CRYPTO LOSSES IN 2022
CRYPTO LOSSES IN 2022

Prepared by Immunefi

The team at Immunefi, the leading bug bounty and security services platform for web3 which protects over $60 billion in user funds, has assessed the volume of crypto funds lost by the community due to hacks and scams in 2022.

If you're a developer thinking about a bug-hunting career in web3, we got you. Check out our Web3 Security Library, and start taking home some of the $144M in rewards available on Immunefi — the leading bug bounty platform for web3.

https://immunefi.com/
Overview
The global web3 space was valued at over $934 billion in 2022. That capital represents an unparalleled and attractive opportunity for blackhat hackers.

We have reviewed all instances where blackhat hackers have exploited various crypto protocols, as well as cases of protocols that have allegedly performed a rug pull in 2022. We have located 168 such instances, including both successful and semi-successful hacking attempts, as well as alleged fraud.

In total, we have seen a loss of $3,948,856,037 across the web3 ecosystem in 2022. $3,773,906,837 was lost to hacks in 2022 across 134 specific incidents and $174,949,200 was lost to fraud in 2022 across 34 specific incidents. Most of that sum was lost by four specific projects: Ronin Network, BNB Chain, Wormhole, and FTX.

This number represents a 51.2% decrease compared to 2021, when hackers and fraudsters stole $8,088,338,239.

Key Takeaways in 2022
• The 5 major exploits of the year totaled $2,361,000,000 alone, accounting for 59.8% of all losses in 2022.
• In 2022, hacks continued to be the predominant cause of losses at 95.6%, in comparison to frauds, scams, and rug pulls which comprised only 4.4% of the total losses.
• In 2022, DeFi continued to be the main target of successful exploits at 80.5% as compared to CeFi at 19.5% of the total losses.
• The two most targeted chains in 2022 were BNB Chain and Ethereum. BNB Chain surpassed Ethereum and became the most targeted chain in 2022, with 65 incidents, while Ethereum witnessed 49 incidents.
• In total, $204,157,000 of stolen funds have been recovered across 12 specific instances. This number represents just 5.2% of the total losses in 2022.

## TOP 10 LOSSES IN 2022 BY QUARTER

### Q1 2022
- Ronin Bridge: $625,000,000
- Wormhole: $326,000,000
- Qubit: $80,000,000
- Cashio: $50,000,000
- IRA Financial: $36,000,000
- crypto.com: $30,000,000
- Lympo: $18,700,000
- Superfluid: $13,000,000
- Arbix Finance: $10,000,000
- Dego Finance: $10,000,000

### Q2 2022
- Beanstalk: $182,000,000
- Harmony: $100,000,000
- Mirror Protocol: $90,000,000
- TribeDAO: $80,340,000
- Fantom Scream: $35,000,000
- Optimism: $35,000,000
- Akutars: $33,000,000
- Deus Finance: $13,400,000
- Elephant Money: $11,200,000
- Venus Protocol: $11,200,000

### Q3 2022
- Nomad Bridge: $190,000,000
- Wintermute: $160,000,000
- Raccoon Network and Freedom Protocol *: $20,000,000
- Impermax Finance: $7,451,118
- Audius: $6,000,000
- The Bribe Protocol: $5,500,000
- ZB: $4,800,000
- Teddy Doge *: $4,500,000
- Slope Mobile Wallet: $4,500,000
- Nirvana: $3,500,000

### Q4 2022
- FTX: $650,000,000
- BNB Chain: $570,000,000
- Mango Markets**: $100,000,000
- mgnr*: $52,000,000
- DeFiAI: $40,000,000
- Transit Swap: $28,900,000
- Deribit: $28,000,000
- UXD Protocol**: $20,000,000
- Flare: $18,500,000
- Helio: $15,000,000

* The teams behind Raccoon Network and Freedom Protocol, Teddy Doge, and mgnr allegedly performed a rug pull.
** Mango Markets later recovered $67 million of the stolen funds. UXD Protocol later recovered over $19 million of the stolen funds.
Losses by quarter in 2022

In 2022, Q4 took the lead with $1,620,138,807 in total losses across 55 incidents, representing 41% of the total losses.

Overview

Q1 2022
The total losses in Q1 2022 were $1,229,500,867. This number represents almost a 7.9x growth compared to Q1 2021, when hackers and fraudsters stole $154,609,199. Most of that sum was lost by two specific projects: Ronin Network, known for the Axie Infinity game, and the Wormhole bridge. These projects together amounted to a total loss of $951,000,000.

Q2 2022
The total losses in Q2 2022 were $670,698,280. This number represents almost a 1.5x growth compared to Q2 2021, when hackers and fraudsters stole $440,021,559. Most of that sum was lost by two specific projects: Beanstalk and Harmony Horizon. These projects together amounted to a total loss of $282,000,000.
Losses by quarter in 2022

Q3 2022
The total losses in Q3 2022 were $438,324,902. This number represents a 62.9% decrease compared to Q3 2021, when hackers and fraudsters stole $1,153,390,775. Most of that sum was lost by two specific projects: Nomad Bridge, a cross-chain communication standard that enables transfers of tokens and data between chains, and Wintermute, a global crypto market maker. These projects together amounted to a total loss of $350,000,000.

Q4 2022
The total losses in Q4 2022 were $1,620,138,807. This number represents a 119.2% increase compared to Q4 2021 when hackers and fraudsters stole $739,243,793. Most of that sum was lost by two specific projects: FTX, a cryptocurrency exchange, and BNB Chain, a blockchain solution to build web3 dApps. These projects together amounted to a total loss of $1,220,000,000.

Losses by quarter 2021 vs. 2022
Overview
The crypto industry has suffered some of the largest hacks in its history this year. The five major exploits of the year totaled **$2,361,000,000** alone, accounting for 59.8% of all losses in 2022.

**Ronin Network** Q1 2022  
$625 million

**Wormhole** Q1 2022  
$326 million

**Nomad** Q3 2022  
$190 million

**BNB Chain** Q4 2022  
$570 million

**FTX** Q4 2022  
$650 million
Hacks vs. Fraud Analysis

In 2022, hacks continued to be the predominant cause of losses as compared to frauds, scams, and rug pulls. Fraud accounted for only 4.4% of the total losses in 2022, while hacks accounted for 95.6%.

Overview

**Hacks**
In total, we have seen a loss of **$3,773,906,837** to hacks in 2022, in 134 specific incidents. This number represents a 58.3% increase compared to 2021, when losses caused by hacks totaled **$2,384,164,452**, in 102 incidents.

**Fraud**
In total, we have seen a loss of **$174,949,200** to fraud in 2022, in 34 specific incidents. This number represents a 96.9% decrease compared to 2021, when losses caused by fraud totaled **$5,704,173,787**, in 14 incidents.
DeFi vs. CeFi Analysis

In 2022, DeFi continued to be the main target of successful exploits as compared to CeFi. DeFi accounted for 80.5% of the total losses, while CeFi accounted for 19.5%.

Overview

**DeFi**
DeFi has suffered **$3,180,023,103** in total losses in 2022, across 155 incidents. This number represents a 56.2% increase compared to 2021, when DeFi lost $2,036,015,896, in 107 incidents.

**CeFi**
CeFi has suffered **$768,832,934** in total losses in 2022, across 13 incidents. This number represents a 87.3% decrease compared to 2021, when CeFi lost $6,052,322,343, in 9 incidents.
Losses by Chain

BNB Chain and Ethereum were the two most targeted chains in 2022.

BNB Chain suffered the most individual attacks with 65 incidents, representing 36.1% of the total attacks across targeted chains. This number represents a 51.2% increase compared to 2021, when BNB Chain witnessed 43 attacks.

Ethereum witnessed 49 incidents, representing 27.2% of the total incidents across targeted chains. This number represents a 8.9% increase when compared to 2021, when Ethereum witnessed 45 attacks.

Overview

BNB Chain and Ethereum represented more than half of the chain attacks in 2022 at 63.3%. Solana came in third with 12 incidents, representing 6.7% of total attacks across chains. Avalanche followed with 8 incidents, representing 4.4%. Polygon with 4 incidents, representing 2.2%. NEAR with 2 incidents, representing 1.1%. Polkadot with 1 incident, representing 0.6%.

