

# Let's get together.

**Drawer & Cubby Configurations**

THUMA

Take care during assembly. For safety, carefully follow assembly instructions. Keep units horizontal while stacking, hold pieces in place and check all four sides to ensure they are properly nested and fully secured. Avoid balancing pieces unsupported and do not bend over around unsecured pieces. Keep children out of the way during assembly.

**IMPORTANT**

Do not stack higher than 47".

Stacking higher than 47" can cause units to topple over if pulled on.

Designed to be modular and adaptive.

Examples of product configurations include:

Drawer and Cubby configurations are interchangeable, modular, and adaptable. Revisit order confirmation to view configuration purchased.

Scan for additional configuration inspirations and to purchase additional units.

# Base Units & Stacking Units

**Stacking Units are labeled with a white sheet.**

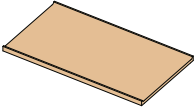

These units stack on top of other units.  
Do not place on the floor.

**Base Units are weighted and labeled with a black sheet.**

These units are to be placed on the floor.  
Do not stack on top of other units.

# The Pieces

Number of pieces included is determined by the product configuration purchased.

**Top Tray** 

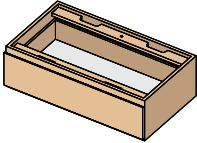

**Leveler**  As needed, see p10.

**Long Screw** 

**Drawer**

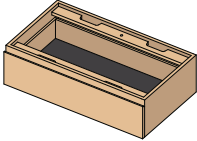

**STACKING UNIT**

Piece labeled with a white sheet.

**BASE UNIT**

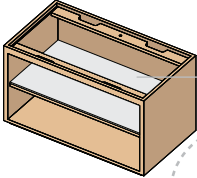

Weighted piece labeled with a black sheet.

**Cubby**

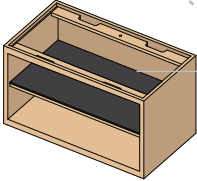

**STACKING UNIT**

Piece labeled with a white sheet.

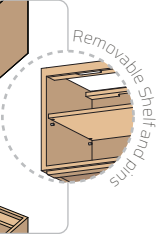

**BASE UNIT**

Weighted piece labeled with a black sheet.

*Removable shelf and panel*

# Step 1

Lay out all pieces.

Lift **base unit** by the handles and place it at desired location.

**Set up all base units received with black sheets first.**

Lift Handles

Recommended to lift with a friend.

## Step 2

- A. Lift **stacking unit** and place on top of base unit. Drawer and Cubby stacking units can be stacked on top of any units. Check all four sides to ensure stacking unit is properly nested.
- B. Use **Long Screw** to secure the stacking unit to the base unit through the **lower hole**. Tighten by hand.

Securing a Drawer

Securing a Cubby

# Step 3

Repeat **stacking** and **securing** units until desired configuration is reached.  
Ensure there is no gap between stacks if configuration expands horizontally.

## IMPORTANT

Do not stack higher than 47".

Stacking higher than 47" can cause units to topple over if pulled on.

# Step 4

A-C. Slide the Top Tray from the front, skis facing down, on the topmost Drawer or Cubby.

Check all four sides to ensure Top Tray is properly nested. No screw needed.

Remove all sheets.

Repeat step as needed.

# Levelers

Skip this step if floor is level.

If not, use levelers on each base unit.

- A. When flipping Cubby, remove the Shelf first. Flip the **base unit** at a 90° angle.
- B. Screw in Levelers at each corner to level the product with the floor, then flip base unit back to horizontal position. Adjust each Leveler to ensure product sits evenly and securely, without rocking.

Repeat this step as needed.

# Anti-Tipping Hardware

To prevent risk of serious injury due to furniture tipping over, secure unit to the wall using anti-tipping hardware included.

Number of pieces included is determined by the product configuration purchased.

Cable

Wall Screw

Wall Anchor

Short Screw

*Only for configurations including Cubby.*

# Step 5

If the topmost unit is a Drawer, remove the Top Tray and the Long Screw first.  
Mark on the wall through the opening.

Repeat as needed.

For Drawers, open the topmost drawer to access the opening.

Drawer

Cubby

## Step 6

Rotate the product so it sits at a 90° angle from the wall.

# Step 7

A. Drill hole in wall with a 9/32" drill bit.

B. Hammer the wall anchor into the hole.

C-D. Secure cable to wall with wall screw.

## Step 8

Rotate the product toward the wall, but leave a bit of space in-between for the final steps.

## Step 9

Pass the cable through the opening on the back of the topmost Drawer or Cubby.

This is the same opening used to mark the wall.

Drawer

Cubby

# Step 10

Use the Long Screw or Short Screw to attach the cable to the Drawer or Cubby.  
Tighten by hand.

Drawer

Cubby

# Step 11

Push the product against the wall. Align additional stacks, as desired.

# Step 12

A-C. Slide the Top Tray from the front, skis facing down, on the topmost Drawer or Cubby.

Check all four sides to ensure Top Tray is properly nested. No screw needed.

Repeat step as needed.

# Enjoy.

Light a candle, play some jams, pour a refreshment.
