# A letter from Arry Yu

Executive Director  
U. S. Blockchain Coalition  
& Head of Strategy (US),  
GBBC

Dear Web3 Enthusiast,

The U.S. Blockchain Coalition (USBC), the only multistate focused blockchain organization in the US, is excited to unveil our updated State of Web3 report, now with data from 2007-2023, a significant milestone in our industry's journey. We are deeply grateful to all the individuals and organizations who have supported our progress.

Our industry is both vibrant and controversial, often muddled by misinterpreted terms and conflicting narratives. We needed change. In 2021, Lee Bratcher of the Texas Blockchain Council and I, Chair of the Cascadia Blockchain Council (representing companies in Washington, Oregon, Idaho and British Columbia), founded the USBC to bring clarity and unity to the blockchain space. The USBC was born with the support of the largest technology industry association in North America, the Washington Technology Industry Association (WTIA, to connect blockchain with industries that can best apply these technologies. Last year late in 2023, the USBC merged with the GBBC to grow even more to where it is today.

This report, developed closely with our research partner Moonbeam, provides a detailed overview of the Web3 landscape backed by solid data and analysis. It serves as a baseline for future growth, highlighting job opportunities and economic impacts for policymakers and communities across the U.S.

We encourage you to use this report to create data-driven strategies, identify needs, and build partnerships across sectors. Please ensure to properly cite the U.S. Blockchain Coalition (USBC) and this report when referencing or utilizing any part of its contents. Proper attribution helps maintain the integrity of the information and supports ongoing efforts to advance blockchain technology. Let's use this as a foundation to shape a brighter future for Web3, tracking our progress annually and supporting each other to advance the industry.

Warm Regards,

*Arry Yu*

Arry Yu  
Executive Director, U.S. Blockchain Coalition (USBC)  
Head of Strategy (US), Global Blockchain Business Council (GBBC)  
Chair, WTIA Cascadia Blockchain Council

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

# Web3 and Technology Industry Collaboration Underwritten by:

	<p>The U.S. Blockchain Coalition (USBC) is a multistate federation comprised of state blockchain associations, organizations and influential individuals across the country cooperating to ensure the United States is a leader in blockchain, Web3, and distributed ledger technologies (DLT).</p>
	<p>Global Blockchain Business Council (GBBC) is the largest leading industry association for the blockchain technology and digital assets community. Launched in Davos in 2017, GBBC is a Swiss-based non-profit, with more than <b>500</b> institutional members, and 301 Ambassadors across <b>117</b> jurisdictions and disciplines. The organization is dedicated to furthering adoption of blockchain technology by convening regulators, business leaders, and global changemakers to foster collaboration and advance dialogue to create more secure, equitable, and functional societies.</p>
	<p>Digital Currency Group's mission is to accelerate the development of a better financial system. We do this by building and supporting blockchain and digital currency companies using our network, insights, and access to capital. DCG has been the most active investor in the digital currency industry, with investments in over 200 companies in 35 different countries.</p>
	<p>Block (NYSE: SQ) is a global technology company with a focus on financial services. Made up of Square, Cash App, Spiral, TIDAL, and TBD54566975, we build tools to help more people access the economy. TBD54566975 is building an open developer platform to make it easier to access Bitcoin and other blockchain technologies without having to go through an institution.</p>
	<p>Coinbase (NASDAQ: COIN) believes The future of money is here. They operate a leading cryptocurrency exchange platform where people and businesses to buy, sell, and manage crypto.</p>
	<p>The Washington Technology Industry Association (WTIA) is a coalition of like-minded innovators and problem solvers who believe in harnessing the transformative potential of technology and our collective strengths to build a better, brighter world for everyone.</p>

This report was produced through a partnership across the Web3 industry including:

# Table of Contents

This report provides an assessment of the economic activity, impact, and innovation potential of Web3 technology across the 50 U.S. States, the District of Columbia, and Puerto Rico.

# The State of Web3

## Executive Summary

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

©2024 GBBC U.S. Blockchain Coalition. All rights reserved. This report, including its content, design, and intellectual property, is protected by copyright laws. No part of this report may be reproduced, distributed, or transmitted in any form or by any means, without the prior permission except in the case of brief quotations embodied in critical reviews and certain other non-commercial uses permitted by copyright law. For permissions and inquiries, please contact Arry Yu ([arry.yu@gbbccouncil.org](mailto:arry.yu@gbbccouncil.org)).

**MOONBEAM**

# Our analysis reveals several outliers in the Web3 space.

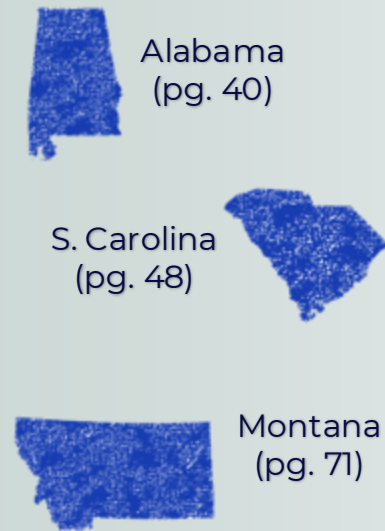

## Most active

## High activity, few international investors

## Significant government investment

## Unexpectedly high per-capita investment

## Notable single industry players

These standout states are examined in further detail in their respective regions for job activity & federal funding.

# Enterprise Web3 applications are driving real economic activity despite fluctuations and hype of digital assets in recent years.

## By the Numbers:

10,500+ Startups

13,400+ Investors

7,500+ Deals

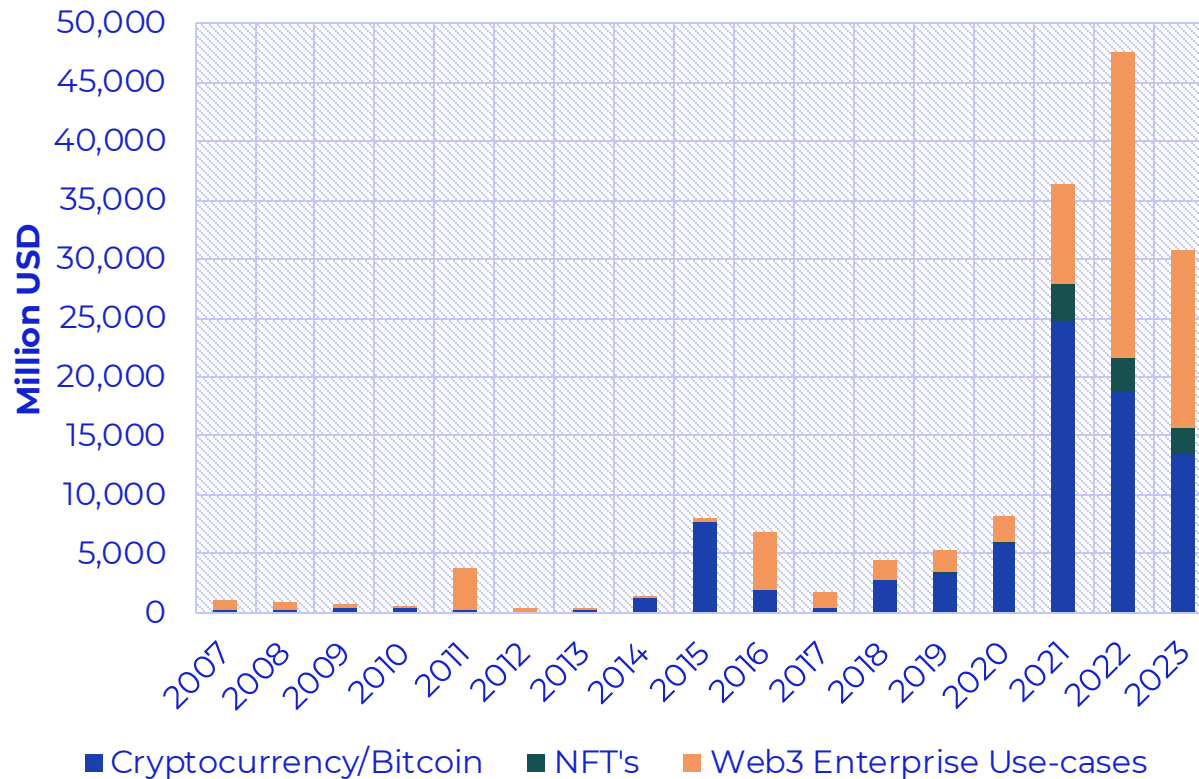

\$53B+ VC

\$47B+ M&A

\$4B+ IPO

Source: Moonbeam Exchange's data science platform which includes 100+ data feeds including Crunchbase and Pitchbook. Date Range: 2008-2023

## Capital Invested by Year

## The Bottom Line:

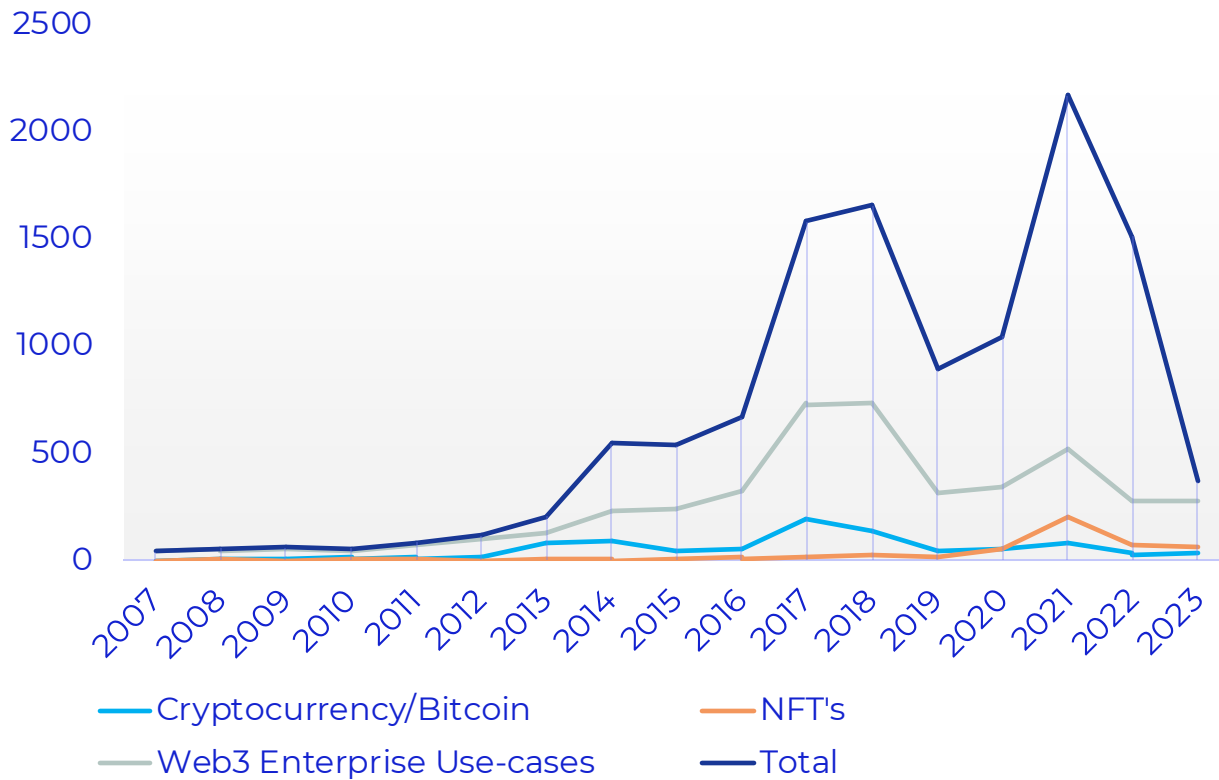

The digital asset hype, as represented by venture capital investment, started in 2014 and peaked in 2021, with a significant drop in 2022 and 2023. However, since 2016 there has been steady growth in investment in enterprise applications of Web3 technologies until recent booms in 2021 and 2022.

Web3 accounts for 7% of all US unicorns since 2000.

# Enterprise applications of Web3 continue to gain traction, bolstered by cybersecurity, smart contracts, and supply chain applications.

## Web3 Startups Founded per Year

In recent years, an average of 400+ Web3 startups formed per year, with peak activity in 2017 (1,580), 2018 (1,653), and 2021 (2,168).

Promising enterprise applications of Web3 technology include:

**Smart Contracts** – Blockchain allows for secure, self-executing contracts called smart contracts. These automate agreements bring transparency, efficiency, and trust to transactions.

**Supply Chains** – Blockchain streamlines supply chains, ensuring transparency, traceability, and efficiency while reducing fraud and errors.

- Agriculture – tracks agricultural products, verifying origin, quality, and certifications, fostering trust and fair trade.
- Pharmaceutical – tracks pharmaceuticals, ensuring authenticity, preventing counterfeit drugs, and enhancing drug safety.
- Consumer Goods – ensures transparency in CPG supply chains, from manufacturing to retail, promoting ethical sourcing and product authenticity.
- Security – fortifies security & defense operations, enhancing supply chain integrity, secure communication, and tamper-resistant records.

**Health** – Web3 technology empowers secure health record management, enabling patient control, interoperability, and privacy-enhancing features for improved healthcare outcomes.

**Cybersecurity** – Web3 technology strengthens cybersecurity defenses with decentralized threat detection, secure data handling, and resilient cryptographic mechanisms.

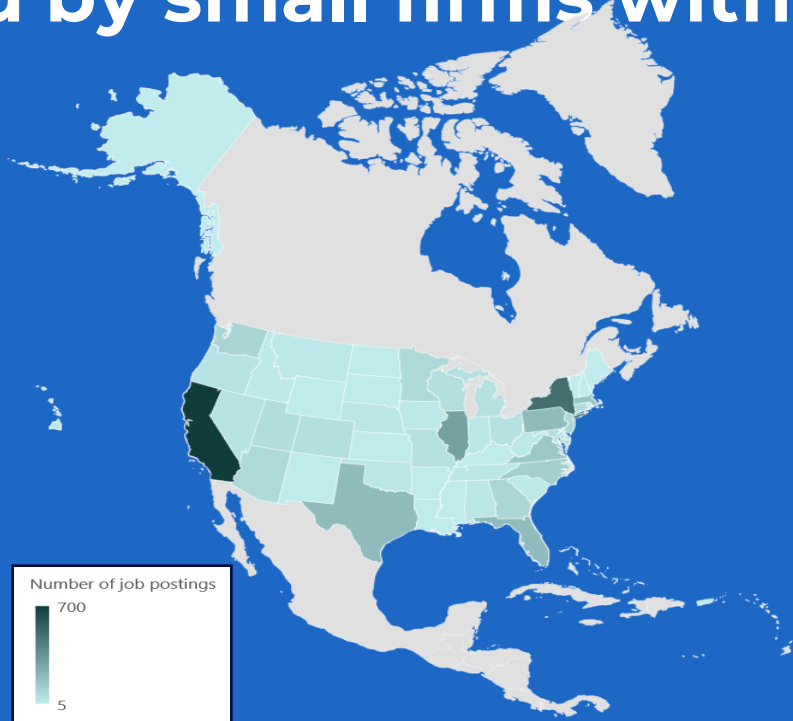

# Web3 companies account for hundreds of thousands of jobs nationwide, led by small firms with under 50 employees.

## Select incumbents hiring for Web3-related positions\*

\* Data from 2023

### The Bottom Line:

Job numbers are exceedingly error prone, with no reporting standards, fluctuations in business performance, and changing job descriptions. Despite the lack of normalized data, Moonbeam estimates 200,000+ jobs nationally based on startup activity, investments, and incumbent activity.

## Web3 Companies by Employee Count

# Over 1/3 of investors in US-based Web3 companies are foreign.

Location of Web3 Investors

- U.S.-based Investors
- International Investors

- Top 5 states for total capital invested (CA, NY, TX, FL, MA) have on average 28% international investors.
- Other states also excel at international investment attraction: DE (38%), WA (36%), PA (36%), NJ (34%), and NV (34%).

## Bottom Line:

With the inherently global nature of Web3 technology, **international investment is critical** to a successful innovation economy. Smaller states, despite having notable companies, fare worse at attracting international investment.

