Active protection and support before, during, and after digital incidents

BEFORE

Active assessments, monitoring, and alerts

Coalition Control is an automated scanning and alerting service — free to all Coalition policyholders – that assesses your organization's digital risks from cybersecurity and executive exposures and shows you how to fix them.

Active risk assessment — Access a near real-time snapshot of your organization's digital risks, using powerful data and scanning technologies to identify potential exposures that most traditional insurers never see.

Third-party risk management — Monitor third-party vendors, suppliers, and partners on your Watchlist and receive alerts on their critical vulnerabilities.

Security savings — Save on leading cybersecurity solutions like Endpoint Detection Response (EDR), Multi Factor Authentication (MFA) and education from SentinelOne, Okta, Malwarebytes, Curricula, and more.

DURING

Active response during security incidents

Get continuous scanning and monitoring of digital assets and other risk factors associated with cyber and executive risks — providing personalized alerts for critical issues and personalized security recommendations so brokers and policyholders know when new risks arise.

Security support center — Coalition is the only cyber insurance provider with dedicated, in-house support, incident response, and cyber claims teams – to help policyholders understand their cyber vulnerabilities and remediation options when responding to critical alerts.

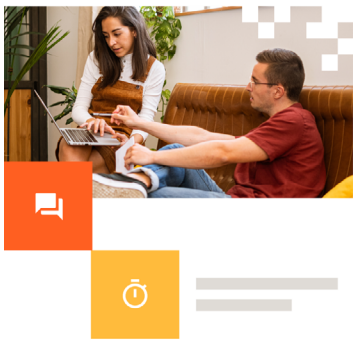

Coalition Incident Response (CIR) team — Our in-house staff of incident responders, forensic specialists, and security engineers respond in minutes, not days, to help accelerate your claims response. From ransomware to reputational impacts — our Active Response solution helps remediate cyber and executive risks issues to help your business recover quickly if an incident occurs.

Coalition claims — Our claims team includes privacy attorneys and legal experts who can help you navigate the recovery process — including clawing back lost funds, managing vendors and law enforcement, and ensuring your claim is managed efficiently.

AFTER

Comprehensive insurance to help you recover quickly

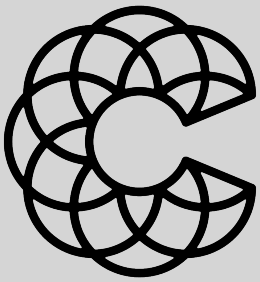

Coalition's comprehensive insurance policy will help your organization recover financially and operationally so you can get back to business.

Protect the value of your entire business — We don't just protect your network. Our insurance policies protect your entire business with coverage for financial losses and liability arising from cyber incidents or technology failures. Coverage also can include any privacy violations and decisions made by company executives.

Insurance you can depend on — Coalition's insurance products are offered with the financial security of many of the world's leading reinsurers.

Please read your bound policy for all purchased coverages, terms, and conditions.
