### About the manager(s)

Fairlight Asset Management invests exclusively in global equity markets. The investment approach is grounded in fundamental research, long term in nature and has a strong focus on quality. The team believe a portfolio of the highest quality businesses, purchased with valuation discipline will outperform over the long term whilst protecting and preserving client capital.

The team believe in concentration, backing their best ideas drives the strongest long-term returns. The firm is focused on small and mid cap companies as they believe these businesses receive less investor attention, have greater growth prospects, and are more likely to be acquired by larger companies.

The investment strategy emphasises business quality. Historically, they have found that a portfolio of the best businesses, purchased with valuation discipline, should outperform over the long term, whilst protecting and preserving client capital.