## Where are these international investors based?

Asia (13.2%)

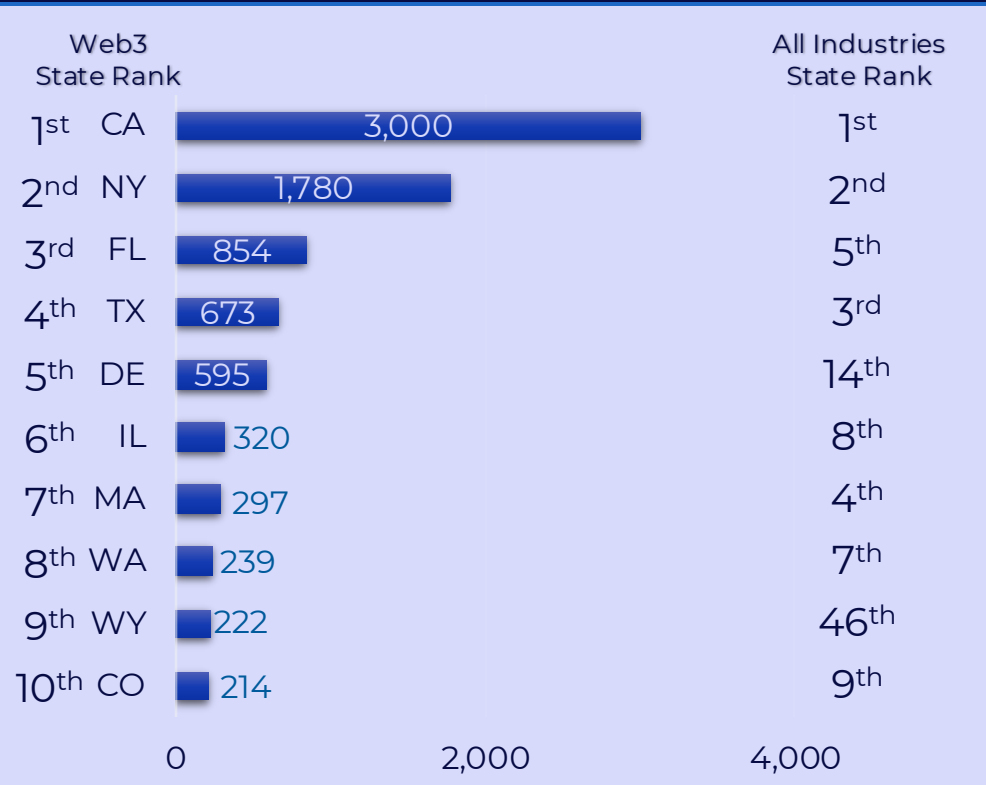

Europe (12.8%)

Other (9.9%)

Singapore (3.5%) | China (2.7%) | Hong Kong (1.7%) | Japan (1.1%) | UK (4.4%) | Switzerland (1.3%) | Germany (1.2%) | Canada (2.8%) | Australia (1.3%) | UAE (1.1%)

# California and New York lead as expected; Florida and Texas emerge as Web3 leaders compared to overall startup activity.

## Count of startups, by state

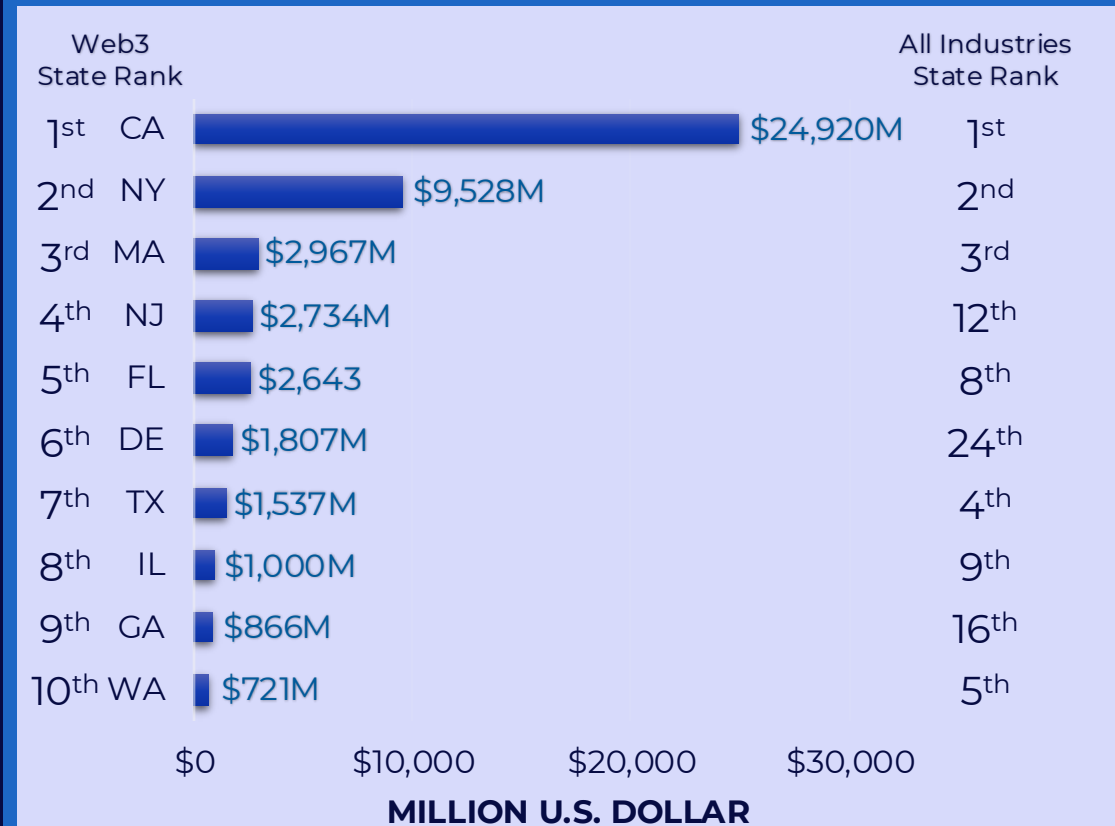

Note: these are total Web3 **startups** by state. The data has not been normalized per capita.

## The Bottom Line:

While startup hubs like California and New York perform well as expected (based on total startup activity), Web3 activity shows emerging leadership from states like Delaware, Georgia, Wyoming, and New Jersey.

Notably, certain states with mid-level startup activity in general over perform in the Web3 economy, e.g. New Jersey, Delaware, and Georgia from VC funding rankings of 12<sup>th</sup>, 14<sup>th</sup>, and 16<sup>th</sup> respectively to Web3 rankings of 4<sup>th</sup>, 6<sup>th</sup>, and 9<sup>th</sup>.

## Billions \$USD invested by VC, by state

MILLION U.S. DOLLAR

# Investment and development activity in Web3 is growing amongst the top incumbents (largest 1000 public companies by total revenue).

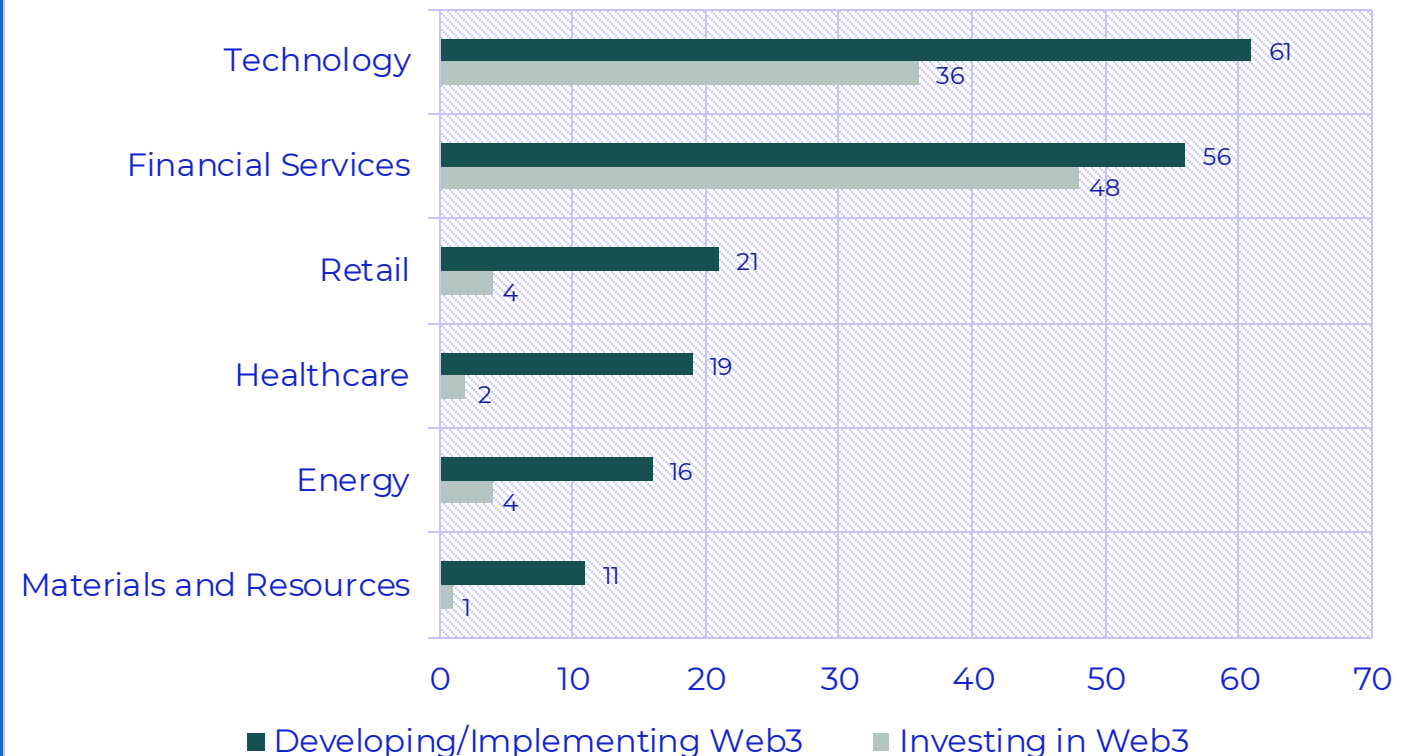

Nationwide, out of a 1000 incumbents, 29.4% are developing/implementing Web3, while 11.7% are actively investing in Web3.

Certain sectors, like Financials, Technology, Retail, Media, and Health Care, seem to be the most active in this sector.

Notable investments of incumbents:

- **JP Morgan Chase** (sector: Financial) - \$268M in digital asset company, blockchain companies, and distributed ledger software companies.
- **Fox** (sector: Media) – \$100M in blockchain network for storage, distribution, and monetization of digital content.
- **Cigna** (sector: Health Care) – joint venture between Aetna, Anthem, Cigna, Cleveland Clinic, Health Care Service Corporation, and IBM to form Avaneer Health.
- **Overstock.com** (sector: Retail) – \$93M in blockchain-based digital asset system, blockchain-based equity trading platform, decentralized transaction platform, among others.

**Incumbents Developing/Implementing or Investing in Web3 technology, by sector.**

# U.S. Government funding remains low but shows significant growth since 2017 with a CAGR of 36.2%.

## The Bottom Line:

Government funding is a growing area of non-dilutive investment for Web3 startups focused on enterprise applications.

Government Funding includes contracts, grants and SBIR/STTRs (Small Business Innovation Research and Small Business Technology Transfer).

Top departments funding Web3 R&D:

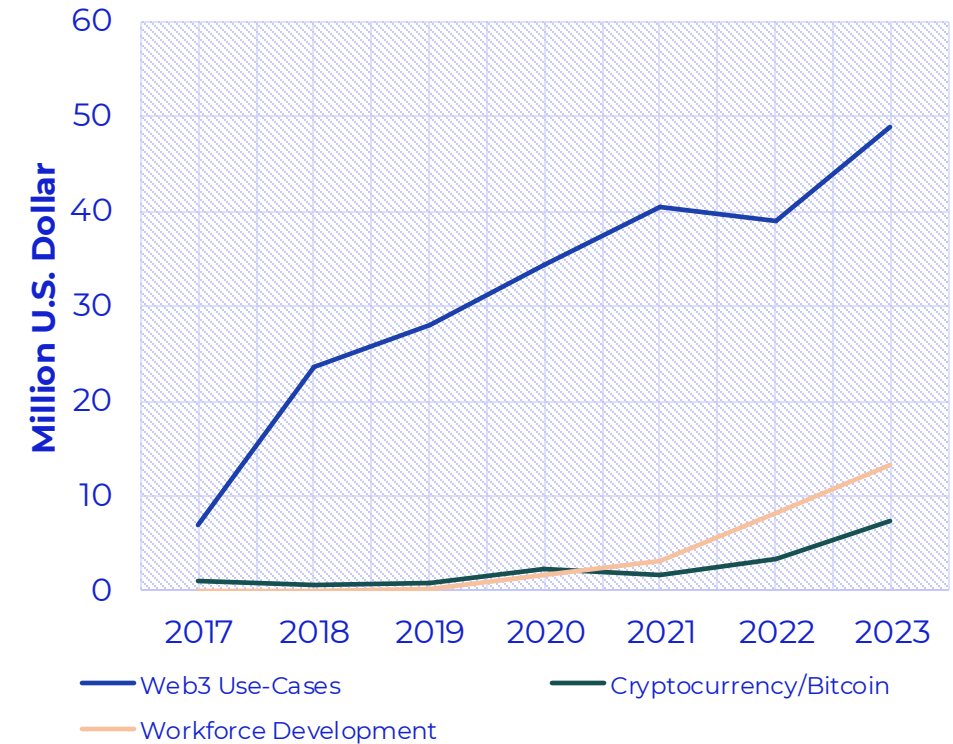

- Natl. Science Foundation (\$83.4M),
- Dept. of Defense (\$75.8M)
- Dept. of Health and Human Services (\$22.2M)

For full details see slide 92.

### Federal funding over time, by type of funding

### Federal funding over time, by focus area

# Summary of Methodology

For a complete review of the methodology and definition of terms, see pages 98-105

## Methodology Overview

The report aims to identify the strengths and opportunities of each state's Web3 ecosystem across five dimensions:

1. Startup activity;
2. Incumbent activity;
3. Investor activity;
4. University research;
5. Government funding.

The report also seeks to highlight best practices and opportunities for collaboration within and across states to foster a thriving Web3 ecosystem to drive economic growth, create jobs, and improve the lives of citizens.

Ultimately, the goal of the report is to provide policymakers, investors, entrepreneurs, and researchers with actionable insights that can inform their decisions and contribute to the continued development and adoption of Web3 in the United States.

A complete description of the methodology and terms used can be found in the Methodology Section of this report.

## Ecosystem Benchmarking Method

This methodology was informed by:

- Daniel Isenberg's "Domains of the Entrepreneurship Ecosystem" model ([link](#));
- "Innovation Ecosystems" by Thomas & Autio ([link](#));
- MIT Sloan Heat Map (Strategically Engaging with Innovation Ecosystems) ([link](#)).

After data was collected, cleaned, and normalized, each feature was ranked individually, and all features within a category were averaged to arrive at a single value between 0 (low) and 10 (high). Moonbeam derived a median of all values within a category to generate an average state, to which all states were compared.

A minimum value of 0.2 (instead of zero) was given to the lowest rank, to account for other sources of data not evaluated in this report (e.g. other incumbents outside the Top 1000 public companies list, government policies, masters and specific courses focusing on blockchain in academia).

## Web3 Defined (full definitions in Methodology Section)

To support this analysis, we targeted several key technology areas related to the advancement of the Web3 technologies and in dustry. Moonbeam built a term adjacency map to connected concepts centralizing around:

- Blockchain
- Decentralized Finance / DeFi
- Management
- Distributed Ledger
- Decentralized Autonomous Organization
- Verifiable Credentials
- Web3
- Cryptocurrency / Bitcoin
- Decentralized Identity
- NFT/NFT Technology/Non-Fungible Tokens
- Digital Asset / Digital Asset
- Stablecoins
- Self-Sovereign Identity
- Token
- Tokenomics
- Tokenmetrics
- Crypto Assets

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

**MOONBEAM**

# While this report focused on five primary dimensions, additional analysis would provide a further insight.

## The scope of this report

This report focused on developing a baseline of activity data comparable across the 52 jurisdictions (50 states plus Puerto Rico and Washington, D.C.) with metrics that could be uniformly quantified with complete datasets. Some metrics were not included due to constraints in data and scope.

Activity Type	Covered	Not Covered
<b>Startup</b>	<ul style="list-style-type: none"> <li>Startup formation and self-reported hiring</li> <li>Disclosed investments (Pitchbook or Crunchbase)</li> </ul>	<ul style="list-style-type: none"> <li>Startup closures, layoffs, or bankruptcy</li> <li>Corporate relocations to other states or countries</li> </ul>
<b>Investment</b>	<ul style="list-style-type: none"> <li>Disclosed venture capital investments</li> </ul>	<ul style="list-style-type: none"> <li>Undisclosed investments</li> </ul>
<b>Incumbent</b>	<ul style="list-style-type: none"> <li>Publicly disclosed initiatives of the U.S. based Top 1000 public companies by total revenue</li> <li>Job postings between Jan-April 2023</li> </ul>	<ul style="list-style-type: none"> <li>Non-U.S.-based companies.</li> <li>Non-Top 1000 companies</li> <li>Incumbent jobs</li> </ul>
<b>Academic</b>	<ul style="list-style-type: none"> <li>Government funded research grants</li> <li>Major research university labs and publications</li> </ul>	<ul style="list-style-type: none"> <li>Specific academics and their citations.</li> <li>Creation of new majors or rate of graduation</li> </ul>
<b>Government</b>	<ul style="list-style-type: none"> <li>Government contracts (FAR and OTA)</li> <li>Government grants (standard, SBIR, STTR)</li> </ul>	<ul style="list-style-type: none"> <li>Classified spending; State spending</li> <li>Regulatory activity and its impact</li> <li>Comparable with international governments</li> </ul>

## Areas for further exploration

Accounting for sector downturns  
(jobs & failed startups)

Influences of Public Policy and  
Regulation

Global Migration of jobs/companies

Academic/Commercialization Pipeline

U.S. ranking compared globally

## Interested in further analysis?

# Web3 State by State: Ecosystem scorecards by region

We align regions with the six regional offices of the US Economic Development Agency.

