INFORMATION SECURITY REQUIREMENTS IMPLEMENTATION AND VIRTUAL CISO SUPPORT

OVERVIEW

Information security is often a top priority for companies with regard to the confidential or sensitive information they hold in relation to their business practices. Information security should also be a top priority for companies with respect to the personal information about customers, clients, and employees they collect and maintain. It is critical for companies to ensure they have the processes and methodologies in place to safeguard confidential, sensitive, and personal information from unauthorized access, use, misuse, disclosure, destruction, modification, and/or disruption.

OUR SERVICES

Our Privacy and Cybersecurity Solutions Group operates under our Global Privacy and Cybersecurity Practice Group and is a unique blend of legal expertise and consultants that operate under the umbrella of the law firm. This provides two important benefits to our information security that we provide to clients: 1) Our work can be delivered under attorney-client privilege; and 2) Our recommendations have the weight and support of a respected, established, global law firm where we have reach-back capabilities to attorneys who have deep experience in U.S. and international legal issues in the areas of privacy and cybersecurity. Furthermore, as a leading law firm in the U.S., we have provided advice and support to hundreds of companies across all market sectors.

The dynamic nature of our practice, which marries exemplary legal support with experienced consultants, means that we can help you operationalize information security requirements while also providing you with an understanding of legal risk and exposure related to the law.

We can provide the following information security services:

- **Virtual Chief Information Security Officer (“CISO”) Support.** Where appropriate, members of our Solutions Group have entered into secondment-like relationships with our clients to assist with compliance activities and general information and technical security issues. This allows us to provide guidance on the practical application of information security and technology policies and procedures on a more intimate level with our clients. We become an organizational resource that has a dedicated focus on information security within the organization in a cost-effective and flexible manner.
- **Bridging the Gap.** Our Solutions Group is highly skilled in working with all business unit areas of information security, including the technical, programmatic, and legal side of any organizational information security program.
- **Document Review and Development.** We can enhance your current internal policies and procedures, as well as create new documentation to support your information security program. Our team has extensive experience in creating program documentation that is both legally sufficient

Company Information Security and Privacy programs should be in constant communication and should be working together on a day-to-day basis to ensure information remains private and secure.

to meet regulatory requirements and customized to your unique business needs and functionality. We routinely work with clients to integrate information security compliance efforts into the broader compliance activities of the company, and while we have a library of tried-and-true templates, we work closely with our clients to ensure that any documents we produce are usable, workable guidelines that their businesses can easily follow.

- **Security Compliance Gap & Risk Assessments.** We can provide you with an easy-to-understand, actionable assessment that provides you a clear picture of where your information security program is now compared to where you need to be to comply with industry information security best practices and in comparison to other similarly situated companies.
- **Remediation Roadmap Development.** Based on the compliance gap assessment, we can provide you with a prioritized, systematic guide for remediating those identified gaps, and provide guidance on who in your organization should be responsible for implementing each action item and what additional tools or resources you may need.
- **Data Mapping.** Our consultants are experienced at creating detailed data maps based on your documents and data collection, storage, sharing, and destruction practices. When necessary, we also collaborate with experienced technical firms to provide support for implementation and operationalization of data mapping tools.

ABOUT PAUL HASTINGS

Paul Hastings provides innovative legal solutions to many of the world's top financial institutions and Fortune 500 companies in markets across Asia, Europe, Latin America, and the United States.

We offer a complete portfolio of services to support our clients' complex, often mission-critical needs—from structuring first-of-their-kind transactions to resolving complicated disputes to providing the savvy legal counsel that keeps business moving forward.

Since the firm's founding in 1951, Paul Hastings has grown steadily and strategically along with our clients and the markets we serve. We established successful practices in key U.S. and European cities, creating a broad network of professionals to support our clients' ambitions. In addition, we were one of the first U.S. law firms to establish a presence in Asia, and today we continue to be a leader in the region. Over the past decade, we have significantly expanded our global network of lawyers to assist our clients in financial centers around the world, including the emerging markets of Latin America.

Today we serve our clients' local and international business needs from offices in Atlanta, Beijing, Brussels, Century City, Chicago, Frankfurt, Hong Kong, Houston, London, Los Angeles, New York, Orange County, Palo Alto, Paris, San Diego, San Francisco, São Paulo, Seoul, Shanghai, Tokyo, and Washington, D.C.

Drawing on the firm's dynamic, collaborative, and entrepreneurial culture, our lawyers work across practices, offices, and borders to provide innovative, seamless legal counsel—where and when our clients need us.
