FUTURE

Modern luxurious schemes to energise your home

bathrooms

Class act

Add a little character to your bathroom with vintage-style details. It might be an antique cabinet repurposed as a vanity unit or even new products that give a nod to period bathrooms – such as this traditional-style towel rail from Drummonds, which takes centre stage in front of a dark navy backdrop.

Do the double

The luxurious addition of a Jack and Jill vanity unit can work well, even in a smaller space. 'We wanted this en suite to have an art deco, luxe feel,' says interior designer Laura Stephens. A double basin sits on a brass frame, which allows the decorative flooring and walls to be seen, providing a sense of space.
