

MILLAA MILLAA-MALANDA ROAD SLOPE STABILISATION SOIL NAIL SLOPE STABILISATION WITH ACTIVE MESH

QUEENSLAND, AUSTRALIA

RECONSTRUCTION WORK DELIVERED UNDER THE NATURAL DISASTER RELIEF AND RECOVERY ARRANGEMENTS

PROJECT OVERVIEW:

Operation Queensland is the largest reconstruction effort in Queensland's history—rebuilding communities, fixing infrastructure and restoring regional economies.

The Department of Transport and Main Roads works closely with the community, local government, government agencies and industry to reopen as much of the damaged transport network as quickly as possible.

As part of this reconstruction Geovert has been involved in stabilising road cuttings and slopes protecting them from further damage caused by adverse weather events.

Construction works strictly built to Queensland Mainroads specification and testing requirements.

Services related to this project

Active Slope Stabilisation
Soil Nailing
Drainage Drilling
Shotcrete
Scaling
