recommend speaking with the Malwarebytes team to determine the best course of action. Log into [Coalition Control](https://control.coalitioninc.com) and select Malwarebytes to contact a representative.

Will policyholders receive a discount on their insurance?

Coalition evaluates all technical signals in measuring risk and we recommend security when connecting to company assets remotely. We strongly recommend endpoint security for all of our policyholders to reduce the likelihood of a claim.

About Coalition

Coalition is the leading provider of cyber insurance and security, combining comprehensive insurance and proactive cybersecurity tools to help businesses manage and mitigate cyber risk.

BEFORE

24/7 security monitoring and alerts

Our team and tools provide 24/7 monitoring and instant alerts to help secure your organization before an incident occurs. Access our technology and partner ecosystem inside Coalition Control.

- Identify vulnerabilities**
 Receive a complimentary Coalition Risk Assessment (CRA) that details your organization's cyber risk profile.
- 24/7 security monitoring and alerts (\$10,000+ value)**
 Coalition Control notifies you of vulnerabilities in your public infrastructure. We provide automated scanning & monitoring to identify vulnerabilities like outdated software, missing patches, and insecure configurations.

\$10,000+

Value of the Coalition security services included with your insurance policy

15

Free licenses for security awareness training (additional licenses available for a discount)

DURING

Immediate response during security incidents

Get help immediately from our dedicated in-house Coalition Incident Response (CIR) and Claims teams.

- Coalition Incident Response**
 Our in-house staff of incident responders, forensic specialists, and security engineers respond in minutes, not days, to help you recover from network intrusions, ransomware, and business interruptions. 45% of incidents are handled by the CIR with no cost to the insured.
- Coalition Claims Team**
 Expert claims team includes privacy & data breach attorneys who help you navigate the recovery process — including clawing back lost funds, managing vendors and law enforcement, and ensuring you receive funds quickly.