Remaining chains like Gnosis, Cronos, Arbitrum, Fantom, and others together represented 21.7% of the total chain attacks.
Funds recovery

In total, **$204,157,000** has been recovered from stolen funds in 12 specific situations. This number makes up 5.2% of the total losses in 2022.

Hacks vs. Fraud Analysis

In Q4 of 2022, hacks continued to be the predominant cause of losses as compared to fraud, scams, and rug pulls. Fraud accounted for only 7.4% of the total losses in Q4 2022, while hacks accounted for 92.6%.

Overview

Hacks
In total, we have seen a loss of $1,499,813,207 to hacks in Q4 2022, in 43 specific incidents. This number represents a 106.3% increase compared to Q4 2021, when losses caused by hacks totaled $727,243,793, in 18 incidents.

Fraud
In total, we have seen a loss of $120,325,600 to fraud in Q4 2022, across 12 specific incidents. This number represents a 902.7% increase compared to Q4 2021, when losses caused by fraud totaled $12,000,000, in 1 incident.
DeFi vs. CeFi Analysis

In Q4 of 2022, DeFi continued to be the main target of successful exploits as compared to CeFi. DeFi accounted for 57.6% of the total losses, while CeFi accounted for 42.4% of the total losses.

Overview

**DeFi**
DeFi has suffered $933,040,173 in total losses in 2022, across 50 incidents. This number represents a 133.2% increase compared to 2021, when DeFi lost $400,025,828, in 16 incidents.

**CeFi**
CeFi has suffered $687,098,634 in total losses in 2022, across 5 incidents. This number represents a 102.6% increase compared to 2021, when CeFi lost $339,217,965 in 3 incidents.
Losses by Chain

The two most targeted chains in Q4 2022 were BNB Chain and Ethereum.

BNB Chain suffered the most individual attacks with 18 incidents, representing 36% of the total attacks across targeted chains. This number represents a 260% increase compared to Q4 2021, when BNB Chain witnessed 5 attacks.

Ethereum witnessed 14 incidents, representing 28% of the total attacks across targeted chains. This number represents a 55.6% increase when compared to Q4 2021, when Ethereum witnessed 9 attacks.

Overview

BNB Chain and Ethereum represented more than half of the chain attacks in Q4 2022 at 64%. Solana comes in third with 6 incidents, representing 12% of total losses across chains. Avalanche followed with 3 incidents, representing 6%. NEAR with 2 incidents, representing 4%. Polygon with 1 incident, representing 2%.

Remaining chains like CELO, Optimism, and others together represented 13.6% of the total chain attacks.

Immune

Immune is the leading bug bounty and security services platform for web3 protecting over $60 billion in user funds. Immune features a massive community of whitehat hackers who review projects’ blockchain and smart contract code, find and responsibly disclose vulnerabilities, and get paid for making crypto safer. With Immune, whitehat hackers are rewarded based on the severity of the vulnerability that they discover, creating incentives for as many experts as possible to examine project code for vulnerabilities.

Immune has pioneered the scaling web3 bug bounties standard, meaning that rewards should be priced accordingly with the severity of an exploit and the volume of funds at risk, which resulted in the company building the largest community of security talent in the web3 space.

**Total bounties paid**

Immune has paid out over **$65 million** in total bounties, while saving over **$25 billion** in user funds.

**Total bounties available**

Immune offers over **$144 million** in available bounty rewards.

**Supported projects**

Trusted by established, multi-billion dollar projects like Chainlink, Wormhole, MakerDAO, Compound, Synthetix, and more, Immune now supports 301 projects across multiple crypto sectors.

**Largest bug bounty payments in the history of software**

Immune has facilitated the largest bug bounty payments in the history of software.

- **$10 million** for a vulnerability discovered in Wormhole, a generic cross-chain messaging protocol.
- **$6 million** for a vulnerability discovered in Aurora, a bridge and a scaling solution for Ethereum.
- **$2.2 million** for a vulnerability discovered in Polygon, a decentralised Ethereum scaling platform that enables developers to build scalable user-friendly dApps.
If you're a developer thinking about a bug-hunting career in web3, we got you. Check out our Web3 Security Library, and start taking home some of the $144M in rewards available on Immunefi — the leading bug bounty platform for web3.