## Northeast (slides 21-43)

- Connecticut
- Delaware
- District of Columbia
- Maine
- Maryland
- Massachusetts
- New Hampshire
- New Jersey
- New York
- Pennsylvania
- Puerto Rico
- Rhode Island
- Vermont
- Virginia
- West Virginia

## Southeast (slides 44-53)

- Alabama
- Florida
- Georgia

- Kentucky
- Mississippi
- North Carolina
- South Carolina
- Tennessee

## South (slides 54-60)

- Arkansas
- Louisiana
- New Mexico
- Oklahoma
- Texas

## Midwest (slides 61-69)

- Illinois
- Indiana
- Michigan
- Minnesota
- Ohio
- Wisconsin

## Great Plains (slides 70-80)

- Colorado
- Iowa
- Kansas
- Missouri
- Montana
- Nebraska
- North Dakota
- South Dakota
- Utah
- Wyoming

## West (slides 81-91)

- Alaska
- Arizona
- California
- Hawaii
- Idaho
- Nevada
- Oregon
- Washington

# The Northeast

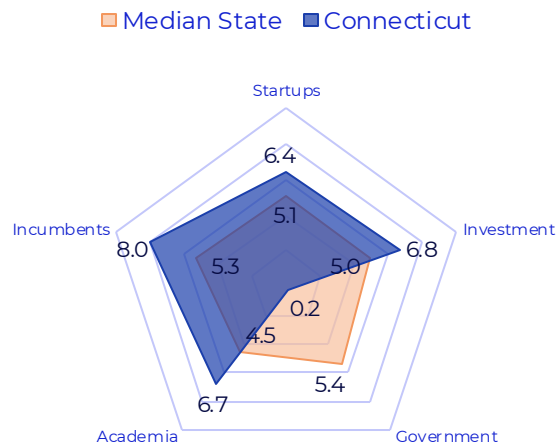

- **Connecticut** has large financial incumbents and notable Web3-related venture capital activity.
- **Delaware** is home to several startups – many of which are only incorporated there.
- **District of Columbia** is very well-rounded and well-positioned with a primary focus in the government sector.
- **Maine** has limited Web3-related activity.
- **Maryland** is leading in the commercialization of government investment in Web3.
- **Massachusetts** excels at attracting government R&D funding and is notably pioneering Web3 in the life sciences / biotech sector.
- **New Hampshire**, despite a nascent Web3 ecosystem, is known as a jurisdiction friendly with international trust laws and family wealth funds.
- **New Jersey** is an active state for Web3, with 100+ startups, 4 exits, and notable pharma incumbent investment.
- **New York** leads corporate investment in Web3 with notable activity in the finance, insurance, and tech sectors.
- **Pennsylvania** demonstrates high efficiency with nearly 9% of their startups achieving an exit to date.
- **Puerto Rico** has seen an upsurge of startup activity in the last three years.
- **Rhode Island**, for a small state, has several incumbents implementing Web3 and is attracting federal R&D.
- **Vermont** is working to build a digital ecosystem in Windsor County.
- **Virginia** has large government contractors that are investing in Web3 applications. Also, there are notable Web3 cybersecurity startups.
- **West Virginia** has limited Web3 activity.

For states that have more activity, additional detail on hiring and federal activity has been added on a second page.

# Connecticut

The state has large financial incumbents and notable Web3-related venture capital activity.

## Ecosystem

## Investment

31 cos. with **\$430M+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Merger & Acquisitions	\$274M
Seed	\$73M
Early-Stage VC	\$69M
Later-Stage VC	\$17M
Angel	\$2M

### Number of Investors by HQ location

Total number of Investors: 226

## Startups

- **80 startups** out of 116 companies.
- 2 IPOs and 7 M&A deals.
- Notable startups:
  - [ParaFi Capital](#) (2018) raised \$30M.
  - [Oasis Pro](#) (2019) raised \$27M.
  - [Hyperlane](#) (2022) raised \$18.5M.
  - [Bastion](#) (2021) raised \$11M (merged with [Aurigamj](#)).
  - [Trident Digital](#) (2023) raised \$8M.

### Company Distribution by Year Founded

## Incumbents

27 Top 1000 public cos. headquartered, of which **10 companies** have Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

### Mining Companies HQ

## Government/Academia

### Focus Areas:

- Secure frameworks that promote scalability and efficiency of blockchain-based resource markets, but generic enough to be used for any service type.
- Define security goals for Public Key Infrastructure (PKI) schemes, present PKI schemes which probably meet these goals, and present practical and efficient implementations of PKI schemes. PKI provides a critical security infrastructure to mobile networks, IoTs, and Blockchains.

**Funding Agencies:** National Science Foundation

**Active Universities:** University of Connecticut, Yale University, Quinnipiac University, Trinity College, Sacred Heart University

**Federal Funding:** \$2.2M in Grants

## Additional Activity

- 70 job postings from several companies: Grayscale Investments, CoinDesk, Coinbase, Interactive Brokers, among others. Some of the positions available are for blockchain engineer, blockchain and digital assets manager, FinTech/Blockchain counsel.\* Oasis Pro is looking for a Chief Revenue Officer
- [Digital Currency Group](#) has made 200+ Web3 investments.

### Company Distribution by Category

\* Data from 2023

# Delaware

As in other sectors, the First State is home to several startups – many of which are only incorporated there.

## Ecosystem

## Investment

213 cos. with **\$2.8B+** in Web3 investments.

Deal Type	Capital Invested
Early-Stage VC	\$1,245M
Merger & Acquisitions	\$1,048M
Later-Stage VC	\$350M
Seed	\$199M
Accelerator/Incubator	\$8M

### Number of Investors by HQ location

Total number of Investors: 1178

## Startups

- **595 startups** out of 698 companies.
- 4 company raised \$100M+
- 1 IPO and 23 M&A deals.
- 4 startups with valuation \$1B+.
- Notable startups:
  - [Moonpay](#) (2018) raised \$555M.
  - [LootMogul](#) (2020) raised \$211M.
  - [Quantstamp](#) (2017) raised \$147M.
  - XMTP (2021) raised \$49M.

### Company Distribution by Year Founded

## Incumbents

8 Top 1000 public cos. headquartered, of which **2 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

## Government/Academia

### Focus Areas:

- Contract for consulting services and web subscriptions
- Research naming space hijacking threats

**Funding Agencies:** Department of Treasury and National Science Foundation

**Active Universities:** University of Delaware, Widener University, Delaware State University

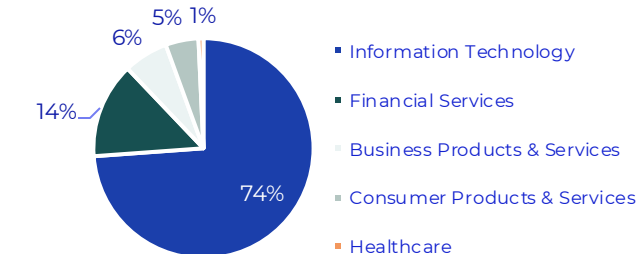

**Top Recipients:** Blockchain Analytics and Tax Software

**Federal Funding:** \$509K in Contracts, \$198K in Grants

## Additional Activity

- Less than 10 job postings currently open, most from Facephi, AIStrata Technology Solutions, Armstrong Teasdale, and Deloitte, for software developer of blockchain technologies, patent agent, and representative sales manager.\*

### Company Distribution by Category

\* Data from 2023

# District of Columbia

DC is well-rounded and well-positioned with a primary focus in the government sector.

## Ecosystem

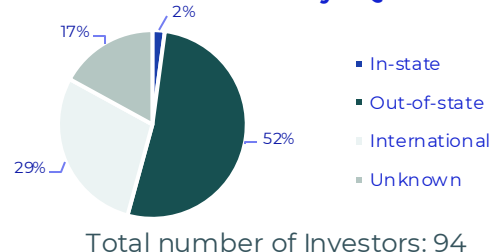

## Investment

21 cos. with **\$44M+** in Web3 investments.

Deal Type	Capital Invested
Seed	\$20.11M
Early-Stage VC	\$18.31M
Later-Stage VC	\$5.45M
Angel	\$0.46M
Accelerator/Incubator	\$0.03M

### Number of Investors by HQ location

## Startups

- **96 startups** out of 161 companies.
- 2 M&A deals.
- Notable startups:
  - [Inca Digital](#) (2017) raised \$5.45M.
  - [Nftperp](#) (2022) raised \$4.7M.
  - [Mogul](#) (2022) raised \$4.2M.
  - [Eyris](#) (2022) raised \$3M.
  - [Layer3](#) (2021) raised \$2.5M.

### Company Distribution by Year Founded

## Incumbents

5 Top 1000 public cos. headquartered, of which **2 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

## Government/Academia

### Focus Areas:

- Blockchain and cryptocurrency analysis
- Develop a framework to identify and solve systemic health & well-being challenges
- Develop of a Distributed Ledger System to Track Environmental Sustainability
- Smart Contracts for Publicly Available Information Collection Management

**Funding Agencies:** National Science Foundation, Department of Homeland Security, Department of State, Department of Defense, Securities and Exchange Commission

**Active Universities:** Georgetown University, George Washington University

**Top Recipients:** Map-Collective, Oasys International, New America Foundation, Nakamoto Terminal, EpochGeo

**Federal Funding:** \$645K in Contracts, \$1.45M in Grants, and \$2.7M in SBIR/STTRs

## Additional Activity

- 100+ job postings currently open, most from IBM, Circle, Chainalysis, Blockchain Association, SIMBA Chain, and Coinbase, among others. Most positions are for blockchain marketing, blockchain engineer, crypto cybersecurity analysts, government relations & regulatory strategy, blockchain security researcher, among others.\*

### Company Distribution by Category

Coinbase	3730	San Francisco, CA	Cryptocurrency exchange platform	<ul style="list-style-type: none"> <li>Staff Accountant, Subscriptions &amp; Services Revenue</li> <li>Senior Banking Operations Analyst</li> <li>Prime Brokerage Finance, Operations Specialist</li> </ul>

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Oasys International Corporation	<ul style="list-style-type: none"> <li>SBIR P1 – Analysis to identity proofing solutions that can ensure trust and secure information sharing in the Public Safety Community, including blockchain technologies.</li> <li>SBIR P2 – Further analysis of available solutions and implementing an integrated solution for secure information sharing.</li> </ul>
Georgetown University	<ul style="list-style-type: none"> <li>Grant - Cyber SMART IU CRC combines disciplines to understand and address the impact of cyber research, including blockchain technologies.</li> </ul>
New America Foundation	<ul style="list-style-type: none"> <li>Grant - Utilize blockchain technology to address systemic health and well-being challenges by capturing and addressing workers' concerns.</li> </ul>
George Washington University	<ul style="list-style-type: none"> <li>Grant - Design novel and secure multi-party communication protocols for large-scale distributed applications, leveraging blockchain technology for improved security and privacy.</li> <li>Grant - Leverage blockchain technology to overcome the challenges of fragmented health care systems and create a secure, efficient platform for medical image sharing.</li> </ul>
Nakamoto Terminal	<ul style="list-style-type: none"> <li>Contract - Digital asset market data and blockchain data processing to further the understanding and analyzing the cryptocurrency ecosystem.</li> <li>SBIR P1 - Advanced Data Acquisition and Analytics Engine that offers comprehensive surveillance tools, including blockchain technology, dark web transactions, and cryptoasset infrastructure, through its modular architecture.</li> </ul>
Map-Collective	<ul style="list-style-type: none"> <li>SBIR P1 - Develop a distributed ledger system using blockchain technology to track global carbon emissions, integrating sensor data and improving environmental sustainability analysis.</li> <li>SBIR P1 - Development of a distributed ledger system to track environmental sustainability.</li> </ul>
Epochgeo	<ul style="list-style-type: none"> <li>SBIR P1 - Develop smart contracts for automated Publicly Available Information (PAI) Collection Management system using blockchain oracles to enhance event discovery and streamline the Requests for Information (RFIs) process.</li> </ul>
NARF Industries	<ul style="list-style-type: none"> <li>SBIR P1 - Develop a permissionless blockchain-based Federated Identity 2.0 solution that combines the benefits of blockchain infrastructure with additional features such as confidentiality, permissioned attribute authorship, and administrative delegation, while remaining interoperable with existing data exchange formats.</li> </ul>

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

# Maine

The Pine Tree State has limited Web3- related activity.

## Ecosystem

## Investment

4 cos. with **\$3.5M+** in Web3 investments.

Deal Type	Capital Invested
(Top 5 by Capital Invested)	
Early-Stage VC	\$3M
Angel	\$0.24M

All 3 investors came from Out-of-State.

## Startups

- **16 startups** out of 26 companies.
- Notable startups:
  - [CROSSBNK](#) and [Metta](#) were founded in 2023.
  - Don't Panic Cloud (2016) raised \$1.2M (out of business)
  - EXOCHAIN (2017) raised \$0.3M (out of business).

### Company Distribution by Year Founded

## Incumbents

2 Top 1000 public cos. headquartered, of which none has an history of investing or developing Web3 technology.

## Government/Academia

### Focus Areas:

- Use autonomous distributed edge intelligence software providing grid optimizations, integration with fractally distributed ledger-based cryptocurrency system, to address the effective distributions of electrical power.
- Integration and development of blockchain for asset and material tracking to enhance circular economy.

**Funding Agencies:** Department of Energy and National Science Foundation

**Active Universities:** University of Southern Maine, University of Maine System, Bowdoin College, University of Maine at Farmington

**Top Recipients:** Introspective Systems

**Federal Funding:** \$5.7K in Grants and \$150K in SBIR/STTRs

## Additional Activity

- Less than 5 job postings were found, only for remote positions. Of note, Rarible is looking for a senior backend engineer.\*
- Companies present in the state can be categorized as Information Technology.

\* Data from 2023.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

# Maryland

The state is leading in the commercialization of government investment in Web3.

## Ecosystem

## Investment

20 cos. with **\$79M+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Seed	\$34.1M
Merger & Acquisitions	\$17.7M
Later-Stage VC	\$4.4M
Early-Stage VC	\$3.3M
Accelerator/Incubator	\$0.4M

## Startups

- **53 startups** out of 85 companies.
- 1 IPO and 4 M&A deals.
- Notable startups:
  - [Securrency](#) (2015) raised \$56.42M.
  - [Bolt Labs](#) (2018) raised \$14.38M.
  - [Americana](#) (2021) raised \$6.9M.
  - [Walacor](#) (2020) raised \$3.47M.
  - [Algorinth Labs](#) and [Vernyl](#) were founded in 2023.

### Company Distribution by Year Founded

## Incumbents

10 Top 1000 public cos. headquartered, of which **6 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

### Mining Companies HQ

## Government/Academia

### Focus Areas:

Supply chain security, automation through blockchain, data integrity and provenance, secure and resilient systems, quantum-safe blockchain solutions, secure communications, blockchain for secure and efficient resource scheduling.

