

Cloudflare for Public Sector

CONNECT

Power everything with an intelligent connectivity cloud

Protect. Connect. Accelerate.

At Cloudflare, we're your mission partner for today and tomorrow. To explain how and why, we chose three simple words – Protect, Connect, Accelerate.

Let's highlight "Connect" to show how we can take your mission everywhere it needs to go.

Work and learn from anywhere

Remote work and distance learning depend on fast and reliable network connectivity. But if you're suffering from spotty network performance, or still using traditional Virtual Private Networks (VPNs), you're probably impeding productivity, collaboration, or learning outcomes.

Cloudflare's [global network](#) brings high-performance connectivity to wherever your users are. With data centers in 330 cities across more than 120 countries, we are within 50 ms of almost every Internet user. And [Cloudflare Access](#), our modern Zero Trust Network Access (ZTNA) solution, delivers far better security and performance for remote users than legacy VPNs.

Optimize network and application performance

Outdated network architectures that rely on [MPLS circuits](#) or [SD-WAN](#) are expensive, but they can also cause bandwidth constraints, bottlenecks, inefficient traffic backhauls ("hair pinning") and poor website responsiveness.

Cloudflare's [Network Services](#) dramatically improve network performance and response times when you connect to our global network. And our [Application Services](#) improve web performance, serving tens of millions of HTTP requests per second on average. That means superior performance for all users: your workforce, suppliers, mission partners, and the people you serve.

Enhance service resilience

As public sector organizations increasingly rely on the Internet, service availability and operational resilience are absolutely critical. However, cyber attacks, traffic spikes, and outages can impact your online services, so you need network services you can trust to deliver – always.

At Cloudflare, we're committed to service excellence. In our [Service Level Agreement \(SLA\)](#) we promise to serve your content 100% of the time without qualification. Our dedication to service excellence is a key reason why [CISA selected Cloudflare](#) to run DNS services for the .gov top level domain.

"[VPN] traffic lands at the corporate internet edge and has to be validated and routed back to the internet to access the cloud resources. This phenomenon is called "hair-pinning," results in extra distance, increases network latency, and has the potential to cause traffic bottlenecks."

– Guide to a Secure Enterprise Network Landscape (NIST SP 800-215)

The Cloudflare advantage over any other approach

Cloudflare Global Network

As one of the most interconnected networks, Cloudflare delivers local capabilities with global scale

32

FedRAMP data centers across 11 metro areas

330

cities in 120+ countries, including mainland China

12,500+

networks directly connect to Cloudflare, including every major ISP, cloud provider, and enterprise

296 Tbps

global network edge capacity, consisting of transit connections, peering and private network interconnects

~50 ms

from 95% of the world's Internet-connected population

150+

AI inference locations powered by GPUs

Cloudflare for Government

Our unique approach to FedRAMP authorized capabilities gives you maximum capability— everywhere

Every service at every location

No special FedRAMP enclaves that limits or delays the innovative capabilities you need

Single platform capabilities

Application and network services delivered consistently from our unified platform

Direct network connections

Connect your data centers directly to Cloudflare's network for maximum performance and security

CISA Secure by Design pledge

Cloudflare signed CISA's pledge as part of our commitment to industry-leading solutions that are secure by design and by default

Cloudflare Universal Advantages

As the world's first connectivity cloud, Cloudflare delivers differentiated capabilities that have earned the trust of millions of customers.

Significant Cost Savings

Vendor consolidation
CapEx offload
Administration

Threat Intelligence

Extensive visibility
Threat models
Intercepted attacks

Data Localization

Data restriction
Regulatory compliance
End user privacy

Simplicity and Ease of Use

Dashboard
Integrations
Automation

Let Cloudflare help you accomplish your top priorities

Every public sector organization is under pressure to modernize cyber security architectures, deliver trustworthy digital services, eliminate technology debt, and comply with multiple regulatory mandates. At Cloudflare, we're your trusted partner to help you accomplish all of your top priorities.

Protect

Mitigate risk with advanced security capabilities

- ⚡ Mature Zero Trust architectures
- ⚡ Resilient public-facing applications
- ⚡ Proactive detection and response

Connect

Power everything with an intelligent connectivity cloud

- ⚡ Work and learn from anywhere
- ⚡ Optimize network and app performance
- ⚡ Enhance service resilience

Accelerate

Modernize faster and increase operational efficiency

- ⚡ Eradicate legacy technology
- ⚡ Reduce costs and complexity
- ⚡ Achieve continuous compliance

Are you ready to protect, connect, and accelerate your public sector mission?
