

## HINZE DAM STAGE 3 DRILLING & GROUTING IN EXISTING DAM SPILLWAY

QUEENSLAND, AUSTRALIA

## DRILLING AND GROUTING ANCHOR BARS IN THE EXISTING DAM SPILLWAY

### PROJECT OVERVIEW:

Hinze Dam Alliance identified Geovert's capabilities in difficult access drilling, and awarded Geovert a contract for drilling and grouting of anchor bars in the existing dam spillway.

### SOLUTION:

As part of the raising of the existing dam, Geovert worked up to 25m above the base of the spillway to install anchors for new spillway lining walls. Geovert also installed high strength post-tensioned anchors through the existing dam structure to tie into existing rock to provide a tie-in for the new crest.

### Services related to this project

Drilling  
Injection Grouting