**Funding Agencies:** Agency for International Development, Department of Health and Human Services, Securities and Exchange Commission, General Services Agency

**Active Universities:** University of Maryland, Towson University, Bowie State University

**Top Recipients:** Dai Global, United Solutions, Aurotech, ITS Agile

**Federal Funding:** \$25M in Contracts, \$424K in Grants, and \$1.65M in SBIR/STTRs

## Additional Activity

- 60 job postings currently from several companies: General Dynamics IT, Deloitte, IBM, Flow Blockchain, and Coinbase, among others. Most positions are for blockchain developer, solutions architect, senior wallet developer, cryptocurrency discovery analyst, data scientist, product designer, among many others.\*

### Company Distribution by Category

## Web3 Hiring

Company	# of employees	HQ Location	Sector	Positions - Salary Range (per year)
Merker Group		New York, NY	HR recruiting for law firms	• Counsel - Fin tech/Blockchain - \$400k-\$450k
Monad Labs	10	New York, NY	Blockchain-based smart contract platform.	• Research Writer - \$75k-\$150k • Business Development - \$100k- \$200k • Ecosystem Growth - \$125k- \$175k • Senior Solidity Engineer - \$200k-\$250k • Developer Relations Engineer (web3) - \$150k-\$200k
Block	8521	San Francisco, CA	Financial Software	• Software Engineer (Backend), Bitkey - \$114k-\$144k • Senior Product Designer, Financial Crimes Technology - \$108k-\$137k • Head of Data Platform and Tools - \$99.7k-\$126k • Software Engineering Lead, Bitkey - \$84.9k-\$107k
Fireblocks	570	New York, NY	Blockchain security platform	• Business Development Representative - \$67.2k-\$85.1k • Enterprise Customer Success Manager - \$80.7k- \$102k • Commercial Counsel - \$106k-\$134k • Staff Software Engineer - Bitcoin, Cash App - \$115k-\$145k • Senior Product Data Scientist - \$118k-\$149k
Quidd	26	New York, NY	NFT marketplace	• Blockchain Developer • Senior Digital Marketing Manager - Marketplace • Marketing Graphic Designer - Marketplace • Head of Marketing & Community - Token
Alchemy	187	San Francisco, CA	Blockchain development software	• Business Development (Enterprise Transformation) - Crypto, Web3 • GTM Strategy and Operations Lead - Crypto, Web3 • IT - \$89.9k-\$114k • Customer Success Engineer - \$93.1k-\$118k

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Chainalysis	<ul style="list-style-type: none"> <li>Contract - Provide tailored training and certification programs on the fundamentals of customized cryptocurrency, ensuring comprehensive knowledge and expertise in the field.</li> <li>Contract - Offer expert support services for analyzing Bitcoin cryptocurrency transactions and blockchain data, providing valuable insights and assistance in navigating the complexities of blockchain analysis.</li> <li>Contract - Trace, analyze, and support blockchain investigations for the indicted ICOs, providing expert reports and testimony.</li> <li>Contract - Implement IRS cryptocurrency tracing pilot using Chainalysis software and secure all necessary crypto licenses for FINCEN compliance.</li> <li>Contract - Conduct and provide support for blockchain analysis.</li> </ul>
Elementus	<ul style="list-style-type: none"> <li>Contract - Utilize Elementus advanced blockchain analytics and visualization for enhanced national security and comprehensive data analysis.</li> <li>SBIR P1 - Accelerate Air Force operations with Elementus, an analytical cyber and intelligence platform, providing advanced blockchain data visualization for investigating crimes, monitoring adversary financing, and identifying cyber threats swiftly and comprehensively.</li> <li>SBIR P2 - Accelerate Air Force blockchain analysis with Elementus, an analytical platform that simplifies complex transactions into a user-friendly visual dashboard.</li> </ul>
Ecolong	<ul style="list-style-type: none"> <li>SBIR P1 - Develop an advanced peer-to-peer transactive energy platform using blockchain, predictive optimization, and weather monitoring for DERs.</li> <li>SBIR P2 - Develop a revolutionary peer-to-peer transactive energy platform using blockchain and predictive optimization for cost-effective distributed energy transactions and grid integration.</li> </ul>
Critical Technologies	<ul style="list-style-type: none"> <li>SBIR P2 - Create DAM3ON: a comprehensive solution for secure transactions in military networks and commercial IoT, with commercialization opportunities.</li> </ul>
Syracuse University	<ul style="list-style-type: none"> <li>Grant - Optimize costs of decentralized applications (DAPPs) without compromising security or introducing delays.</li> <li>Grant - Develop and evaluate instructional blockchain security labs to address the global shortage of skilled professionals.</li> </ul>
Research Foundation for the State University of New York	<ul style="list-style-type: none"> <li>Grant - Develop an integrated framework and tools to enable cost-effective development of high-assurance distributed applications, including blockchain consensus.</li> <li>Grant - Expand CyberCorps: Scholarship for Service program to train cybersecurity professionals across all education levels with a comprehensive curriculum, including blockchain technology.</li> <li>Grant - Develop a secure edge service utilizing lightweight environmental fingerprint consensus blockchain for integrated 5G imaging and communication surveillance.</li> </ul>
IBM	<ul style="list-style-type: none"> <li>Contract - Leverage blockchain technology for DARPA's Shield Advanced Device Program to enhance security and data integrity.</li> </ul>
Cornell University	<ul style="list-style-type: none"> <li>Grant - Research and develop methods to ensure fairness and equity in blockchain systems funded by NSF-BSF SATC program.</li> </ul>

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

# Pennsylvania

The Keystone State demonstrates high efficiency with nearly 9% of their startups achieving an exit to date.

## Ecosystem

## Investment

43 cos. with **\$555M+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Merger & Acquisitions	\$199M
Early-Stage VC	\$135M
Seed	\$69M
Later-Stage VC	\$15M
Accelerator/Incubator	\$5M

### Number of Investors by HQ location

Total number of Investors: 227

## Startups

- **137 startups** out of 210 companies.
- 1 company raised \$100M+.
- 1 IPO and 5 M&A deals.
- Notable startups:
  - [ZenLedger](#) (2017) raised \$27M.
  - [Battery Finance](#) (2022) raised \$16M.
  - [PowerCoin](#) (2019) raised \$16M.

### Company Distribution by Year Founded

## Incumbents

48 Top 1000 public cos. headquartered, of which **13 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

Mining Companies HQ  
**STRONGHOLD**

3+ mining facilities

## Government/Academia

### Focus Areas:

Application of blockchain tech in construction, healthcare, food tracking, cybersecurity, and video data integrity.

**Funding Agencies:** National Science Foundation, Department of Treasury, Department of Energy

**Active Universities:** Carnegie Mellon University, University of Pittsburgh, Pennsylvania State University, University of Scranton

**Top Recipients:** OrganicSmart, Blockchain Analytics and Tax Software, Zeer

**Federal Funding:** \$750K in Contracts, \$2.07M in Grants and \$355.7K in SBIR/STTRs

## Additional Activity

- 200+ job postings currently from major companies: Deloitte, BPM, and Coinbase, among others. Most positions are for blockchain & digital assets manager, solution architecture manager and blockchain and backend engineers.\*

Comcast	189,000	Philadelphia, PA	Telecommunications	<ul style="list-style-type: none"> <li>Senior Data Analyst</li> <li>Comcast Cybersecurity: Director, Software Engineering PKI</li> </ul>
BNY Mellon	46,905	New York, NY	Investment Bank	<ul style="list-style-type: none"> <li>Principal, Product Management - \$98k- \$216k</li> <li>Specialist, Full-Stack Developer - \$100k-\$127k</li> <li>Senior Specialist, FinTech Sourcing - \$72k-\$91.1k</li> </ul>

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Pennsylvania State University	<ul style="list-style-type: none"> <li>Grant - Develop inclusive robot teleoperation method using deep learning and blockchain to empower women in construction.</li> <li>Contract - Implement data acquisition, ETL processes, and visualization of the BTC blockchain for POP testing.</li> </ul>
Carnegie Mellon University	<ul style="list-style-type: none"> <li>Grant - Develop a theory of blockchains and cryptocurrencies. The project focuses on the economic and incentive factors in blockchains and developing new educational materials on blockchains to make the topic more accessible.</li> <li>Grant - Develop a novel access control blockchain paradigm for cyber-secure sensor infrastructure in fossil power generation systems. The project aims to create a secure and decentralized infrastructure for collecting, managing, and sharing sensor data in power plants.</li> </ul>
University of Pennsylvania	<ul style="list-style-type: none"> <li>Grant - Develop an internet-scale permissioned blockchain infrastructure for the mobile internet. The proposed infrastructure is intended to be more efficient and secure than existing solutions and will be designed to meet the specific requirements of mobile devices.</li> </ul>
University of Pittsburgh	<ul style="list-style-type: none"> <li>Grant - Develop blockchain-based mechanisms for timed data release and timed transactions. Timed data release refers to the automated release of data at specific times, and timed transactions refer to the automatic execution of transactions at specific times. The proposed mechanisms will utilize smart contracts and cryptographic techniques to ensure the security, privacy, and integrity of data and transactions.</li> </ul>
Organicsmart Blockchain Analytics & Tax Software	<ul style="list-style-type: none"> <li>SBIR P1 - Develop and test a hybrid blockchain for secure traceability of perishable products in the supply chain.</li> </ul>
One and Only	<ul style="list-style-type: none"> <li>Contract - Create and offer a web-based subscription service for blockchain analytics and tax software.</li> </ul>
Zios University	<ul style="list-style-type: none"> <li>SBIR P1 - Develop the Zeer platform, utilizing blockchain technology, for encrypted storage of audio and video footage with enhanced data integrity and authenticity. This provides utmost data security and can also be used as evidence in court for cases of sexual abuse or harassment.</li> <li>SBIR P1 - Develop a secure and transparent platform using distributed ledger technology (DLT) to empower victims of sexual assault and domestic violence to confidentially store and share their stories with trusted organizations and service providers, ensuring control over their data and facilitating their journey to justice.</li> </ul>

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

# Puerto Rico

There has been an upsurge of startup activity in the last three years.

## Ecosystem

## Investment

21 cos. with **\$64M+** in Web3 investments.

Deal Type	Capital Invested
Early-Stage VC	\$55.07M
Seed	\$9.03M
Accelerator/Incubator	\$0.65M
Angel	\$0.14M

### Number of Investors by HQ location

Total number of Investors: 152

## Startups

- **51 startups** out of 67 companies.
- 1 IPO and 2 M&A deals.
- Notable startups:
  - [Aligned Capital](#) (2019) raised \$34M.
  - [FV Bank](#) (2018) raised \$13M.
  - [Intuition](#) (2022) raised \$4M.

### Company Distribution by Year Founded

## Incumbents

Puerto Rico has zero Top 1000 public companies based in the state.

## Government/Academia

No government activity through Contracts, SBIR/STTRs or Grants.

**Top Universities:** University of Puerto Rico, Inter American University of Puerto Rico

## Additional Activity

- Less than 10 job postings found. Of note:
  - Immutable Holdings is hiring a Backend Engineer and Product Marketing Manager.
  - NCR Corporation is hiring a transaction monitoring analyst.
  - Collins Aerospace is hiring a remote cybersecurity and DT compliance specialist.\*

Cloud7works	10-50	Reston, VA	App and Blockchain solutions development	<ul style="list-style-type: none"> <li>Blockchain Architect - \$117K - \$148K</li> </ul>

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Harmonia Holdings Group	<ul style="list-style-type: none"> <li>SBIR P2 - Develop DesignProtect, a blockchain-based solution for controlling access to DoD documents, ensuring secure sharing of designs with nontraditional part fabricators, tracking access, and validating document integrity for Defense Logistics Agency (DLA) and surge capacity suppliers.</li> <li>SBIR P2 - Build CONCERT, a collaborative environment using blockchain and software ecosystem principles, for secure collaboration, management, and reporting of research contracts.</li> <li>SBIR P2 - Revolutionize artifact tracking with CustodyChain, a distributed ledger system, to enhance knowledge preservation and innovation in defense and RDT&amp;E communities</li> <li>SBIR P1 - Develop CustodyChain, a distributed ledger solution to track and verify technical artifacts for defense research and development.</li> <li>SBIR P2 - Develop the Distributed Immutable Data Objects (DIDO) system for secure real-time communication and collaboration using blockchain technology.</li> <li>SBIR P1 - Implement, track, and encrypt secure messaging with distributed network capability, real-time collaboration, and blockchain ledger for metadata.</li> </ul>
Virginia Polytechnic Institute and State University	<ul style="list-style-type: none"> <li>Grant - Develop a blockchain-based framework with machine learning for cyber-resilient power systems and grid security.</li> <li>Grant - Research and develop new defense solutions to address security challenges in blockchain technology.</li> <li>Grant - Safeguard current and future internet applications by proactively addressing naming space hijacking threats through the exploration of potential threats within Decentralized Finance applications built on blockchain technology.</li> </ul>
Vivsoft Technologies	<ul style="list-style-type: none"> <li>SBIR P1 - Accelerate AI/ML and Microservices deployment in Air Force with blockchain-based chain of custody tracking.</li> <li>SBIR P1 - Ensure secure software provenance and visibility with VivSoft's Enchoc platform using blockchain technology and cryptographic keys.</li> <li>SBIR P2 - Accelerate application deployment with DevSecOps and AI/ML accelerators, integrating automation platforms and blockchain for secure and efficient pipelines.</li> </ul>
Deloitte Consulting	<ul style="list-style-type: none"> <li>Contract - Develop a blockchain prototype for multi-tier grant payments, ensuring secure and transparent distribution of funds.</li> <li>Contract - Provide technical support services for a pilot project based on the proof of concept using distributed ledger technology.</li> </ul>
GBTI Solutions	<ul style="list-style-type: none"> <li>SBIR P2 - Accelerate product development and commercialization of the Rapid Acquisition Platform (RAP) with blockchain, machine learning, and cryptography technologies.</li> </ul>
Affigent	<ul style="list-style-type: none"> <li>Contract - Engage professional services to collect COVID-19 diagnostic testing data using Oracle Blockchain for OCIO.</li> </ul>
Mitre Corporation	<ul style="list-style-type: none"> <li>Contract - Cryptocurrency and digital asset investigation and analysis.</li> <li>Contract - Provide R&amp;D support services for blockchain cybersecurity to NCCoE (National Cybersecurity Center of Excellence).</li> </ul>
BEMCONTROLS	<ul style="list-style-type: none"> <li>Grant - Develop a blockchain-based peer-to-peer energy trading platform to facilitate complex exchange of kilowatt-hours and megawatts.</li> <li>SBIR P2 - Develop a blockchain-based software platform called the "Energy Internet" to enable transactive energy management and consumer participation in the electricity market.</li> <li>STTR P1 - Develops blockchain-enabled P2P energy trading platform.</li> </ul>

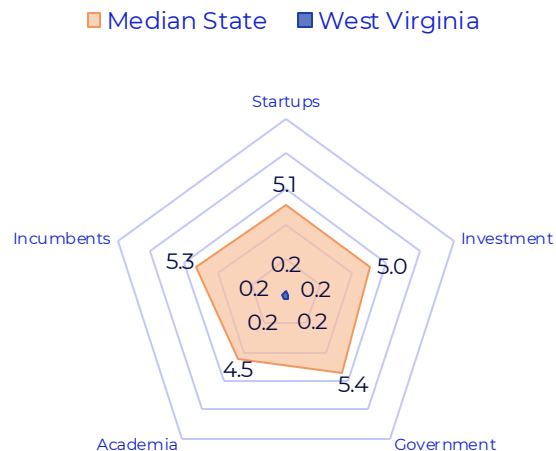

We analyzed U.S. Federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (SBIR/STTR). This is relevant because, while much of this funding is to address government requirements, the technology developed is explicitly intended to drive innovation in the commercial sphere.

# West Virginia

This state has limited Web3 activity.

## Ecosystem

## Investment

West Virginia has a limited startup economy and, as such, garners little attention from investors. With the rise of remote work, there is some activity from the DC-metro area, but not specific to Web3.

To date, there have been no publicly disclosed venture capital investments in Web3 technologies or applications from West Virginia based startups.

## Startups

- 1 company ([FreedomTrust](#)) founded on 2020, HQ'ed in **Morgantown** city, was the [first firm approved through West Virginia fintech sandbox](#).

## Incumbents

West Virginia has zero Top 1000 public companies based in the state.

## Government/Academia

No government activity through Contracts, SBIR/STTRs or Grants.

**Active Universities:** Marshall University in Huntington

## Additional Activity

- Less than 20 job postings currently from several companies: Deloitte, IBM, Noblis, and Gigster. Most are remote positions for blockchain and software developer, summer intern, solution architect, blockchain & digital asset manager, procurement professional/specialist.\*

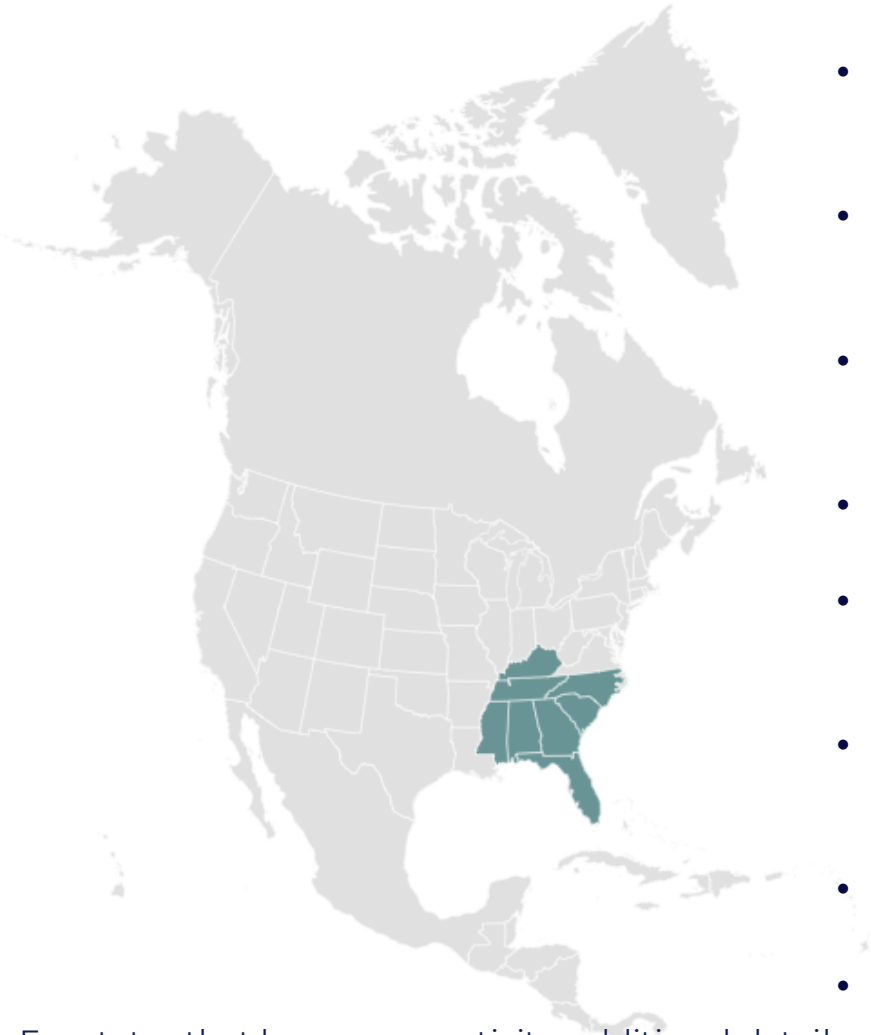

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

\* Data from 2023.

