

CAPITAL MARKETS RISK MITIGATION FRAMEWORK (RMF) RISK ASSESSMENT PARTNER: METRIKA

WHAT IS THE RMF?

The Capital Markets RMF is an industry-led framework designed to help financial institutions identify, assess, and manage the non-financial risks associated with using public permissionless blockchain infrastructures

INTRODUCING RAPS

The Risk Assessment Partners (RAPs) are the industry leaders and solutions builders who have designed solutions for practical implementation by financial institutions

ABOUT METRIKA

Metrika is an enterprise digital asset risk management platform designed for regulated financial institutions. Its proprietary Key Risk Indicator (KRI) library translates the complexity of blockchain networks, tokenized assets, and smart contracts into standardized, actionable risk intelligence to support institutional due diligence, monitoring, and governance. Clients include global banks, asset managers, and rating agencies

THE SOLUTION

REAL-TIME DIGITAL ASSET RISK MONITORING

Metrika's KRI library covers more than 2,700 indicators across the full digital asset risk landscape, giving institutions a single, continuous view of infrastructure risk. The platform is SOC 2 Type II compliant and available via API, with integrations into enterprise GRC systems

THE PLATFORM ENABLES INSTITUTIONS TO:

- Conduct structured, audit-ready network due diligence
- Monitor blockchain infrastructure in real time
- Receive automated alerts when predefined risk thresholds are breached
- Produce regulatory-grade reporting for compliance, audit, and governance obligations

ALIGNMENT WITH THE RMF

Metrika operationalizes RMF guidance across the digital asset risk lifecycle, supporting due diligence, monitoring, reporting, and mitigation. Coverage spans blockchain networks, tokenized RWAs, and DeFi applications

By embedding these signals into enterprise workflows and GRC platforms, Metrika enables financial institutions to implement RMF guidance directly within operational risk management systems

INSTITUTIONS CAN MONITOR RISKS SUCH AS:

- Network & Consensus
- Smart Contract
- Staking & DeFi
- Reputational & Compliance
- Centralization
- Asset & Market Stability
