

Get the speed and security your data deserves with TELUS Wavelength.

Need to keep up with the ever-increasing demands of your business strategy?

It's time to upgrade your network to Wavelength, the high bandwidth, low-latency service that equips your business with the right balance of **speed**, **security** and **cost efficiency**.

For organizations that need to transfer large data files, Wavelength provides fast and consistent network speeds with a secure connection – at a lower cost per bit than IP services.

Plus, this point-to-point service not only supports today's voice, data and video applications, but is flexible enough to accommodate future applications as your business needs evolve.

Wavelength runs on our world-class national fibre optic network.

 **TELUS**® Business

Keep up with the security demands of your data.

Now you can enjoy peace of mind across your organization's entire network, as Wavelength ensures the secure delivery of sensitive data between your organization's locations, Canada-wide.

Get bandwidth speeds of up to 100 Gbps.

Wavelength scales with your high bandwidth demands and with the lowest possible latency, so your organization can transfer large files with ease

Enjoy a fully customizable service.

Wavelength is designed to meet the unique needs of your organization, as it can be custom configured based on bandwidth and your protection requirements.

Provide your organization with cost efficiencies.

Wavelength can offer you greater cost efficiencies than other traditional network solutions, as it's a scalable service that doesn't require a large upfront investment. Plus, it can be bundled with other TELUS Business services to increase those cost efficiencies even further.

Benefit from Wavelength today:

- **Secure:** Private, dedicated data transfer
- **Scalable:** Bandwidths of 1, 10, or 100 Gbps
- **Agile:** Near real-time response
- **Fast:** Low latency performance
- **Stable:** SLA guarantees
- **Dependable:** 24/7 dedicated support