# The Southeast

- **Alabama** hosts government agencies and startups experimenting with IoT and logistics applications.
- **Florida**, specifically Miami, has been developing as a Web3 hub, helping propel the state to the top 5 most active Web3 ecosystems.
- **Georgia** as a state has a Web3 economy with diverse incumbents and growing startup investments.
- **Kentucky** universities have excelled at attracting government investment.
- **Mississippi** state does have numerous mining facilities despite otherwise limited Web3 activity.
- **North Carolina** has strong university activity and government spend, which are supporting Web3 economy growth.
- **South Carolina** has a foothold emerging in government.
- **Tennessee** is an epicenter for healthcare technology.

For states that have more activity, additional detail on hiring and federal activity has been added on a second page.

# Alabama

The state hosts government agencies and startups experimenting with IoT and logistics applications.

## Ecosystem

## Investment

4 co. with **\$0.2M** in Web3 investments.

Deal Type	Capital Invested
Accelerator/Incubator	\$0.2M

### Number of Investors by HQ location

Total Number of Investors: 6

## Startups

- **16 startups** out of 25 companies.
- Notable startups:
  - Datalus (2021) raised \$50K (out of business).
  - MyTAASK (2017) raised \$150K.
  - [The Apocalypitics](#) raised an undisclosed amount from Blockchain Founders Fund on November 1, 2021.

### Company Distribution by Year Founded

## Incumbents

3 Top 1000 public cos. headquartered, of which none has an history of investing or developing Web3 technology.

## Government/Academia

### Focus Areas:

- Create a decentralized data marketplace for IoT data trading.
- Develop trustworthy deep learning for wireless connected devices through cryptography, a complementary classifier, and blockchain protocol.
- Improve the reliability and resilience of electric grids using blockchain technology.

**Funding Agencies:** Department of Defense, National Science Foundation, Department of Energy

**Active Universities:** University of Alabama, Auburn University, Troy University, University of North Alabama

**Top Recipients:** Cybitron, EH Group

**Federal Funding:** \$1.09M in Grants, and \$340K in SBIR/STTRs

## Additional Activity

- 30+ job postings currently open, most from Deloitte, Recruiting from Scratch and Realign, for blockchain & digital assets manager, blockchain engineer, and data scientists.\*

### Company Distribution by Category

We analyzed open job postings in the state to determine employers, roles, and salary ranges. This data is as of April 2023.

## Web3 Hiring

Company	Number of Employees	HQ Location	Sector	Positions - Salary Range (per year; estimated)
NFTpay	1-10	Miami, FL	Fintech company that develops software to enable credit card transactions on websites and applications to buy NFTs.	<ul style="list-style-type: none"> <li>Software Engineer, NFTs and Crypto (remote) - \$95.4K - \$121K</li> <li>Web3.0 Consultant / Account Manager</li> <li>Head of Marketing (Remote) - \$125K - \$159K</li> <li>Business Development Officer (Remote) - \$73.2K - \$92.7K</li> </ul>
BlockSpaces	24	Tampa, FL	Developer of blockchain integration software intended to connect applications and data.	<ul style="list-style-type: none"> <li>Front End Web Developer - \$97.2K - \$123K</li> <li>Operations Project Manager - \$87.9K - \$111K</li> <li>Cloud Architect, Enterprise Infrastructure - \$146K - \$185K</li> <li>Bitcoin, DevOps Engineer - \$94.7K - \$120K</li> </ul>
Block	8521	San Francisco, CA	Payment services to merchants and related services.	<ul style="list-style-type: none"> <li>Application Security Engineer - \$124K - \$157K</li> <li>Senior Security Engineer, Software Supply Chain Security - \$98.7K - \$125K</li> <li>Internal Audit Technology Manager/ Senior Manager- Bank-Square Financial Services - \$92.1K - \$117K</li> </ul>
CoinFlip	300	Chicago, IL	Developer of a point-of-sale payment platform.	<ul style="list-style-type: none"> <li>Engineer, Smart Contracts - \$100K - \$127K</li> <li>Engineer, Blockchain Infrastructure - \$97.1K - \$123K</li> <li>Experience Center Representative and Social Media Content Creator - \$37.4K - \$47.3K</li> </ul>
QuickNode	128	Sunny Isles Beach, FL	Developer of blockchain development platform.	<ul style="list-style-type: none"> <li>Senior Web3 Writer - \$75.6K - \$95.7K</li> <li>Software Engineer, Backend (Rust,Go,C++) - \$134K - \$170K</li> <li>Technical Operations Engineer - \$70.3K - \$89K</li> </ul>
Nifty's	38	Miami, FL	Developer of NFT-focused social media platform.	<ul style="list-style-type: none"> <li>Full-Stack Web3 Engineer - \$109K - \$137K</li> <li>Backend/Infra Engineer - \$118K - \$150K</li> <li>Account Manager</li> <li>Full-Stack Engineer</li> </ul>

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Florida International University	<ul style="list-style-type: none"> <li>Grant - Renewed NSF REU Site at Florida International University focuses on secure sensor technologies and interdisciplinary research.</li> <li>Grant - Researching and mitigating security and privacy challenges of smart devices in various environments.</li> <li>Grant - Secure data logging and processing using blockchain and machine learning.</li> <li>Grant - Lightweight blockchain-based security scheme for the Internet of Military Things (IoMT).</li> <li>Grant - Research on secured sensor technologies, offering undergraduate students research experiences in various areas.</li> <li>Grant - A practical SMPC framework using the Algorand blockchain enables secure computation while preserving privacy across multiple parties.</li> </ul>
Securboratorion University of Florida	<ul style="list-style-type: none"> <li>SBIR P2 - Partnership with Consult Hyperion to propose PRIM, a DLT-based solution for secure Information Resilience in Air Force operations.</li> </ul>
Florida Atlantic University	<ul style="list-style-type: none"> <li>Grant - OpenMatFlo is a platform accelerating convergence in the concrete industry and 3DCP by developing greener inks.</li> </ul>
Modus Operandi	<ul style="list-style-type: none"> <li>Grant - A new reputation-based mining paradigm that incentivizes blockchain miners to avoid dishonest strategies.</li> </ul>
Curuvar	<ul style="list-style-type: none"> <li>SBIR P1 - Combining directed acyclic graph and identity management technologies enables automated biometric verification in distributed ledgers.</li> <li>STTR P1 - An urgently needed multi-level security cyber information management system enables collaborative cyber protection and mitigation.</li> </ul>
University of Central Florida	<ul style="list-style-type: none"> <li>Develop a Distributed Secure Enclave using distributed cryptography and a closed Distributed Ledger network to protect critical information systems against sophisticated adversaries. The prototype will demonstrate provable security and potential for practical enterprise applications.</li> </ul>
Autonomous Healthcare	<ul style="list-style-type: none"> <li>Grant - Enhance access to NIST data products and services, including SRD 106, certificates of analysis, digital calibration reports, and a units interoperability service, through activities such as updating databases, expanding work on interoperability services, investigating blockchain technology for improving trust in research data, among others.</li> <li>SBIR P1 - Using blockchain technology, this project aims to track and identify drug diversion in healthcare systems.</li> </ul>

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

# Georgia

The Web3 economy in The Peach State has diverse incumbents and growing startup investment.

## Ecosystem

## Investment

58 cos. with **\$2.49B+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Reverse Merger	\$962M
Merger & Acquisitions	\$651M
Early-Stage VC	\$575M
Later-Stage VC	\$173M
Seed	\$111M

### Number of Investors by HQ location

Total number of Investors: 306

## Startups

- **202 startups** out of 314 companies.
- 1 company raised \$100M+.
- 9 M&A deals.
- Notable startups:
  - [Verte](#) (2018) raised \$62M.
  - [Slingshot](#) (2018) raised \$31M.
  - [Openexus](#) (2021) raised \$25M.
  - [Lockchain](#) (2023) raised \$4.6M.

### Company Distribution by Year Founded

## Incumbents

39 Top 1000 public cos. headquartered, of which **15 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

10+ Mining Facilities

## Government/Academia

### Focus Areas:

- Blockchain-driven computational platform for industrial analytics
- A socio-technical framework for handling digital evidence with security and privacy assurances
- Providing support for transition from legacy systems to blockchain infrastructure

**Funding Agencies:** Department of Health and Human Services, National Science Foundation

**Active Universities:** Georgia Institute of Technology, Georgia State University, Emory University, University of Georgia

**Top Recipients:** Excelous, Blockalytics

**Federal Funding:** \$1.9M in Contracts, \$555K in Grants, and \$255K in SBIR/STTRs

## Additional Activity

- 90 job postings currently from several companies: Circle, Deloitte, Home Depot, UPS, Blockalytics, Block, and Coinbase, among others. Most positions are for blockchain developer, blockchain architect, financial analyst, accounting manager, business development executive, among many others.\*

We analyzed open job postings across the state to determine employers, roles, and salary ranges. This data is a snapshot in time as of April 2023.

## Web3 Hiring

Company	Number of Employees	HQ Location	Sector	Positions - Salary Range (per year)
Deloitte	427,875	London, England, UK	Consulting Services	<ul style="list-style-type: none"> <li>Blockchain &amp; Digital Assets Senior - \$88.8K-\$112K</li> <li>Environment, Social, and Governance (ESG) &amp; Reporting Advisory Manager</li> <li>Tax Manager, Credits &amp; Incentives - Blockchain Digital Assets - \$95.8K - \$121K</li> <li>Blockchain &amp; Digital Assets Manager - \$90K - \$114K</li> </ul>
Circle	969	Boston, MA	Financial technology designed to send, receive and invest in cryptocurrency assets around the world.	<ul style="list-style-type: none"> <li>Technology Risk Manager - \$135k - \$180k</li> <li>Senior Marketing Research and Insights Manager - \$160k - \$220k</li> <li>Lead Technical Program Manager, Security and Technology Risk Management - \$150k - \$200k</li> <li>Senior Manager, Product Marketing, Business Banking - \$185k - \$240k</li> <li>Director, Cloud Security - \$230k - \$315k</li> </ul>
Core Scientific	205	Austin, TX	Blockchain and AI infrastructure.	<ul style="list-style-type: none"> <li>Senior Manager, Treasury, Digital Assets &amp; Operations</li> <li>Senior Manager, Accounting</li> <li>Corporate Controller</li> <li>Senior Accountant</li> </ul>
Onin Staffing	NA	Birmingham, AL	Industry Recruiting	<ul style="list-style-type: none"> <li>Marketing Coordinator</li> <li>Marketing Specialist</li> <li>Marketing Designer</li> </ul>
US Bitcoin (M&A with Hut 8 Mining)	69	Miami, FL	Cryptocurrency mining services	<ul style="list-style-type: none"> <li>Crypto Infrastructure Operations</li> <li>Supply Chain Operations Associate</li> <li>Miner technician</li> </ul>
Coinbase	3730	San Francisco, CA	Cryptocurrency exchange platform	<ul style="list-style-type: none"> <li>Developer Partnerships Associate - \$41.6k-\$58.2k</li> <li>Manager, Blockchain Security - \$41.6k-\$58.2k</li> <li>Senior Manager, Technical Account Manager - \$41.6k-\$58.2k</li> </ul>

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
University of Texas at San Antonio	<ul style="list-style-type: none"> <li>Grant - Development of a robot teleoperation and blockchain certification to promote diversity and inclusion in construction.</li> <li>Grant - Implementing a program to promote Minority STEM Education for Protecting Critical Infrastructure through cybersecurity.</li> <li>Grant - Implement a blockchain-based system for managing cybersecurity.</li> </ul>
Tietronix Software	<ul style="list-style-type: none"> <li>STTR P1 - Explore blockchain for secure, real-time MBSE models, improving collaboration and eliminating errors in aerospace.</li> <li>STTR P2 - Use Blockchain Technology (BCT) to enhance Model Based Systems Engineering (MBSE) team collaboration, providing a secure, decentralized environment for sharing models and implementing collaborative processes</li> <li>Contract - Leverage blockchain technology to enhance MBSE team collaboration through tamper-resistant and secure data sharing.</li> <li>Contract - Implement blockchain technology for enhancing model-based system engineering processes.</li> </ul>
University of Texas at Dallas	<ul style="list-style-type: none"> <li>Grant - Implementing a blockchain-based system for assured open scientific data sharing and governance.</li> <li>Grant - Conduct experimental tests on non-equilibrium thermodynamics in far-from-equilibrium heat flows for advanced modeling.</li> <li>Grant - Develop a secure blockchain technology curriculum for educational institutions.</li> </ul>
BrilliantMD	<ul style="list-style-type: none"> <li>STTR P1 - Increase transparency in healthcare transactions and reduce costs through blockchain and machine learning.</li> <li>SBIR P2 - Improve healthcare reimbursement and revenue cycle management using advanced analytics, machine learning, and blockchain technologies.</li> </ul>
Integra FEC	<ul style="list-style-type: none"> <li>SBIR P1 - Trace cryptocurrencies like Zcash and Monero by developing heuristics for de-anonymization and proposing an extensible system architecture.</li> <li>Contract - Utilize cryptocurrency wallets and security features software</li> <li>Contract - Initiate a pilot project for tracing cryptocurrencies in IRS investigations.</li> <li>Contract - Utilize a secure software platform with interactive interface for storing, transacting, and tracing cryptocurrency with 100 traces.</li> <li>Contract - Blockchain applications for homeland security forensic analytics.</li> </ul>
University of Houston	<ul style="list-style-type: none"> <li>Grant - Develops a data-driven food charity ecosystem to address food insecurity and promote equitable nutrition.</li> <li>Grant - Disrupt illegal medical supply chains using network analysis, data mining, and intervention strategies.</li> </ul>
VertiPrime Government Services	<ul style="list-style-type: none"> <li>SBIR P1 - Combine blockchain technology and artificial intelligence to address procurement challenges in the defense sector. By connecting a private distributed ledger with manufacturing codes and utilizing AI algorithms, we aim to accelerate the production of replacement parts for aging fighter jets and bombers.</li> <li>SBIR P2 - Develop the Odysseus procurement technology framework, combining AI, Blockchain, and IoT, to address supply chain issues in USAF sustainment efforts.</li> </ul>

We analyzed U.S. Federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (SBIR/STTR). This is relevant because, while much of this funding is to address government requirements, the technology developed is explicitly intended to drive innovation in the commercial sphere.

# The Midwest

- [Illinois](#) has a thriving Web3 ecosystem, with initiatives across all five dimensions.
- [Indiana](#)'s Web3 economy is anchored by government and academic research.
- [Michigan](#) has several auto industry incumbents that are driving Web3 activity.
- [Minnesota](#) has several retail incumbents that are exploring diverse Web3 solutions.
- [Ohio](#) excels at attracting venture capital investment and research funding resulting in a healthy Web3 ecosystem.
- [Wisconsin](#) is home to a diverse Web3 economy.

For states that have more activity, additional detail on hiring and federal activity has been added on a second page.

# Illinois

The state has a thriving Web3 ecosystem, with initiatives across all five dimensions.

## Ecosystem

## Investment

89 cos. with **\$1.5B** in Web3 investments.

