

Network-to-Network Interface Disclosure

December 19, 1997
No. SIA-1g

Provincial and Enhanced 9-1-1 Service – BC TEL

Stentor, on behalf of BC TEL, announces the planned offering of interconnection between Competitive Local Exchange Carriers (CLECs) and the BC TEL Provincial and Enhanced 9-1-1 Service Network for the purpose of providing 9-1-1 service to the CLECs' end customers. Interconnection arrangements are expected to become available by IQ98.

Interconnection is via dedicated trunk side connections to BC TEL's Voice Network to facilitate transport of 9-1-1 calls from the CLECs end customers through BC TEL's voice network to the appropriate 9-1-1 Service Bureau, as well as via data connections to facilitate the updating of BC TEL's 9-1-1 Management System with the pertinent CLEC end customers' calling number and location information.

Compatibility Impact:
None expected.

Documentation:
The interface specifications are contained in Stentor document ID-0036, Provincial and Enhanced 9-1-1 Service, Network-to-Network Interfaces between Competitive Local Exchange Carriers and the BC TEL Network, dated December 1997. Hard copies of ID-0036 can be obtained for \$65.00 each. The document can also be downloaded from the web at <http://www.stentor.ca/disclosure> at a reduced price. Please note that prices are subject to change without notice.

Hard copies of the documents can be obtained from:
