300 cigarettes

110+ decibels in minutes

the club is 110 dB

PSST! damages in minutes

Breathe out...

Use Protection

Moshi Pit Fiquette

Fluoridness: watch your surroundings

Consent: never push anyone into the pit

Respect: if someone falls, pick them up

Fast, anonymous, testing → Hassle Free Clinic

What are... PrEP & PEP?

Before & After

**SEXPARTY!**

Cutie

Pre-exposure prophylaxis (PrEP): antiretroviral meds (ARVs) taken before & continuing after potential exposure.

Post-exposure prophylaxis (PEP): ARVs taken within 72 hours of potential exposure.

when were you last tested... I was last tested on... what's your preference for STI prevention... my status is... what's your status... I'll cut up a condom for us... I'm on E but I still like condoms... what are you in the mood for... I'm on T so I'm sensitive... I only want to top tonight, does that work for you... I'm into penetration but I love when you touch me there... I love bottoming but I don't love... can I kiss you? can I touch you... can I go down on you... can I keep going...

when viral load is undetectable HIV is untransmittable

Breathe in...

Concerned about your drugs & alcohol use? CAMH Rainbow Services

binge to experience AUD. You don't need to emotional, or social consequences, it may be despite any physical. If you continue to drink (AUD) is a mental health diagnosis.

Alcohol use disorder

4-5+ drinks in 2 hours