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Simba Chain	<ul style="list-style-type: none"> <li>SBIR P1 - Develop and integrate SIMBA Integrity (SI) tool into existing systems for file system monitoring and blockchain-based recording of file changes and fingerprints.</li> <li>SBIR P2 - Implementing digital blockchain budgeting accountability and tracking to track funding and resources using blockchain for enhanced budgeting accountability and transparency.</li> <li>SBIR P1 - Demonstrate the BASECAMP prototype using SIMBA Chain to register and track Additive Manufacturing components throughout their lifecycle on the blockchain.</li> <li>SBIR P2 - Enhance DTIC's data integrity, authenticity, and access control with blockchain technology for efficient document sharing.</li> <li>SBIR P2 - Develop and implement a blockchain-based system to monitor and track the inventory and movement of physical assets at Fleet Readiness Center Southeast (FRCSE) for improved demand sensing and parts availability.</li> </ul>
Indiana Tool & MFG	<ul style="list-style-type: none"> <li>SBIR P1 - Design a cloud-based blockchain transaction system for decentralized solar energy trading, leveraging Hyperledger Fabric and QUIC protocol for scalability and efficiency.</li> <li>SBIR P1 - Architect and design a decentralized, secure messaging application using Blockchain technology, leveraging Fabric implementation and extensions for smart contracts and mobile ad hoc networks.</li> <li>SBIR P2 - Establish permanent, auditable, digital records for aviation parts, enhancing asset traceability and supply chain risk management.</li> </ul>
Consensus Networks	<ul style="list-style-type: none"> <li>Grant - Develop a blockchain-based healthcare network, HealthLink, to securely manage and share population health data.</li> <li>SBIR P1 - Utilize blockchain, predictive analytics, and machine learning to enhance medical logistics and improve healthcare by leveraging health data.</li> <li>SBIR P1 - Improve medical supply chains through blockchain-based traceability, analytics, and real-time data sharing for efficient patient care.</li> <li>SBIR P1 - Research, deploy, and test a blockchain-based solution to securely manage population health data, enabling secure data transfer, resilience against attacks, and efficient data flow.</li> </ul>
Purdue University	<ul style="list-style-type: none"> <li>Grant - Investigating the relationship between distributed cryptography and blockchain technology for enhanced security and privacy.</li> <li>Grant - Developing a blockchain-based open AI platform to accelerate drug discovery by integrating data from multiple organizations and laboratories while ensuring security and privacy.</li> <li>Grant - Develop privacy-preserving and secure inter-blockchain communication protocols to enhance the integrity of blockchain networks.</li> <li>Grant - Create a secure and scalable UAV Traffic Information Exchange Network (UAV-TIEN) using blockchain-inspired technology for large-scale UAV operations.</li> </ul>
Novilytic	<ul style="list-style-type: none"> <li>SBIR P2 - Developing the Proteometer, a continuous upstream process monitoring engine for detecting and analyzing protein variants during monoclonal antibody production using blockchain for data management and regulatory compliance.</li> </ul>
Pierce Aerospace	<ul style="list-style-type: none"> <li>SBIR P1 - Develop the FPID concept for DoD, a blockchain-based distributed identity system for Unmanned Aircraft Systems (UAS) to enhance situational awareness and interoperability.</li> <li>STTR P1 - Evaluate and select a network emulation or modeling tool in Phase I, followed by the development of a product in Phase II and III, to characterize network architectures and protocols for unmanned aircraft remote ID and tracking.</li> <li>STTR P2 - Enhance the Remote ID prototype emulator to address immediate challenges and provide secure sUAS identity at the edge.</li> </ul>

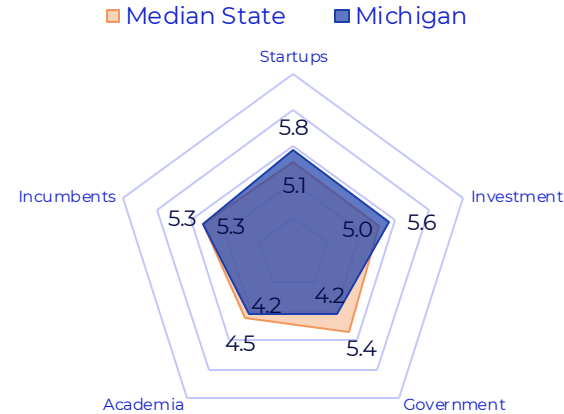

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

# Michigan

Auto industry incumbents are driving Web3 activity.

## Ecosystem

## Investment

23 cos. with **\$56M+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Seed	\$18.98M
Early-Stage VC	\$13.47M

# Utah

Utah stands out among the region with one IPOs and two unicorns.

## Ecosystem

## Investment

45 cos. with **\$614M** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Early-Stage VC	\$489.68M
Seed	\$79.42M
Later-Stage VC	\$43.83M
Angel	\$1.14M
Accelerator/Incubator	\$0.24M

### Number of Investors by HQ location

## Startups

- **109 startups** out of 143 companies.
- 2 companies raised \$100M+.
- 1 IPO and 9 M&A deals.
- 2 startups with valuation \$1B+.
- Notable startups:
  - [Limit Break](#) (2021) raised \$240M.
  - [TaxBit](#) (2017) raised \$239M.
  - [Salad](#) (2018) raised \$22.3M.

### Company Distribution by Year Founded

## Incumbents

6 Top 1000 public cos. headquartered, of which **1 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

## Government/Academia

### Focus Areas:

- Develop a Decentralized Key Management System based on the Decentralized Identifier specification to serve as a decentralized foundation for identity management.
- Use distributed ledger technology to allow water rights holders to market and lease their unused water.

**Funding Agencies:** Department of Homeland Security, National Science Foundation

**Active Universities:** Brigham Young University, University of Utah, Utah State University

**Top Recipients:** Respect Network, WETX

**Federal Funding:** \$1M in SBIR/STTRs

## Additional Activity

- 70 job postings from some companies: Circle, Nerd United, overstock.com, Coinbase, Deloitte, Altafin, Block, tZero, and recruiting from Scratch, among others. Some of the positions available are for analyst, stablecoin assets and interest revenue accountant, technology risk manager, cloud security director, blockchain engineers, associate product owner, among others.\*

### Company Distribution by Category

# Wyoming

An outlier among the region, Wyoming hosts 80+ Web3 startups and over \$300M in investments.

## Ecosystem

## Investment

57 cos. with **\$333M+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Early-Stage VC	\$238.27M
Seed	\$58.58M
Later-Stage VC	\$31.2M
Merger & Acquisitions	\$2.81M
Accelerator/Incubator	\$1.4M

### Number of Investors by HQ location

Total number of Investors: 361

## Startups

- **222 startups** out of 260 companies.
- 9 M&A deals.
- Notable startups:
  - [Omnimodus](#) (2021) raised \$64.2M.
  - [Custodia](#) (2020) raised \$53.36M.
  - [Solve.Care](#) (2018) raised \$30.2M.

### Company Distribution by Year Founded

## Incumbents

Wyoming has zero Top 1000 public companies based in the state.

## Government/Academia

### Focus Areas:

- Purchase of soft tokens for multi-factor authentication to enhance security for accessing criminal history databases.

**Funding Agencies:** Department of Justice

**Active Universities:** University of Wyoming

**Top Recipients:** Attorney General of Wyoming

**Federal Funding:** \$50K in Grants

## Additional Activity

- Very few job postings and most for remote positions. Some companies hiring include: Custodia Bank and SFOX. Some of the positions available are for Crypto attorney, Securities attorney and Bitcoin Software Engineer.\*

### Company Distribution by Category

\* Data from 2023.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

## MOONBEAM

# The West

- [Alaska](#) has limited Web3-related activity.
- [Arizona](#) hosts a growing Web3 community based around the Phoenix and Tucson.
- [California](#) unsurprisingly leads the nation in Web3 with 2000+ companies and 18 unicorns.
- [Hawaii](#)'s Web3 activity is limited to government applications.
- [Idaho's](#) capital, Boise, takes the lead within the state, boasting over \$6 million invested in venture deals alongside a thriving enterprise sector.
- [Nevada](#)'s gaming industry is leading interest in Web3 technology.
- [Oregon](#) has significant retail, aerospace, and advanced manufacturing-focused activity.
- [Washington](#) excels at enterprise applications of Web3 technologies with strong incumbents, diverse startups, and significant investment.

For states that have more activity, additional detail on hiring and federal activity has been added on a second page.

# Alaska

To date, Alaska has not been very engaged with the Web3 economy.

## Ecosystem

## Investment

1 co. with **\$0.5M** in Web3 investments through a pre-seed round.

## Startups

We were able to identify three Web3 companies, all based in Anchorage:

- *BuyAnyCoin* founded in 2014. They had a campaign to raise \$10K via Indiegogo in 2015. As of 2023, they do not have an active website.
- *Nexus Verse* founded in 2023. They raised \$500K in a pre-seed investment.
- [PhoenUX](#) founded in 2022.

## Incumbents

Alaska has zero Top 1000 public companies based in the state. There are several sites for energy and other companies in Alaska, none of which that we could identify are investing locally in Web3.

There is a local airline, *Ravn*, which has begun using cryptocurrencies to issue airline miles.

## Government/Academia

Alaska has no Web3 related government activity through contracts, SBIR/STTRs, or grants.

**Active Universities:** University of Alaska Fairbanks (individual academics and student groups)

## Additional Activity

Alaskan government has sought to regulate blockchain activity in the state which may have cooled interest in the industry. Though, with the limited startup activity in the state, this may be unrelated.

There are few job postings, which are only for remote positions.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

# Arizona

The state hosts a growing Web3 community based around Phoenix and Tucson.

## Ecosystem

## Investment

25 cos. with **\$134M+** in Web3 investments.

Deal Type (Top 5 by Capital Invested)	Capital Invested
Seed	\$60.09M
Angel	\$26.3M
Early-Stage VC	\$26.24M
Accelerator/Incubator	\$4.52M
Merger & Acquisitions	\$2.34M

### Number of Investors by HQ location

Total number of Investments: 134

## Startups

- **89 startups** out of 181 companies.
- 3 M&A deals.
- Notable startups:
  - [Try Your Best](#) (2021) raised \$9.8M.
  - [Saga](#) (2021) raised \$8.5M.
  - [Nine Realms](#) (2021) raised \$8.5M.
  - [ReNFT](#) (2020) raised \$6.5M.

### Company Distribution by Year Founded

## Incumbents

24 Top 1000 public cos. headquartered, of which **5 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

## Government/Academia

**Focus Areas:** Technology to tag, track, and publish proprietary data; Food Supply Chain; Smart Contracts; Sensor data analysis for fossil fuel-based power plants.

**Funding Agencies:** National Science Foundation, Department of Agriculture, Department of Energy, Department of Defense

**Active Universities:** Arizona State University, Northern Arizona University, University of Arizona

**Top Recipients:** Ridgetop Group, Block Science

**Federal Funding:** \$1.5M in Grants and \$278K in SBIR/STTRs

## Additional Activity

- 80 job postings from several companies: Circle, General Dynamics Mission Systems, Deloitte, Coinbase, Wester Alliance Bank, Paypal, and Nisum, among others. Some senior engineering, recruiting, compliance asset management, and tax positions.\*

### Company Distribution by Category

\* Data from 2023.

# California

The state unsurprisingly leads the nation in Web3 with 2000+ companies and 18 unicorns.

## Ecosystem

## Investment

1385 cos. with **\$32B+** in Web3 investments.

Deal Type	Capital Invested
Later-Stage VC	\$11,578.39M
Early-Stage VC	\$10,278.25M
Merger & Acquisitions	\$3,519.48M
Seed	\$2,885.56M
Accelerator/Incubator	\$138.73M

### Number of Investors by HQ location

Total number of Investors: 6275

## Startups

- **3000+ startups** out of 4400+ companies.
- 46 companies raised \$100M+.
- 11 IPOs and 155 M&A deals.
- 19 startups with valuation \$1B+.
- Notable startups:
  - [Forte](#) (2018) raised \$957M.
  - [AIKON](#) (2017) raised \$616M.
  - [Blockdaemon](#) (2017) raised \$494M.
  - [FalconX](#) (2018) raised \$427M.

### Company Distribution by Year Founded

## Incumbents

130 Top 1000 public cos. headquartered, of which **61 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

## Government/Academia

**Focus Areas:** Use of blockchain-related technology in healthcare, supply chain, transportation, communication, energy, and cybersecurity; blockchain architecture for low-power devices and IoT sensors.

**Funding Agencies:** Department of Defense, National Science Foundation, Department of Energy

**Active Universities:** University of California (Berkeley, Los Angeles, San Diego, Santa Cruz), Stanford University, University of Southern California, CalTech

**Top Recipients:** Gridbright, Constellation Network, Ciphertrace, TRM Labs, Stealth Software Technologies

**Federal Funding:** \$8M in Contracts, \$12.27M in Grants, and \$14.6M in SBIR/STTRs

## Additional Activity

- 500+ job postings from several companies: Block, Impact Theory, Hang, Aptos, Nisum, and CoinList, among others. Most positions are developer/engineer, DeFi engineer/trader, data scientist, SecOps.\*

### Company Distribution by Category

\* Data from 2023.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

## MOONBEAM

We analyzed open job postings in the state to determine employers, roles, and salary ranges. This data is as of April 2023.

## Web3 Hiring

Company	Number of Employees	HQ Location	Sector	Positions - Salary Range (per year; estimated)
Block	8521	San Francisco, CA	Payment services to merchants and related services.	<ul style="list-style-type: none"> <li>Bitcoin Regulatory Counsel - \$125K - \$158K</li> <li>Head of Bitcoin Engineering - \$112K - \$142K</li> <li>Software Engineer - Bitcoin</li> <li>Data Science Manager, Crypto - \$93.1K - \$118K</li> </ul>
Impact Theory – Founders Key	56	Beverly Hills, CA	Operator of a weekly interview show. Also, released an NFT collection.	<ul style="list-style-type: none"> <li>Senior Data Analyst - \$90K - \$115K</li> <li>Director, Project Management - \$155K - \$175K</li> <li>Director of Social Media - \$145K - \$175K</li> </ul>
Hang	14	Santa Monica, CA	Developer of an online platform designed to launch loyalty programs, built on next-generation web3 technology.	<ul style="list-style-type: none"> <li>Strategy Lead - \$100K - \$250K</li> <li>Business Operations &amp; Strategy - \$100K - \$160K</li> <li>Frontend Software Engineer - \$120K - \$250K</li> </ul>
Aptos	147	Palo Alto, CA	Developer of a blockchain network intended to provide universal and centralized access to decentralized assets for developers.	<ul style="list-style-type: none"> <li>Software Engineer, Blockchain Core - \$121K - \$153K</li> <li>React Native Engineer - \$91.2K - \$115K</li> <li>IT Support Specialist - \$47.3K - \$59.9K</li> <li>Business Development Lead, Gaming - \$81.9K - \$104K</li> </ul>
Nisum	1924	Brea, CA	Provider of business and IT consultation services, including a <a href="#">Blockchain Lab</a> .	<ul style="list-style-type: none"> <li>Mobile Developer - \$120K - \$130K</li> <li>Technical Positions - \$79K - \$100K</li> <li>Technical Lead - \$135K - \$145K</li> </ul>
CoinList	113	San Francisco, CA	Operator of a token distribution platform intended to connect its community with blockchain projects.	<ul style="list-style-type: none"> <li>Senior Software Engineer</li> <li>Business Operations Manager</li> <li>Product Manager, Trading</li> </ul>

## Federal Funding

Recipient Name	Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)
Gridbright	<ul style="list-style-type: none"> <li>Grant - Develop a secure grid data exchange system using cryptography, peer-to-peer networks, and blockchain ledgers for efficient and secure data sharing among grid participants.</li> </ul>
Constellation Network	<ul style="list-style-type: none"> <li>Contract - Implement end-to-end data security by utilizing blockchain encryption and decentralized hosting for enhanced protection and privacy.</li> </ul>
University of California San Diego	<ul style="list-style-type: none"> <li>Grant - Improve multicenter data sharing by developing a decentralized ledger system for secure and efficient data delivery.</li> <li>Grant - Develop SOCAL, a distributed framework integrating vertical/horizontal modeling and blockchain to securely share clinical data across laboratories.</li> <li>Grant - Create BECKON, a decentralized privacy-preserving genomic medicine modeling framework on blockchain networks to accelerate research and protect privacy.</li> <li>Grant - Develop and validate cryptographic theory for secure internet communication, including signature schemes, encryption, and secure computation protocols.</li> <li>Grant - Create Open Science Chain (OSC), a distributed ledger-based framework to safeguard research data integrity and provenance.</li> </ul>
Ciphertrace	<ul style="list-style-type: none"> <li>Contract - Develop law enforcement tools to investigate alternative cryptocurrencies and enhance digital currency crime investigations.</li> <li>Contract - Provide continued web-based application user access for cryptocurrency investigation purposes.</li> <li>SBIR P1 - Explore blockchain for secure messaging, transactions, and auditability with decentralized ledger.</li> </ul>
TRM Labs	<ul style="list-style-type: none"> <li>Contract - Virtual asset tracing, blockchain analytics, and demixing are all related to the use of blockchain technology in financial transactions and the detection of potential financial crimes.</li> <li>Contract - TRM's software enables compliance teams to detect and prevent fraud, money laundering, and other illicit activities related to cryptocurrencies.</li> </ul>
Stealth Software Technologies	<ul style="list-style-type: none"> <li>SBIR P1 - Proposes a distributed messaging platform with encrypted messages, zero-knowledge authentication, and tamper-proof blockchain ledger.</li> <li>SBIR P2 - Continuing development of DeBLOOM blockchain platform with efficient consensus, on/off-chain storage, controlled access, and advanced security features.</li> </ul>
Xage Security	<ul style="list-style-type: none"> <li>Grant - Develop a blockchain-based security fabric for infrastructure protection, enhancing resilience against cyber attacks through secure communication and data storage.</li> <li>SBIR P1 - Develop a blockchain-based security fabric for the next-generation electrical grid, securing decentralized interactions and heterogeneous nodes, protecting against cyber attacks and enabling interoperability.</li> <li>SBIR P1 - Implement Xage's comprehensive, tamper-proof cybersecurity solutions for industrial operations, ensuring real-time security and avoiding single points of failure.</li> <li>SBIR P2 - Enhance cybersecurity across industrial operations with Xage's tamper-proof software solutions.</li> </ul>
Pronto.AI	<ul style="list-style-type: none"> <li>SBIR P2 - Deploy POLLEN: a decentralized, blockchain-enabled wireless communications network for rapid, private, and anonymous deployment in challenging environments.</li> </ul>

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

# Hawaii

To date Hawaiian Web3 activity is limited to government applications.

## Ecosystem

## Investment

5 cos. with **\$25M+** in Web3 investments.

- Notable startups:
  - [EigenLayer](#) (2021) raised \$164M.
  - [Protego Trust Bank](#) (2018) raised \$104.9M.
  - [Story Protocol](#) (2022) raised \$84M.

