How to login or register with EPND and add your studies to the EPND Catalogue
Before you start, have the following prepared:

- A desktop computer to access the EPND Catalogue.
- To register or login with EPND, a smart phone with an authenticator app downloaded to login with two-factor authentication. To download an authenticator app, search the app store on your phone and download either Microsoft Authenticator, FreeOT, or Google Authenticator.
- For submitting study information: your study name, description, use conditions, investigators, and details about your institution and study. See an example.
- A designated person to facilitate study access requests.

Start here if you have an EPND login

Go to discover.epnd.org

Start here to register with EPND

Go to discover.epnd.org

Hover your mouse over **My Dashboard** in the navigation and click **Login.**
Hover your mouse over **My Dashboard** in the navigation and click **Register.**

Submit a form with your contact information, this from should take 3-minutes to fill out.

After providing login information, you will be asked to do two-factor authentication using an authenticator app.

After logging in, you will arrive back on the EPND Catalogue page.

You're now ready to add a study!

Hover your mouse over **My Dashboard** in the navigation and click **Study Administration.**

Once in **Study Administration,** click **Add Study** and submit a form with study information for EPND approval, this form should take 10-minutes to fill out.

Incomplete forms can be saved for completion at a later date by clicking on **Save as Draft.**

Administration

The administration dashboard displays essential information about studies, datasets and biosample collections intended for the catalogue. Click the "Manage" button to update information about the study components, and handle change requests under the "Unpublished Changes" section.

Add Study

How to best describe your study. See an example.

Title: The official title of your study.

Description: Provide disease areas, stages and their number of participants, clinical outcomes, and measures studied.

Use conditions: Describe conditions of accessing and using study information.

Study approval takes an average of 3 business days and you will be notified of the results via the email associated with your account.

Your submitted studies and their approval status will appear in **Study Administration.**

Your approved study will appear in **Published Studies, Datasets and Biosample Collections.**

Manage, update, and see requests for study information in **Study Administration.**

Do you have dataset or biosample collection information to add to your studies?
