

Your **evolution.** Our **expertise.**

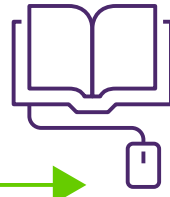

Get smooth EMR data conversion from TELUS Health.

We know how critical your data is in providing care to your patients. That's why our experienced EMR team analyzes and migrates your clinical data to ensure information is converted accurately and completely. We support you before, during and after implementation to help you get the most out of your new TELUS EMR.

Get support from a dedicated project manager.

Your project manager is your single point-of-contact from contract signing to EMR launch.

Receive a tailored training plan.

Our learning specialist team develops a custom training plan designed to meet your workflow and clinic needs.

Work with a clinic data specialist.

A data specialist reviews your clinical workflows to support the mapping of your data to your new EMR.

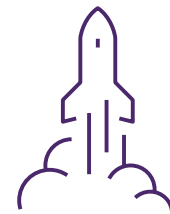

Test and approve results.

Together, we review your migrated EMR data in a test environment, giving you the opportunity to make sure that we've got it right before any your data is moved.

Minimize downtime.

We minimize your downtime between EMRs by working with your clinic's schedule to ensure the least impact on your operations.

Start using your EMR.

Your clinic data is pushed live and you are now ready to start using your new TELUS Health EMR.

transitioned

“ We were well supported through a smooth transition. Now all our doctors are on the same EMR, which makes it easier to view patient charts when in a crunch. Overall our migration experience went well with excellent support from the PS Suite EMR team. ”

-Vincent della Zazzera, MD, FRCSC, OBS/GYN Ottawa, ON – PS Suite user
