

Let's get together.

The Dresser

THUMA

Take care while assembling The Dresser. For safety, carefully follow assembly instructions. Keep drawers horizontal while stacking, hold pieces in place and check all four sides to ensure they are properly nested and fully secured. Avoid balancing and do not bend over around unsecured pieces. Keep out of the way of children.

The Pieces

Top Tray

x1 for 2V, 3V, 4V
x2 for 4H, 6H, 8H

Ski

Drawer

x2 for 2V
x3 for 3V
x4 for 4V, 4H
x6 for 6H
x8 for 8H

Lift Handle

Drawer Handle

Opening

Leg (Optional)

x4 for 2V, 3V, 4V
x8 for 4H, 6H, 8H

Screw

x1 for 2V
x2 for 3V, 4H
x3 for 4V
x4 for 6H
x6 for 8H

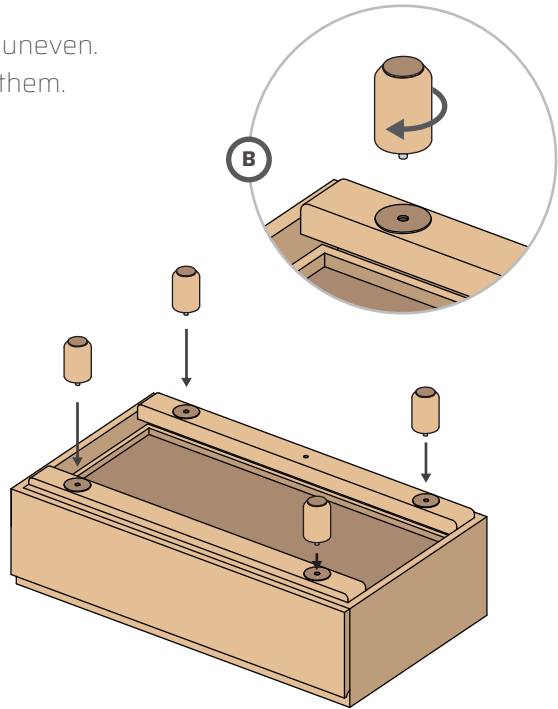

Step 1 (Optional)

Legs are recommended as levelers if your floor is uneven. Skip this step if you'd prefer The Dresser without them.

A. Flip any drawer upside down.

B. Screw in the legs at each cork pad.

For 4H, 6H, 8H configurations, repeat this step with a second drawer.

Step 2

If you completed Step 1, use the drawer with legs. Otherwise, select any drawer by the lift handles and place it where you'd like The Dresser to stand.

This is the bottom drawer.

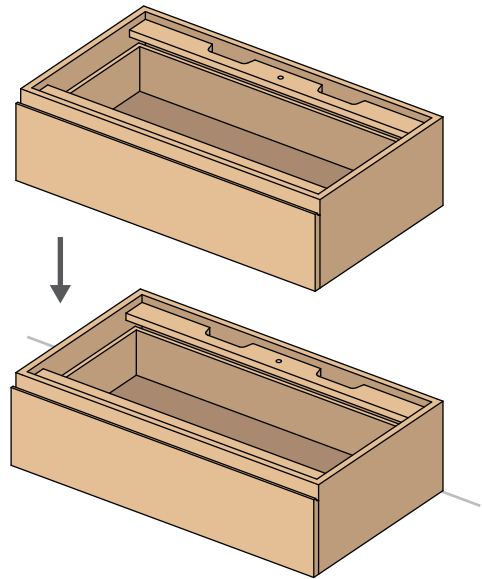

Step 3

A-B. Stack the second drawer on top of the bottom one.

Check all four sides to ensure drawers are properly nested.

View from front

Step 4

A. Open the top drawer using its handle.

B. Use a screw to secure the top drawer to the bottom one. Tighten by hand.

Step 5

A. Repeat Step 4, stacking and securing the drawers until the desired configuration is reached.

B. If you'd like to stack the drawers next to each other for a horizontal configuration, ensure there is no gap between the drawers when placed side by side.

