[FBL-33950] Make doctor identifiers (licences) easier to record and use

Feature: A new Licence Type has been introduced to help identify doctor licences and which regulatory body issued them.

- All licences will appear in a new Licences tab on the Doctor Card and the Licence types are associated with the doctor's designation and primary province.
- A doctor can now have unlimited licences defined but duplicates by licence type are not allowed.
- Doctor Licences are now sorted in a priority order which can be adjusted by the user. The top priority licence will appear in the General tab of the Doctor Card and considered the primary licence.
- Changing the designation will result in recalculating the licence type of all licences matching the designation.
- Changing the primary province will result in recalculating the licence type of all licences matching the province.

[FBL-36660] Tall Man and Pronunciation now available

Feature: Tall Man and Pronunciation is now available in drug names. Drug name options can now be configured for Nursing Homes, existing options for Labels, Prescriptions, Drugs, Patients, and Reports. The options vary and can be limited for the first drug line.

Reports, Labels and Hardcopies

[FBL-20685] Financial Reports Permission has been removed from several AR Reports

Feature: View Financial Reports permission no longer needs to be checked to allow a user to generate the following AR Reports.

- AR Credit Note Report
- AR Adjustments Audit Report
- AR Activity Report
- AR Invoice Report
- AR Summary Report
- AR Statement Report

[KRL-118] ATS Healthcare - Custom Delivery Report

Feature: A new chargeable report has been added to the Delivery Module that integrates with ATS Healthcare Delivery.

A sample of the mock-up report:

[KRL-269] - Adding Agent to Influenza Immunization consent form in paper mode

Feature: The 'Agent' has been added to the Immunization Consent form in paper mode.

CONSENT GIVEN BY PATIENT **AGENT**

I, the undersigned client, parent or guardian, have read or had explained to me information about the flu shot as outlined on the Fact Sheet. I have had a chance to ask questions, and answers were given to my satisfaction. I understand the risks and benefits of receiving the flu shot. I agree to wait in the pharmacy for 15 minutes (or time recommended by the pharmacist) after getting the flu shot.

I am aware that it is possible (yet rare) to have an extreme allergic reaction to any component of the vaccine. Some serious reactions called "anaphylaxis" can be life-threatening and is a medical emergency. If I experience such a reaction following vaccination, I am aware that it may require the administration of epinephrine, diphenhydramine, beta-agonists, and/or antihistamines to try to treat this reaction and that 9-1-1 will be called to provide additional assistance to the immunizer. The symptoms of an anaphylactic reaction may include hives, difficulty breathing, swelling of the tongue, throat, and/or lips.

In the event of anaphylaxis, I will receive a copy of this form containing information on emergency treatments that I had received, or a copy will be provided to my agent or EMS paramedics.

I confirm that I want to receive the seasonal influenza vaccine Or I confirm that I want my child to receive the seasonal influenza vaccine

If your child is less than 9 years of age, and getting the influenza vaccine for the first time, your child will need 2 doses of vaccine this season. They are given at least 4 weeks apart.

Patient Agent Name (& Relationship) Test, Angelica	Patient Agent Signature	Date Signed 21-Oct-2019
--	-------------------------	-----------------------------------

PHARMACIST DECLARATION I confirm the above named patient is capable of providing consent for seasonal influenza vaccine and that the seasonal influenza vaccine should be given to patient.

Pharmacist Christina Cheung (20000)	Pharmacist Signature	Date Signed 21-Oct-2019
---	----------------------	-----------------------------------