### Company Distribution by Year Founded

## Incumbents

15 Top 1000 public cos. headquartered, of which **7 companies** have significant Web3 investment or are implementing/developing Web3 technology:

### Incumbent Distribution by Category

### Investing/Developing/Implementing

(Boeing's HQ is Virginia but has large operations in Washington).

2+ mining facilities

## Government/Academia

**Focus Areas:** Group-to-group collaboration, privacy and consent management enhancement, secure and confidential identity management.

**Funding Agencies:** National Science Foundation, Department of Commerce, Department of Homeland Security

**Active Universities:** University of Washington, Washington State University, Western Washington University

**Top Recipients:** Wicked Co-Op, Xpress Rules, Social Voter Labs

**Federal Funding:** \$1.6M in SBIR/STTRs

## Additional Activity

- 100 job postings from several companies: Circle, Deloitte, HTC, CashApp (Block), Amazon, and Coinbase, among others. Most are remote positions and for tax manager, Android/iOS software engineer, accountant, and security engineer.\*

### Company Distribution by Category

\* Data from 2023.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

We analyzed open job postings in the state to determine employers, roles, and salary ranges. This data is as of April 2023.

## Web3 Hiring

Company	Number of Employees	HQ Location	Sector	Positions - Salary Range (per year; estimated)
Circle	969	Boston, MA	Developer of cryptocurrency-focused financial technology designed to send, receive and invest in cryptocurrency assets around the world.	<ul style="list-style-type: none"> <li>Senior Director, Global HR Operations &amp; Technology - \$215K - \$305K</li> <li>Lead User Researcher - \$150K - \$200K</li> <li>Senior Marketing Research and Insights Manager - \$160K - \$220K</li> <li>Technology Risk Manager - \$135K - \$180K</li> <li>Director, Cloud Security - \$230K - \$315K</li> </ul>
Block	8521	San Francisco, CA	Business Services	<ul style="list-style-type: none"> <li>Staff Software Engineer - \$128K - \$163K</li> <li>Senior iOS Software Engineer - \$117K - \$148K</li> <li>Senior Embedded Security Engineer - \$139K - \$176K</li> </ul>
Bittrex	201	Seattle, WA	Online platform intended to trade crypto currencies	<ul style="list-style-type: none"> <li>Senior Backend Developer</li> <li>Sr. PR and Media Relations Strategist</li> </ul>
Amazon	1.6M	Seattle, WA	Retailing, web services	<ul style="list-style-type: none"> <li>Digital Currency and Blockchain Product Lead</li> <li>Software Development Engineer</li> <li>Global Technical Lead - Blockchain</li> <li>Head of Product</li> </ul>
EigenLayer	12	Redmond, WA	Stake validation marketplace	<ul style="list-style-type: none"> <li>Blockchain Security Lead - \$140K - \$177K</li> <li>Senior Software Engineer, Distributed Systems - \$132K - \$167K</li> <li>Senior Technical Recruiter</li> </ul>
SHRAPNEL	47	Seattle, WA	Developer of video games built on blockchain.	<ul style="list-style-type: none"> <li>Senior Blockchain Engineer</li> <li>General Applicant</li> </ul>

## Federal Funding

### Recipient Name Summary of work being developed with Federal Funding (Contract/Grant/SBIR/STTR)

Wicked Co-Op	<ul style="list-style-type: none"> <li>SBIR P2 - Build software for decentralized organizations to optimize collaboration, innovation, and democratic IT governance using fractal group dynamics.</li> </ul>
XpressRules	<ul style="list-style-type: none"> <li>SBIR P2 - Develop XpressRules-PM: a non-technical toolkit for deploying privacy and consent policies with NGAC, enabling real-time dispute resolution on an IoT information blockchain.</li> </ul>
Social Voter Labs	<ul style="list-style-type: none"> <li>SBIR P1 - Develop a decentralized software platform for democratic group-to-group collaboration, studying many-to-many relationships and leveraging blockchain technology.</li> </ul>
Respect Network	<ul style="list-style-type: none"> <li>SBIR P1 - Develop a decentralized registry and discovery service for DIDs, integrating with the public blockchain for secure identity management.</li> </ul>

We analyzed U.S. federal government investment into the Web3 economy through contracts, grants, and technology commercialization funding (e.g. highly competitive Small Business Innovation Research and Small Business Technology Transfer programs that encourage businesses to engage federal research needs with a focus on commercialization).

**MOONBEAM**

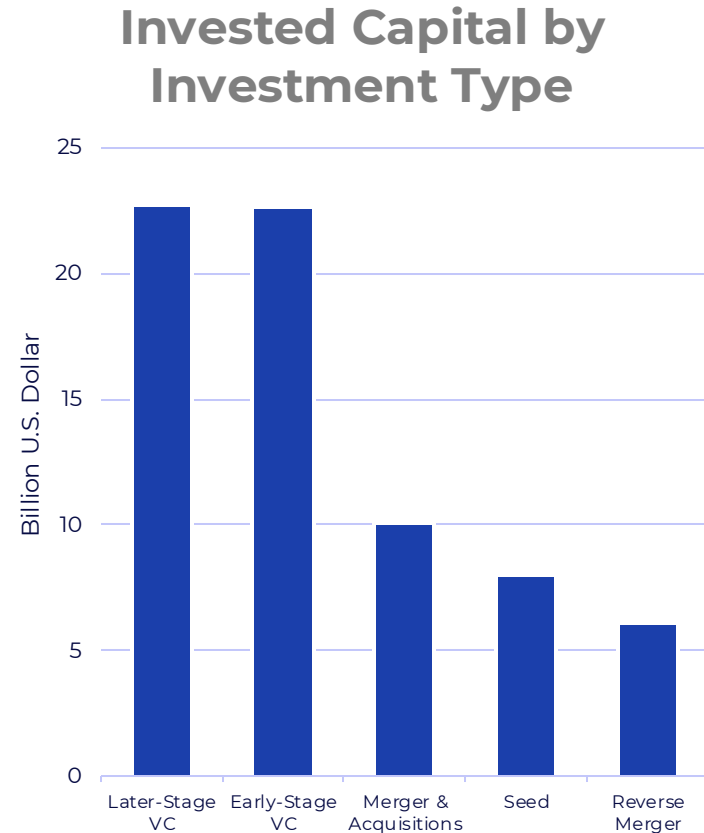

# Major milestones for the US-based Web3 companies include unicorns (45), IPOs (55), M&As (535), and \$100M investment (109).

The Web3 industry in the U.S. witnessed impressive growth with 99 companies securing over \$100M USD in investment, 30 startups reaching unicorn status with valuations exceeding \$1B USD, 46 companies going public through IPOs, and 211 companies engaging in mergers and acquisitions.

# Foreign investment varies widely from state to state with Texas and Georgia as outliers in their respective industries.

Vast majority of investment comes through VC deals (early and later) and Merge and Acquisitions. Initial Coin Offering is starting to appear, but it is not common. While bigger states can attract significant international investment, smaller states, despite having notable companies, fare worse at attracting international investment.

# NSF and DoD lead in overall government investment, while USAID, Interior, and GSA have larger average award sizes.

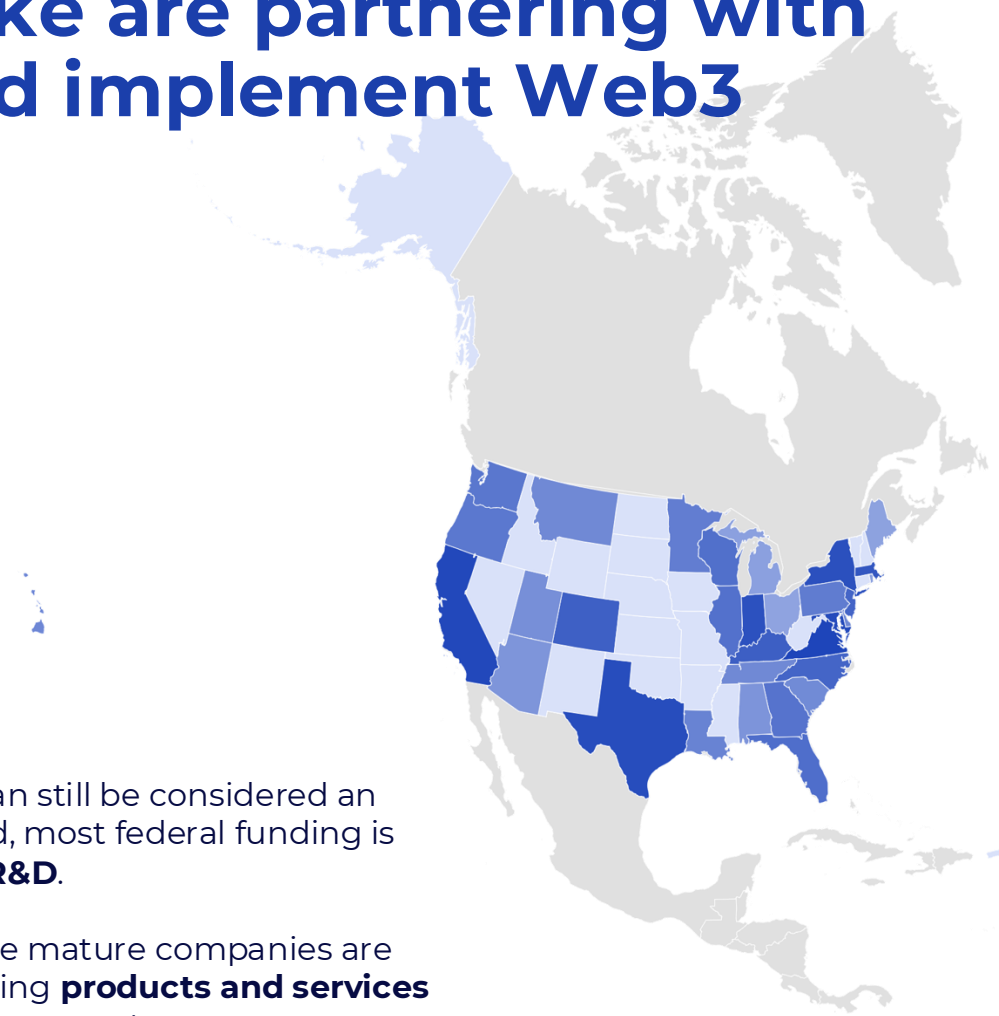

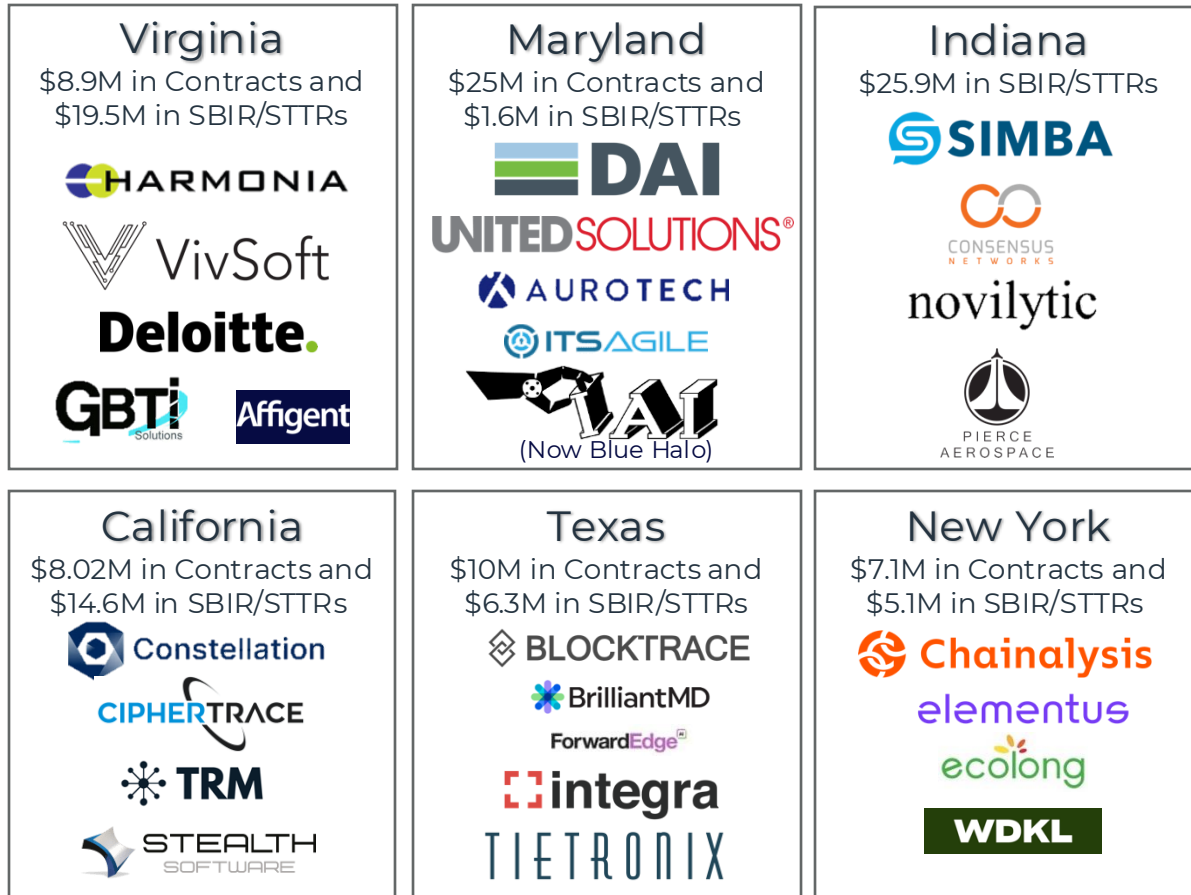

Total Federal Action Obligation by Agency  
(Top 10)

Awarding Agency	Number of Awards	Total Federal Action Obligation	Average of Federal Action Obligation
National Science Foundation (NSF)	220	\$83,438,020	\$379,264
Department of Defense (DOD)	153	\$75,811,117	\$495,497
Department of Health and Human Services (HHS)	23	\$22,238,930	\$966,910
Department of Energy (DOE)	39	\$21,950,528	\$562,834
Department of Treasury (TREAS)	20	\$15,944,962	\$797,248
Department of Justice (DOJ)	26	\$9,444,814	\$363,262
Agency for International Development (USAID)	1	\$9,000,000	\$9,000,000
Department of Homeland Security (DHS)	21	\$7,065,137	\$336,435
Department of Commerce (DOC)	13	\$5,109,262	\$393,020
Securities and Exchange Commission (SEC)	4	\$4,891,864	\$1,222,966
General Services Administration (GSA)	2	\$2,997,497	\$1,498,749
Department of the Interior (DOI)	1	\$2,355,079	\$2,355,079
Department of Agriculture (USDA)	7	\$2,178,613	\$311,230
Department of Transportation (DOT)	5	\$1,896,950	\$379,390
National Aeronautics and Space Administration (NASA)	8	\$1,633,964	\$204,245
Department of State (DOS)	8	\$1,149,477	\$143,685
Environmental Protection Agency (EPA)	3	\$259,693	\$86,564
Institute of Museum and Library Services (IMLS)	1	\$100,000	\$100,000
Government Accountability Office (U.S. GAO)	2	\$58,586	\$29,293
Consumer Financial Protection Bureau (CFPB)	1	\$24,900	\$24,900

Government interest has been growing in the past years, with a total of \$267M spent by several U.S. Agencies for the past 10 years. Funding was mainly focused on the **implementation of Web3** to its full potential, mainly in sectors like **Healthcare, Finance, Cybersecurity, and Energy**, while cryptocurrency is being actively tracked from the regulation/control point-of-view. Meanwhile, significant efforts are being implemented to tackle workforce scarcity through college-level training.

# Small companies and incumbents alike are partnering with government to research, develop, and implement Web3 solutions.

Since Web3 can still be considered an emerging field, most federal funding is dedicated to **R&D**.

However, some mature companies are already providing **products and services** to the U.S. government.

# Academic activity comes through federal grants and high-impact R&D.

Academic Activity 0.2 10.0

**Honorable Mentions**

Impactful R&D and expanding curriculum

**W**  
UNIVERSITY of WASHINGTON

**GT** Georgia Tech.

**Carnegie Mellon University**

**Portland State University**

**UNIVERSITY OF WYOMING**

All academic indicators regarding Web3 are **growing** and becoming **nationwide**: federal funding through grants, number of peer-reviewed papers, among others.

# Incumbents in certain sectors, like Financials, Technology, Retail, Media, and Health Care, are the most active.

	Developing/Implementing	Investing
<b>Consumer Products and Services (B2C)</b>	103	19

## The State of Web3

# Methodology and Terms Defined

# Methodology Overview

## Overview

This report seeks to provide an extensive assessment of the economic activity, impact, and innovation potential of Web3 technology across the 50 U.S. States, the District of Columbia, and Puerto Rico (50+2).

It aims to identify the strengths and opportunities of each state's Web3 ecosystem across the 5 dimensions. The report also seeks to highlight best practices and opportunities for collaboration within and across states to foster a thriving Web3 ecosystem that can drive economic growth, create jobs, and improve the lives of citizens.

