THUMA

Let’s get together.

Signature Bed

For Signature Bed + Headboard, see other side.

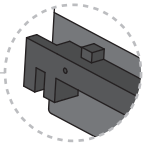

www.thuma.co

Take care during assembly. Do not dispose of any packaging or contents of the shipping carton until assembly is complete. Avoid balancing unsupported pieces and do not bend over near unsecured pieces. Keep children out of the way during assembly.

Pieces

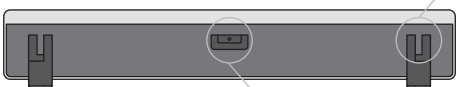

Long Rail x2

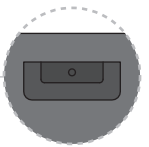

Slat stop

Short Rail x2

"U" joint

Horseshoe

Center Rail x1

Center Leg x1

Long Screw x2

Slats x1

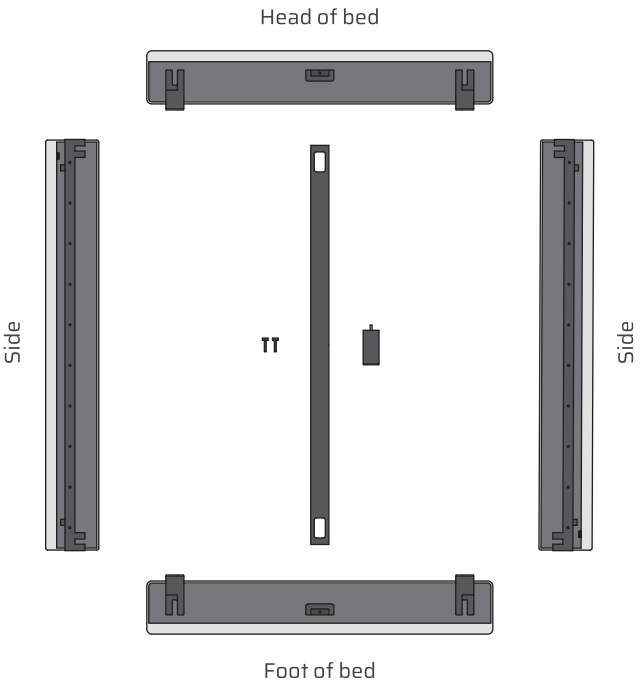

Step 1

Lay out pieces at desired location.

Arrange **long rails** (sides) with “U” joints facing in and **short rails** (head and foot) with “U” joints facing out.

Step into the center of the frame.

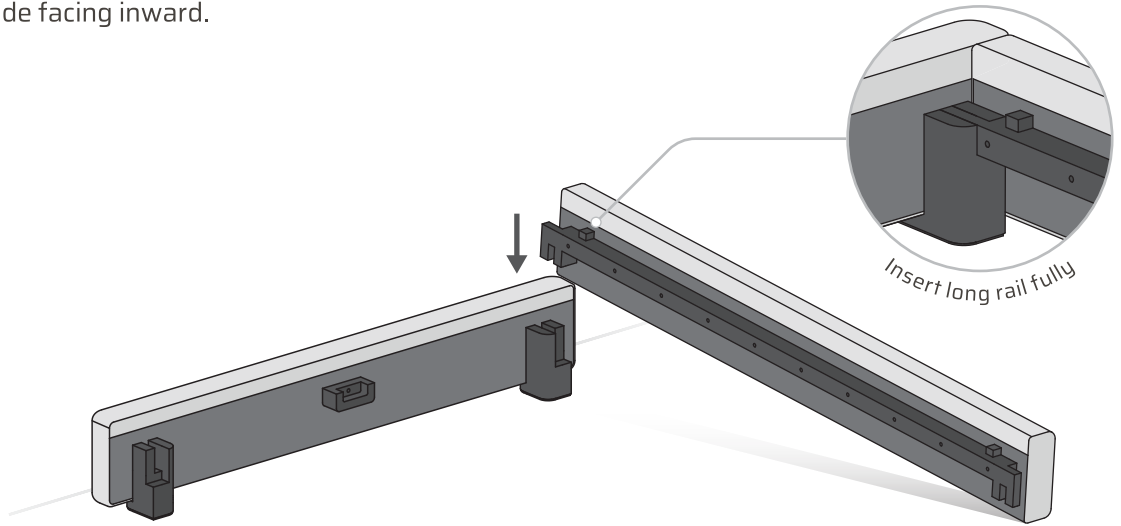

Keep slats on the sideline for now.

