GDIT

Multi-domain Intelligence Solutions

Discover intelligence in action.

Using proven intelligence processes and methodologies, GDIT's intelligence professionals integrate tradecraft, tools, data and technology to meet our customers' evolving needs. From foreign militaries to climate change, our intelligence professionals leverage SIGINT, HUMINT, GEOINT, MASINT, OSINT and all-source intelligence analysis and methods to anticipate, visualize, describe and solve multi-domain, complex security challenges. We inform mission planning, anticipate activities, and empower decision-makers by delivering a full range of intelligence services to protect our customers in competition, crisis and conflict.

BUILT ON PROVEN INTELLIGENCE PROCESSES

GDIT delivers foundational intelligence expertise, from all-source intelligence analysis to streamlined production support, tailored to customer priorities while also leveraging advanced analytics technology to provide solutions for analysis, operations, synchronization, and partner engagement.

COLLABORATION DRIVING INNOVATION

We form strategic alliances with key stakeholders and industry leaders to deliver comprehensive solutions. Our strong relationships with government agencies enable successful multi-agency collaboration.

TECHNOLOGY AHEAD OF THE CURVE

We leverage the latest technology to enhance intelligence capabilities. Our Digital Accelerators, including integrated AI, machine learning, and robust cybersecurity solutions ensure our clients stay ahead of emerging threats.

UNMATCHED EXPERTISE

GDIT offers customized training programs designed to meet the unique needs of intelligence and cybersecurity personnel. Our tradecraft-compliant, hands-on training ensures operational readiness and continuous learning.

ENABLING GLOBAL INTELLIGENCE OPERATIONS

GDIT has extensive experience in deploying intelligence capabilities worldwide and enabling intelligence sharing with allies and partners. Our global reach ensures critical intelligence can be accessed and used when or wherever the mission calls.