Ultimately, the goal of the report is to provide policymakers, investors, entrepreneurs, and researchers with actionable insights that can inform their decisions and contribute to the continued development and adoption of Web3 in the United States.

To achieve this, Moonbeam analyzed economic activity across five primary dimensions: (1) Startup activity (2) Incumbent activity (3) Investor activity (4) University research and (5) Government funding.

This methodology was informed by:

- Daniel Isenberg's "Domains of the Entrepreneurship Ecosystem" model ([link](#)),
- "Innovation Ecosystems" by Thomas & Autio ([link](#)),
- MIT Sloan Heat Map (Strategically Engaging with Innovation Ecosystems) ([link](#)).

## Web3 Defined

To support this analysis, we targeted several key technology areas related to the advancement of the Web3 technologies and industry. We built a term adjacency map to connected concepts centralizing around:

- Blockchain
- Distributed Ledger
- Web3
- NFT/NFT Technology/Non-Fungible Tokens
- Decentralized Finance/ DeFi
- Decentralized Autonomous Organization
- Crypto
- Cryptocurrency / Bitcoin
- Digital Asset/Digital Asset Management
- Verifiable Credentials
- Decentralized Identity
- Stablecoins
- Self-Sovereign Identity
- Token
- Tokenomics
- Tokenmetrics
- Crypto Assets

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

**MOONBEAM**

[gbbc.io/us-blockchain-coalition](https://gbbc.io/us-blockchain-coalition)

## Partners

## Blockchain Ecosystem Benchmarking

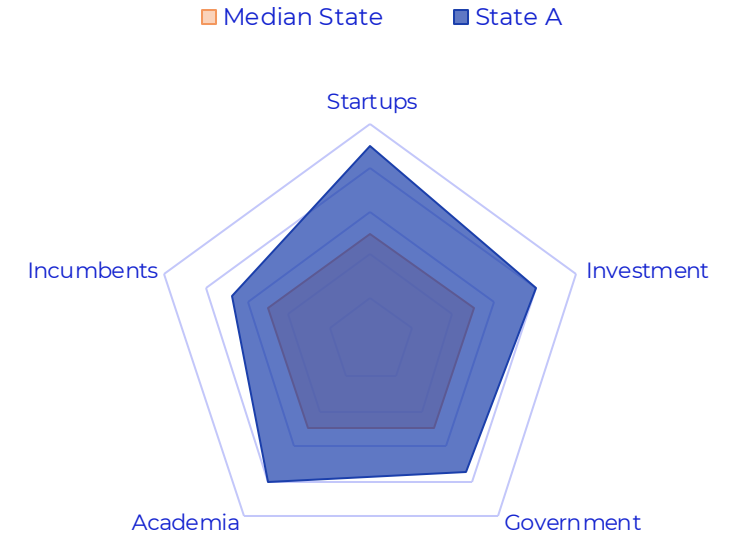

Moonbeam analyzed economic activity across the five primary dimensions.

1. Startup activity
2. Investor activity
3. Government activity
4. Academia activity
5. Incumbent activity

After data was collected, cleaned, and normalized, each feature was ranked individually, and all features within a category were averaged to get a single value between 0 (low) and 10 (high). Moonbeam performed a median of all values within a category to generate an average state, to which all states were compared.

A minimum value of 0.2 (instead of zero) was given to the lowest rank, to account for other sources of data not evaluated in this report (e.g. other incumbents outside the Top 100 public companies by revenue, government policies, masters and specific courses focusing on Web3 in Academia).

### Sample Ecosystem Benchmark

### Key Indicators

We evaluated economic indicators across the following activity areas:

Startup Activity	Investment Activity	Government Activity	Academia Activity	Incumbents
<ul style="list-style-type: none"><li>• Number of startups</li><li>• Number of startups with high investment activity (startups with +\$100M total raised, or IPO deals, or M&amp;A deals)</li></ul>	<ul style="list-style-type: none"><li>• Total number of investors</li><li>• Total amount invested</li><li>• Total number of US-based investors</li><li>• Total number of international investors</li></ul>	<ul style="list-style-type: none"><li>• Total Number of Contracts and SBIR/STTRs</li><li>• Total Awarded Amount</li></ul>	<ul style="list-style-type: none"><li>• Total Number of Grants</li><li>• Total Awarded Amount</li><li>• Number of scientific papers</li></ul>	<ul style="list-style-type: none"><li>• Total number of incumbents</li><li>• Total number of incumbents developing or implementing Web3</li><li>• Total number of incumbents investing in Web3</li></ul>

## Data Collection & Analysis

Moonbeam evaluated Web3 related activity across the 50+2 jurisdiction across five major activity categories. Here are some examples of what each dimension measured:

- **Startup** – Total number of startups, amount and type of funding received, year of foundation, number of employees, business status, company category, number of startups with a valuation of over one billion USD.
- **Investors** – Number and origin of investors, number of investments, stage of deals, deal success as measured by exits and acquisitions, total capital invested and top funding recipients per state.
- **Incumbents** – Limited to incumbents on the Top 1000 public companies by revenue by doing a broad search for press releases and news pieces detailing examples of developing/implementing Web3 or collaborating with other companies to implement/develop Web3. Other inputs included finding any history of investing in Web3-related companies and, whenever possible, if currently (or were in the past) hiring for Web3-related jobs.
- **Academia** – Grant and R&D funding activity related to Web3. Google Scholar was used to evaluate the scientific output via published papers in peer-reviewed scientific magazines and repositories, for several universities and research institutes nationwide.
- **Government** – Primary focused on government funded research through contracts, grants and technology commercialization activities through the Small Business Innovative Research (SBIR)/Small Business Technology Transfer (STTR) program.

Additionally, we also checked job postings using several online sources, detailing number, positions, companies, and estimated annual salary ranges, whenever possible.

Finally, we also checked several US-based and international mining facilities, listing their mining locations in the U.S., their revenue, and other relevant statistics.

Our data sources cover a wide range of innovation indicators, including company formation, patent activity, venture capital investment, government contracts and grants, job opening, incubator/accelerator classes, expert interviews, corporate demand signals, commercialization funding, and conference proceedings, government contracts, government research budgets, corporate demand signals, corporate spending, university research, university commercialization activities, expert analysis, and job postings and other job activity.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

**MOONBEAM**

©2024 GBBC U.S. Blockchain Coalition. All rights reserved. This report, including its content, design, and intellectual property, is protected by copyright laws. No part of this report may be reproduced, distributed, or transmitted in any form or by any means, without the prior permission except in the case of brief quotations embodied in critical reviews and certain other non-commercial uses permitted by copyright law. For permissions and inquiries, please contact Arry Yu ([arry.yu@gbbccouncil.org](mailto:arry.yu@gbbccouncil.org)).

## Approach, Assumptions, and Limitations

When working with data related to economic activity across the five previously mentioned primary dimensions, it is necessary to make certain assumptions during the data cleaning and processing stages as we normalized the data for the study.

It is essential to ensure that the assumptions are transparent and labeled, particularly if there is a desire to transform the analysis into a real-time or recurrent analysis, as definitions, parameters, and categorizations may change in the world, needing corresponding adjustments in our analysis to maintain its accuracy and statistical reliability.

It is important to note that the databases on the Moonbeam platform are regularly updated, resulting in potential changes to the obtained results with each subsequent search. While this is a factor to consider, it does not significantly impact the performance of the analysis, as the focus is predominantly on historical data from 2007 up until the conclusion of 2023. Job postings data is a snapshot of what was posted online (Indeed, LinkedIn, Google Jobs) during the April/May 2023 timeframe.

Within the data science process, the first step involves the cleaning and transformation of variables, which can encompass handling unknown/null values, removing duplicates, correcting erroneous data inputs, and creating new variables, among other actions. Following this step, descriptive analysis is undertaken, wherein the data is filtered and grouped to gain an understanding of each variable behavior.

According to this methodology, California, with its four major metropolitan areas and exemplar universities rates very high. Meanwhile, smaller (by population) states like Alaska and Wyoming have less activity. Where possible, we tried to highlight activity in each state, but took care to not over represent activity in smaller states because we had more space to fill. As such, for states like California, Texas, Washington, etc. we have included an additional page of information.

**The State of Web3:** A state-by-state analysis of the Web3 economic activity in the U.S. (US-2024)

# Terms and Definitions used in this Report (pg. 1 of 2)

Term	Definition
Bitcoin	The most well-known cryptocurrency, based on the proof-of-work blockchain. Bitcoin was created in 2009 by an unknown creator, Satoshi Nakamoto, and its technology was outlined in a whitepaper titled, "Bitcoin: A Peer-to-Peer Electronic Cash System". Bitcoin established the first decentralized digital asset and uses blockchain technology to create a digital asset that is entirely decentralized and managed across a wide network of computers (nodes) rather than by a single centralized entity.
Blockchain	Type of distributed ledger, composed of unchangeable (immutable), digitally recorded and validated data in chronologically ordered packages called blocks, managed by a cluster of computers, not owned by any single entity. Each block is then 'chained' to the next block, using a cryptographic signature, creating a long chain. The nature of the cryptographic tie from one block to previous blocks means that previous blocks cannot be altered by anyone. This allows block chains to be used like a ledger, which can be shared and accessed by anyone.
Distributed Ledger	Larger class of technology which includes blockchain, where transactions are recorded in multiple copies without central authority or data storage, whether they are permissioned or unpermissioned.
Web3	In the context of Ethereum, refers to the decentralized apps that run on the blockchain. These are apps that allow anyone to participate without monetising their personal data. Some limitations include scalability (decentralization slows down transactions), user experience (it takes a lot of extra steps/software to interact with it), accessibility (it's not yet integrated in modern web browsers), and the cost (it's expensive to put anything on the blockchain). Benefits, mainly due to decentralization, include: <ul style="list-style-type: none"> <li>Anyone on the network has permission to use the service. Service is permissionless.</li> <li>No one can block you or deny you access to the service.</li> <li>Payments are built in via ether (ETH).</li> <li>Ethereum is turing-complete, which means that anything can be programmed on it.</li> </ul>
Non-Fungible Token (NFT)	Special type of cryptographic token that is a representation of a unique digital asset that is not interchangeable. This is in contrast to cryptocurrencies like Bitcoin, and many network or utility tokens that are fungible in nature. A non-fungible token is a digital certificate of authenticity used to assign and verify ownership of a unique digital or physical asset. Unlike fungible tokens, NFTs are not interchangeable with one another.
Decentralized Finance (DeFi)	Financial decentralized applications (dApps) and tools built on the blockchain. Short for "decentralized finance," an umbrella term for a variety of financial applications geared toward disrupting financial intermediaries.
Decentralized Identifier (DID)	Type of identifier that enables verifiable, decentralized digital identity. A DID refers to any subject (e.g., a person, organization, thing, data model, abstract entity, etc.) as determined by the controller of the DID. In contrast to typical, federated identifiers, DIDs have been designed so that they may be decoupled from centralized registries, identity providers, and certificate authorities. Specifically, while other parties might be used to help enable the discovery, or verification of information related to a DID, the design enables the controller of a DID to prove control over it without requiring permission from any other party. DIDs are URIs that associate a DID subject with a DID document allowing trustable interactions associated with that subject.

# Terms and Definitions Used in this Report (pg. 2 of 2)

Term	Definition
Decentralized Autonomous Organization (DAO)	A DAO in general is a governance structure that contains a set of predefined rules in a smart contract to review “good behavior” and penalize “bad behavior”. Generally, DAOs can be thought of as corporations that run without any human intervention and surrender all forms of control to an incorruptible set of business rules. Also called a DAC - a Decentralized Autonomous Corporation.
Token	Can have different definitions depending on the context: <ul style="list-style-type: none"> <li>• A security token is a token that represents a share of the company.</li> <li>• A stable token is a token that has a relative fixed value in relation to another currency.</li> <li>• A utility token is a token with a utility besides value.</li> </ul>
Tokenomics	Tokens + economics and is the token structure, management and distribution.
Tokenmetrics	Tokenmetrics refers to the analysis and evaluation of various metrics or factors related to a cryptocurrency or token. It involves assessing quantitative and qualitative data to gain insights into the potential performance and value of a token.
Crypto Assets	Crypto assets, also known as cryptocurrencies or digital assets, are digital or virtual forms of money or value that use cryptography for secure transactions and to control the creation of new units.
Stablecoin	Type of cryptocurrency that’s backed by a stable asset such a gold or traditional fiat currency, known as pegging. Blockchain is also being used to digitize other assets, such as cars, real estate and even artwork. Stablecoin is any cryptocurrency pegged to a stable asset, like fiat or gold. It theoretically remains stable in price as it is measured against a known amount of assets not subject to change. A token with its value pegged to another asset. Stablecoins are usually backed by a fiat currency, like the U.S. dollar. It can also be pegged to physical assets like precious metals, or even other cryptocurrencies like bitcoin.
Self-Sovereign Identity (SSI)	Identity that is owned only by the user, typically built on a decentralized system that doesn’t involve any third-party.
Decentralized Identity	Decentralized Identity (DID) refers to a digital identity management system that provides individuals with control over their personal data and identity information without relying on a central authority. It is based on the principles of self-sovereign identity, where individuals have ownership and control over their own identity and can selectively share personal information as needed.

# Team

## Collaboration between Web3 and Technology Industries

The U.S. Blockchain Coalition (USBC), the report owner, teamed up with the Washington Technology Industry Association (WTIA) and key active state blockchain industry groups, startups, and anchors to fund and ensure breadth of input for this report and to validate its findings.

**Arry Yu**

Executive Director & Co-Founder, USBC

- Founder/Chair of the [Cascadia Blockchain Council](#)
- Co-Founder/Co-chair of the [U.S. Blockchain Coalition](#)
- Adjunct Professor and Educator in Emerging Tech.
- Serial entrepreneur
- 22+ years Qualitative/ Quantitative Strategy Work

## Research Team

Moonbeam’s analysis team has deep expertise in analyzing innovation ecosystem data and has worked with corporate innovation groups, governments, startups and VC funds to identify trends in emerging technology areas.

**Nirav S. Desai**

CEO

- 20+ years consulting, 10+ years in corporate innovation
- Deep expertise in emerging technology for enterprises
- Degrees in Math, Computer Science, and Philosophy

**Raquel Jacinto, PhD**

Sr. Data Scientist

- 10+ years data analysis.
- Degrees in Developmental Biology and Data Science.
- Developed 70+ reports on technologies, including Quantum, Autonomous Vehicles and LiDAR, HealthTech, LegalTech, and Robotics.

## MOONBEAM

Moonbeam Exchange, LLC, who produced this report, has no connection or affiliation with Moonbeam Network or the Moonbeam Network Platform.

The Moonbeam platform brings together over 100 data sources, tracking innovation indices such as startup activity, venture investment, government research funding, job postings, etc. Additionally, we incorporate data and analysis from trusted authorities on the innovation economy like Pitchbook and Crunchbase.

# About the U.S. Blockchain Coalition (USBC)

The U.S. Blockchain Coalition is a coalition of state blockchain associations across the country cooperating to ensure the United States is a leader in blockchain, Web3, and distributed ledger technologies (DLT).

We do this by:

- **Aligning and collaborating** on public policy and legislative priorities.
- **Finding opportunities** to partner on projects that enhance the competitiveness of the U.S., different regions, and individual states.
- **Sharing** best practices for economic development and building strong, supportive regulatory environments.
- **Highlighting and cataloging** use cases across the country.
- **Providing** accessible education to policymakers.
- **Building** relationships with regulatory bodies and agencies.
- **Proactively seeking out** new partnerships with industry, government, academia, and investors to meaningfully grow the sector across the country.

USBC members and partners are working together to break down the fragmentation and silos to establish a strong baseline of a credible data-informed proactive strategy to build future legislation in a way that supports a flourishing blockchain, DLT, and digital asset industry.

We support startups and companies by creating a more coherent environment to operate in, state by state.

# About Moonbeam

MOONBEAM

**Global Blockchain Business Council** selected **Moonbeam Exchange** to develop this report based on Moonbeam's team deep expertise in innovation ecosystem data. Moonbeam has worked with corporate innovation groups, governments, startups and VC funds to identify trends in emerging technology areas and develop specific program solutions for our clients.

**Moonbeam Exchange** is a data science platform that leverages over 100 data sources to provide intelligence and insight to the entire innovation ecosystem. Exchange uses a brokerage network to help startups, corporate innovation labs, and economic development organizations accelerate the pace of innovation through better understanding and opportunities to co-create.

At Moonbeam, we blend our deep industry knowledge, an extensive data science platform, and unconventional thinking to provide unparalleled consulting services. With our proven methodologies in market intelligence, innovation programs, and strategic sourcing, we help our clients' insight into and access to global innovation ecosystems to transcend limitations and achieve unprecedented success.

**Moonbeam** and the **U.S. Blockchain Coalition** partnered in 2023 to develop a detailed dataset of economic activity in the Web3 sector. As this is a rapidly growing and changing sector, we plan to annually refresh this dataset and issue updates to this report.

## What we do

- Innovation Programming
- Market Insight Reports
- Strategic Sourcing & Technology Scouting

## Who we work with

- Corporate Innovation Teams
- Economic Development Organizations
- Startups and Nonprofits
