

THUMA

Let's get together.

Pillar Side Table

www.thuma.co

Step 1

Slide two legs together by aligning the center slots and pushing them fully into place.

Step 2

Place the bracket panel on top of the legs. Secure it with two short screws, tightening by hand.

Step 3

Use a soft surface as padding to protect pieces from damage during assembly. Flip the tabletop and assembled legs upside down.

Step 4

Insert legs into the tabletop, aligning the joinery with the cutout. Secure with four short screws, tightening by hand.

Step 5

Carefully flip table upright. Enjoy.

Optional Levelers

For uneven floors, screw the included levelers into the bottom of each leg, and adjust until even.

The Pillar Side Table is not designed to be used as a seat and we're unable to guarantee the stability of the table when using it in this way. For your safety, and to remain eligible for our lifetime warranty, please do not sit or store heavy items on top of the Pillar Side Table.