Step 2

Stand up first short rail with horseshoe facing inward.

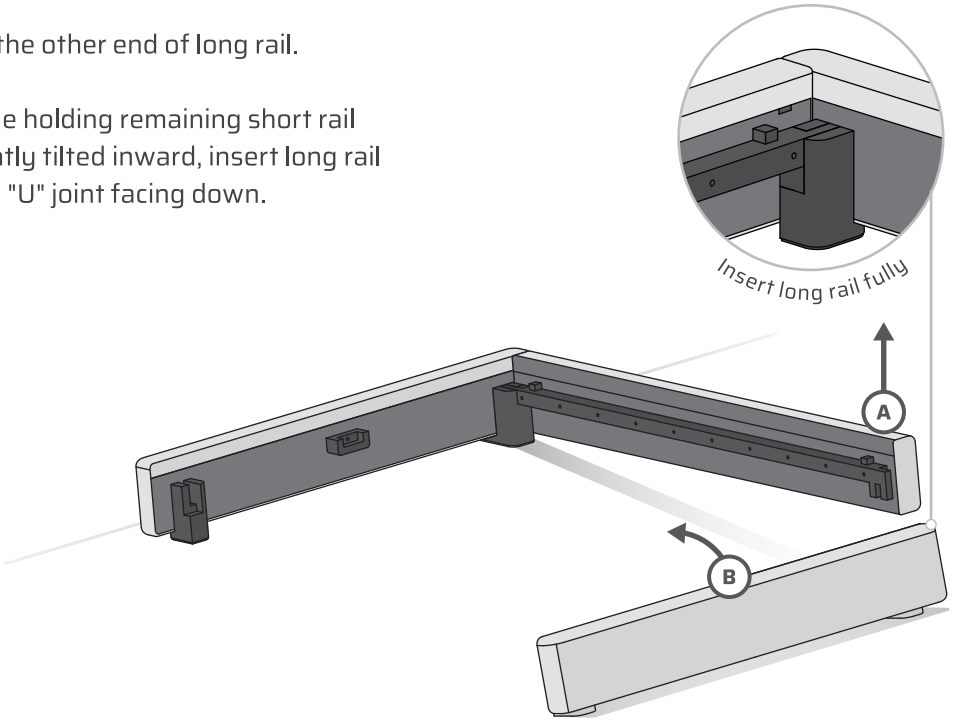

Insert long rail with “U” joint facing down and screws side facing inward.