Do not stack more than 5 drawers vertically.

Step 6

A-C. Slide the top tray from the front with skis facing down on the last topmost drawer.

Check all four sides to ensure top tray is properly nested.

And you're all set.

For 4H, 6H, 8H configurations, repeat this step with the second drawer stack.

Before using this product, we recommend securing it to the wall with enclosed anti-tipping hardware.

Enjoy.

Light a candle, play some jams, pour yourself a refreshment.

Anti-Tipping Hardware

To prevent injury or damage from unexpected tipping of furniture, we recommend installing the anti-tipping kit included with this product.

Cable

x1 for 2V, 3V, 4V
x2 for 4H, 6H, 8H

Wall Screw

x1 for 2V, 3V, 4V
x2 for 4H, 6H, 8H

Wall Anchor

x1 for 2V, 3V, 4V
x2 for 4H, 6H, 8H

Step 1

Remove top tray and screw on the last drawer.
Pull out top drawer and draw a mark on the wall through the opening, then close the drawer.

For 4H, 6H, 8H configurations,
install two anti-tipping hardware, one on each drawer stack.

Step 2

Rotate dresser at a 90° angle.

Step 3

A. Drill hole in wall with a 9/32" drill bit.

B. Hammer the anchor in the hole.

C-D. Secure cable to wall with wall screw.

Step 4

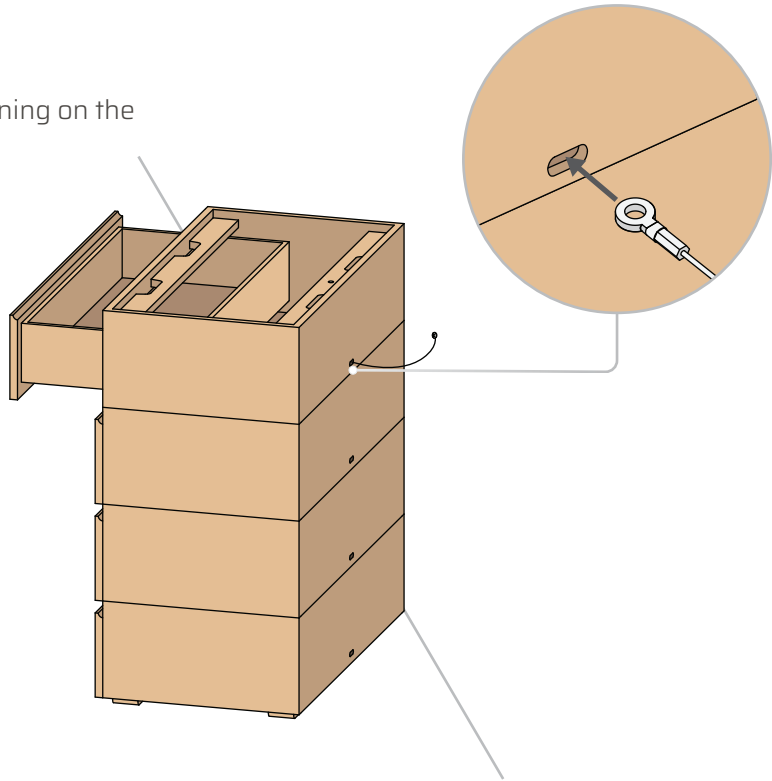

Rotate The Dresser towards the wall,
leaving a bit of space between it and the wall.

Step 5

Pass the cable through the opening on the back of The Dresser.

This is the same opening used to mark the wall.

Step 6

Use the screw to attach the cable to The Dresser.
Tighten by hand.

Step 7

Push The Dresser against the wall.

Step 8

A-C. Slide the top tray from the front with skis facing down on the last topmost drawer.

Check all four sides to ensure top tray is properly nested.

And you're all set.

For 4H, 6H, 8H configurations, repeat this step with the second drawer stack.
