### How the fund works

The Fund will generally provide a diversified portfolio with exposure to a group of (30 to 40) carefully selected listed international investments. The Fund may have exposure to developed and emerging markets. The Fund will generally be unhedged but the currency hedge ratio can be varied over time.

When you invest your money in the Fund, your money will be pooled together with other investors' money. We use this pool to buy investments and manage them on behalf of all investors in the Fund. This means that by investing in the Fund you have access to certain investments that you may not otherwise be able to access on your own, as well as the knowledge of the skilled underlying investment managers through which the Fund may invest. ClearView Financial Management Limited (CFML) retains day-to-day control over the operation of the fund.

#### About the manager(s)

Fairlight Asset Management invests exclusively in global equity markets. The investment approach is grounded in fundamental research, long term in nature and has a strong focus on quality. The team believe a portfolio of the highest quality businesses, purchased with valuation discipline will outperform over the long term whilst protecting and preserving client capital.

The team believe in concentration, backing their best ideas drives the strongest long-term returns. The firm is focused on small and mid cap companies as they believe these businesses receive less investor attention, have greater growth prospects, and are more likely to be acquired by larger companies.

The investment strategy emphasises business quality. Historically, they have found that a portfolio of the best businesses, purchased with valuation discipline, should outperform over the long term, whilst protecting and preserving client capital.