Step 3

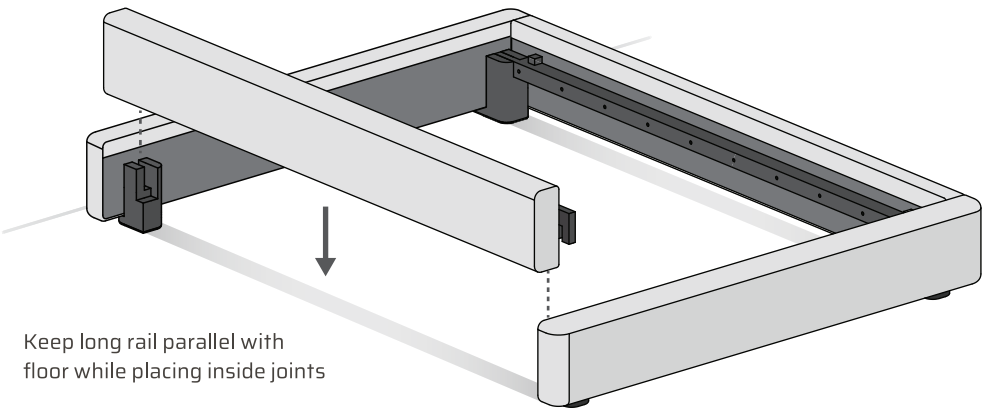

A. Lift the other end of long rail.

B. While holding remaining short rail slightly tilted inward, insert long rail with "U" joint facing down.

Step 4

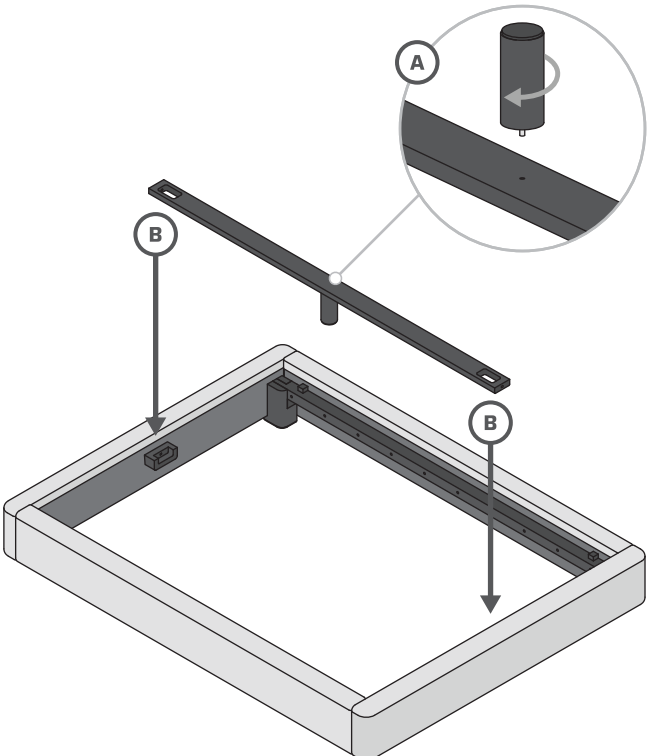

Place remaining long rail into short rails, with "U" joints facing down.
Press down fully.

Step 5

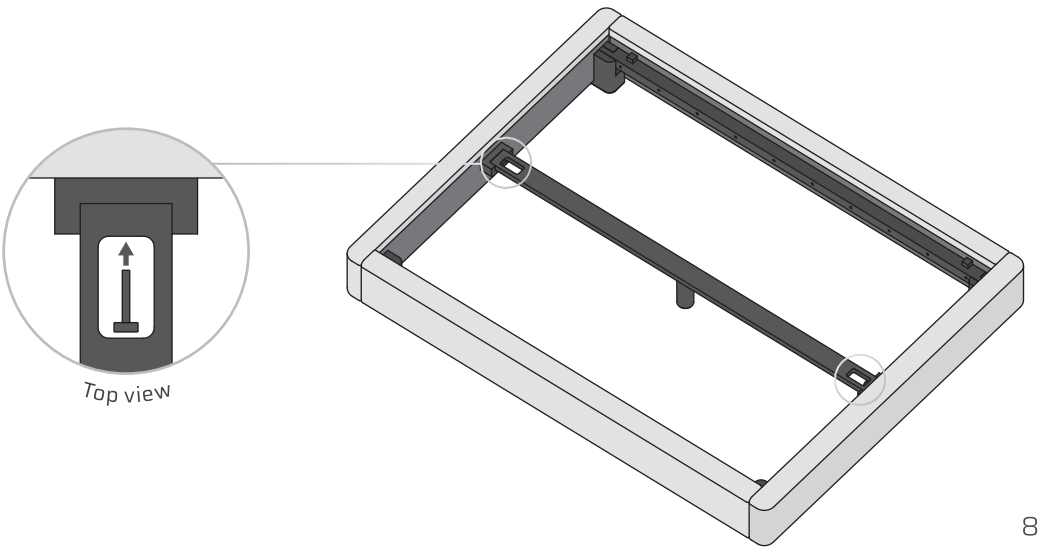

A. Screw **center leg** into **center rail**. The center leg doubles as a leveler. Adjust up and down, as needed.

B. Place one side of center rail into one of the horseshoes on the inside of the frame first. Press down fully, then repeat on the other side.

Step 6

Use two **long screws** to secure center rail to short rails through openings. Tighten by hand.

