

FROZEN PAINT

You will need

- Paint
- Dish Soap
- Ice Cube Tray
- Popsicle Stick

How to make frozen paint

1. Mix the paint! Each mixture of paint will be $\frac{1}{4}$ paint, $\frac{1}{4}$ dish soap and $\frac{1}{2}$ water. An easy way of doing this is mixing each colour in the individual sections of the ice cube tray
2. Cut your popsicle sticks in half and place them into each ice cube
3. Place your ice cube tray in the freezer and leave it overnight

Create with your frozen paint!

Take your frozen paint out of the freezer and let it melt a little bit! It'll then start to leave a trail of frozen colours over your paper or concrete surfaces allowing tamariki to create their own art.
