

SAMPLE STATEMENT OF PURPOSE FOR MEDICAL STUDIES

Below is a sample statement of purpose written by a student applying to a University abroad for Medicine.

Sample 1:

Name of the applicant: **Manvinder Singh**

Course applied: **Medicine and Surgery MBChB**

My earliest memory of being in a hospital is when I was six years old; my grandfather had suffered a heart attack and was rushed to a hospital. He was admitted there for a week, and recovered successfully after surgery. When I saw the sense of relief in my parents; I decided that one day I would become a doctor and help save the lives of the sick and injured.

This was not an idle childish dream and I steadfastly focused on making my dream come true by concentrating on my studies. I have passed my Higher Secondary Exam with 96% scoring full marks in Botany, Chemistry and Physics.

I aspire to study medicine and become a doctor; my ambition is to become a cardiologist similar to the doctor who saved my grandfather's life. I have chosen the University of Birmingham because it offers an integrated learning programme and is one of the finest universities in the UK. Additionally, my maternal uncle lives with his family in Birmingham and if my admission is confirmed, I will get to live with my uncle and attend college as a day scholar.

I would be extremely happy if I am selected and get a chance to study Medicine at the University of Birmingham and get to fulfill my childhood dream of becoming a doctor.

Please note: The statement of purpose written above is from the point of view of a student who has just completed his Class XII exams and is simple and precise.
