

THUMA

Let's get together.

Studio Desk

www.thuma.co

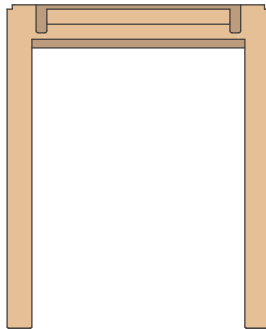

Take care during assembly. Do not dispose of any packaging or contents of the shipping carton until assembly is complete. Avoid balancing unsupported pieces and do not bend over near unsecured pieces. Keep children out of the way during assembly.

Pieces

Desk Top x1

Pair of Legs x2

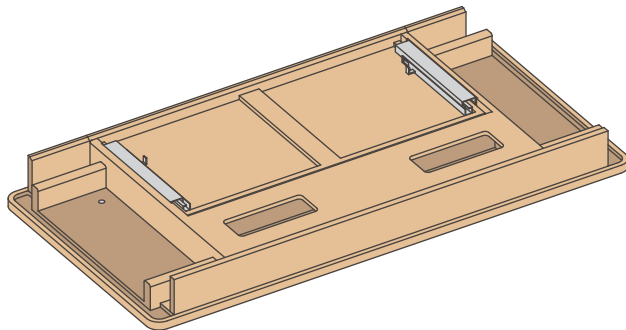

Short Screw x4

Step 1

Use a soft surface as an underlay during assembly to protect from damage.

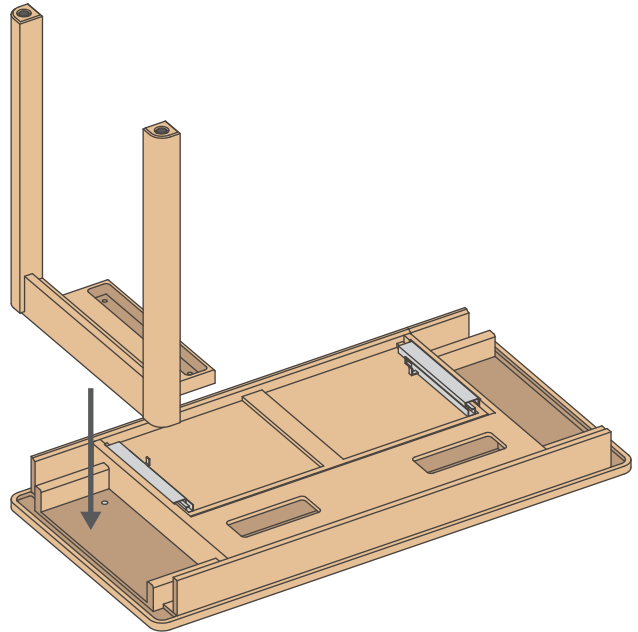

Lay the **desk top** on the floor with the flat side facing down.

Step 2

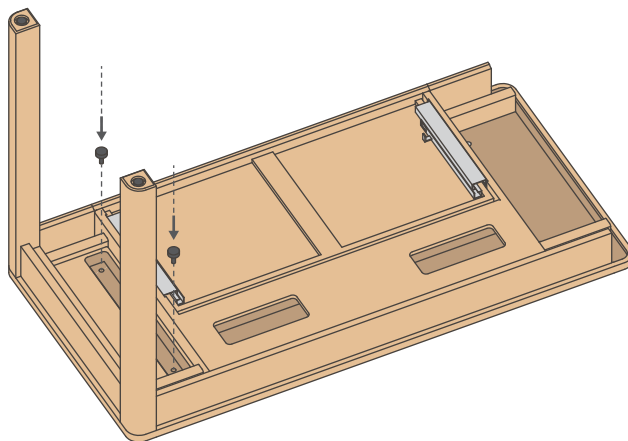

Insert one **pair of legs** into the desk top.

Firmly press the pair of legs down, making sure there are no gaps.

