KNOTT 3.5 Ton TANDEM Trailer Braking System

- Robust braking solution
- Widely used in Europe and is designed and manufactured in Germany.

Simple & Cost Effective:

This system is fully approved by the NZTA and is an excellent, simple, cost effective alternative to the commonly used electronic over hydraulic braking system for 3.5 ton trailers. The simplicity of the system sees no requirement for in-cab controllers, electrics or separate battery to operate it.

The heavy duty cast coupling has a gas strut attached to a lug which is in turn attached to a M10 threaded rod. This threaded rod is attached to a balance bar assembly on the front axle which the brake cables are attached to. When the tow vehicle brakes, a proportionate amount of the braking energy is transferred through the coupling gas strut which pulls the threaded rod forward engaging the drum brakes.

**Kit Includes:**

- 1x Coupler KFG35-3500kg (cast) with 1-7/8" head
- 1x Cable bracket
- 1x Balance bar assembly
- 2x 900kg hub & stub (left) 5 studs on 114.3mm PCD
- 2x 900kg hub & stub (right) 5 studs on 4.5" PCD
- 20x Wheel bolts
- 2x Brake cable - front
- 2x Brake cable - rear
- 5x Wheels - 14" 5 Stud x 4.5" PCD with 35mm offset, 195 x 14" tyres

*Excludes M10 threaded rod
