Kroll **Online appointment booking.**

Online appointment booking is a Kroll™-integrated service that allows your patients to conveniently book and manage their appointments online for your pharmacy services. It helps reduce the volume of incoming calls and administrative burden, so you and your team can focus on the needs of your patients.

Here's how your staff and patients can benefit from this service:

Intuitive patient facing portal lets patients easily book and manage their appointments online and respond to pre-screening questionnaires.

Integrated appointment manager allows you to define appointments and bulk create and publish slots directly in the Kroll calendar.

Enhanced immunization module lets patients book their own vaccine appointments and respond to pre-screening questionnaires for influenza, non-influenza and COVID-19 vaccines.

Enhance pharmacy operations.

Manage appointments with ease.

- Kroll-integrated appointment manager lets you define times, days, duration and available services, like vaccinations
- Bulk create and publish appointment slots to your choice of Kroll calendars

Enable online appointment booking.

- Patients book and manage their own appointments online - even if they're not registered in Kroll
- Appointment notifications are sent by SMS or email
- Send patients pre-screening questionnaires and record response into the patient profile

Facilitate patient vaccinations.

- Immunization module supports influenza and non-influenza vaccines, and is updated to include COVID-19 vaccines
- Includes vaccine schedules and pre-screening questionnaires
- Data is recorded directly in patient profile (electronic immunization module only)