Step 3

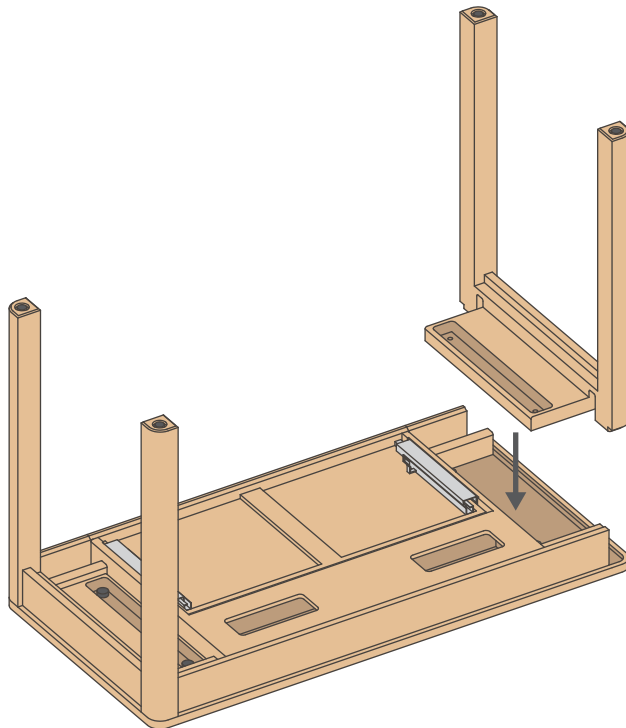

Use two **short screws** to secure the legs to the desk top and tighten by hand.

Step 4

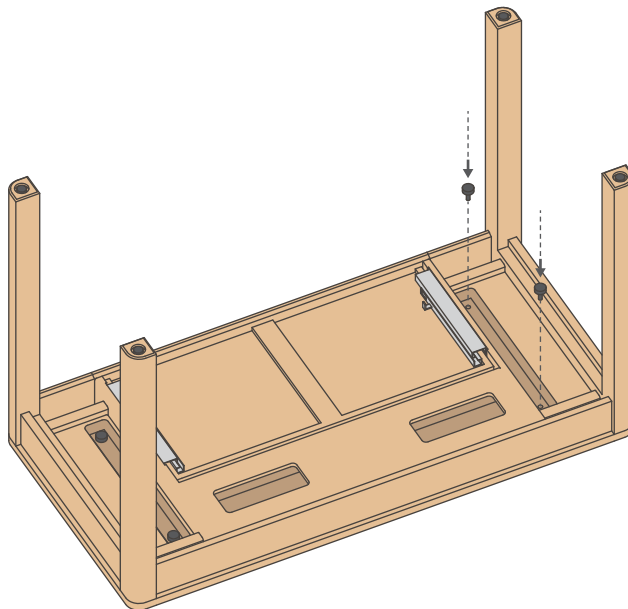

Insert the other pair of legs into the desk top.

Firmly press the pair of legs down, making sure there are no gaps.

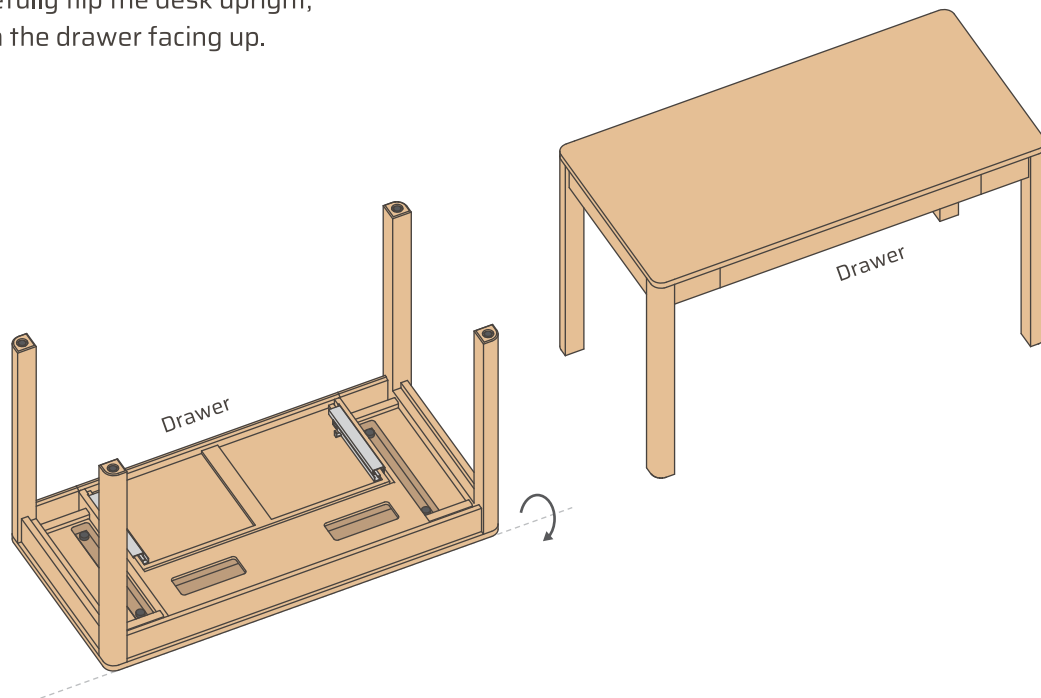

Step 5

Use two short screws to secure the legs to the desk top and tighten by hand.