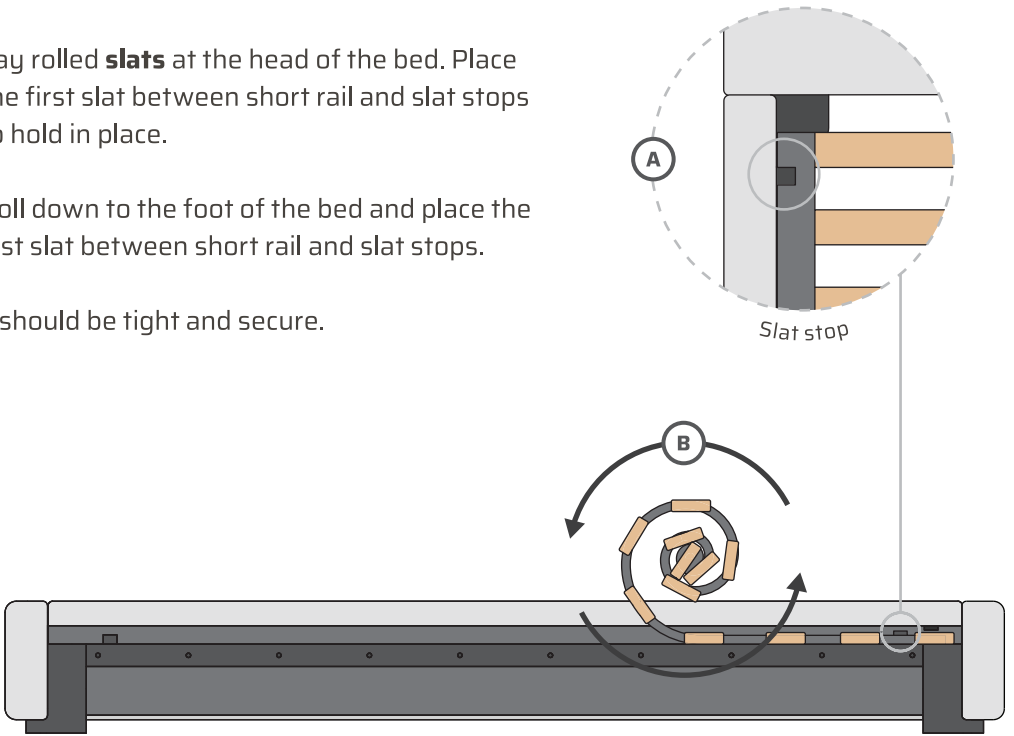

Step 7

A. Lay rolled **slats** at the head of the bed. Place the first slat between short rail and slat stops to hold in place.

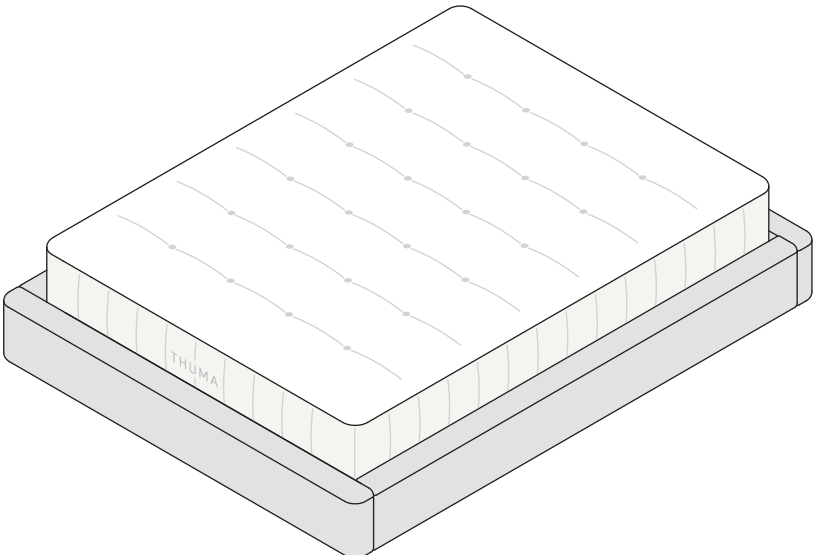

B. Roll down to the foot of the bed and place the last slat between short rail and slat stops.

Slats should be tight and secure.

Step 8

Place mattress on top of the bed.
The added weight will further stabilize the frame.

Enjoy.

Light a candle, play some jams, pour a refreshment.