Step 6

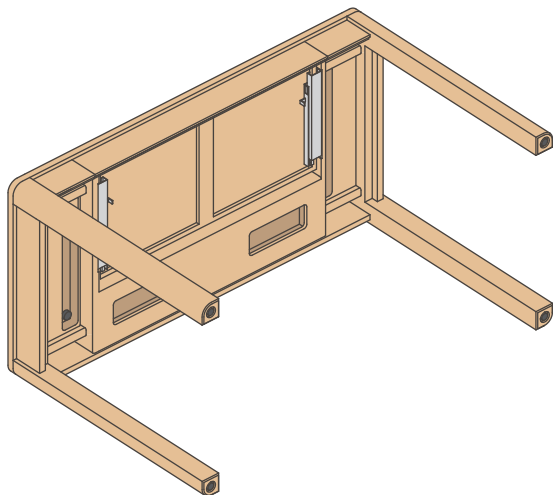

Carefully flip the desk upright,
with the drawer facing up.

Levelers

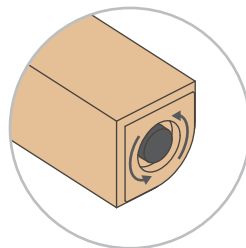

If the floor is level, skip this step. If not, adjust the levelers on each leg.

- A. Carefully flip the desk toward the back side at a 90° angle, making sure the drawer faces up.

- B. Rotate the levelers on each leg to level the desk with the floor, then flip it back to the horizontal position. Adjust each leveler as needed to ensure the desk sits evenly and securely, without rocking.

Repeat this step as needed.

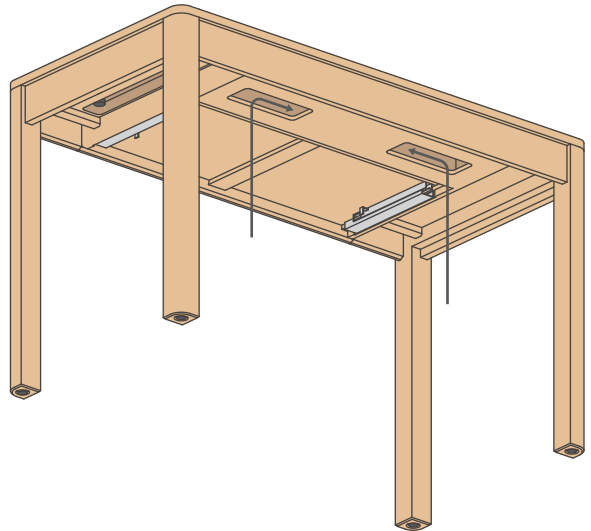

Cable Management

Integrated storage for a power strip located at the back of the desk. If using the cable management feature:

First, plug devices into the power strip.

Tuck the power strip into the shelf at the back of the desk. Push it toward the middle until the power strip is hidden and secure inside the desk.

Enjoy.

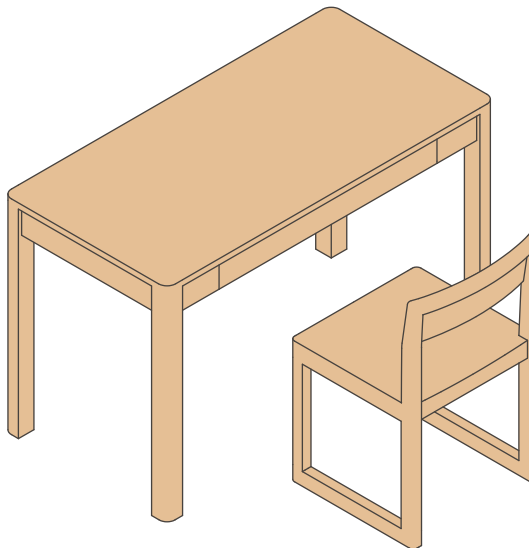

Light a candle, play some jams, pour a refreshment.
